## PREFACE

Statistics Canada has published an annual report on the qualifications, salary and experience of teachers in public elementary and secondary schools since 1939, with the exception of 1950-51, 1951-52 and 1955-56. Basic data for these three years are contained in the historical tables of the 1970-71 and 1971-72 issue.

The detail and number of statistical tables have been reduced in this publication. However, tables comparable to those produced in previous publications are available on request. In addition, a generalized data retrieval system is now available, allowing users a variety of detailed statistical tables on request.

This report was prepared in the Elementary-Secondary Education Section of the Education, Science and Culture Division by M. Meloche and J. Seidle.

PETER G. KIRKHAM,  
Chief Statistician of Canada.

## PRÉFACE

Statistique Canada a publié, chaque année depuis 1939 (sauf pour les années scolaires 1950-51, 1951-52 et 1955-56), un bulletin sur les qualifications, le traitement et l'expérience des enseignants des écoles primaires et secondaires publiques. Les données de base pour ces trois années figurent dans les tableaux chronologiques du numéro de 1970-71 et 1971-72.

Les tableaux statistiques sont moins nombreux et moins détaillés dans la présente publication. Vous pouvez vous procurer sur demande des tableaux semblables à ceux présentés dans les publications antérieures. De plus, un système généralisé d'extraction des données permet aux utilisateurs d'obtenir, sur demande, divers tableaux statistiques détaillés.

Ce bulletin a été rédigé par M. Meloche et J. Seidle de la Section de l'enseignement primaire et secondaire de la Division de l'éducation, des sciences et de la culture.

Le statisticien en chef du Canada,  
PETER G. KIRKHAM.

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

- - amount too small to be expressed.

<sup>p</sup> preliminary figures.

<sup>r</sup> revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

<sup>p</sup> nombres provisoires.

<sup>r</sup> nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## INTRODUCTION

### Scope of Data

The school years 1972-73 and 1973-74 are covered in this publication. Certain tables appearing in the 1970-71 and 1971-72 report have been deleted and others required format changes in order to produce a more compact version. Detailed statistical tables comparable to those produced in previous publications are available on request.

This survey covers all full-time school instructional, supervisory and administrative personnel and board staff instructing in schools at the beginning of the school years 1972-73 and 1973-74.(1) Excluded from this report are all part-time educators, supervisory and consultant personnel in the departments of education and local board offices (for example, superintendents, directors, supervisors, psychologists, social workers, and others involved in pupil-personnel services or non-teaching activities). Each educator is counted once only even if more than one position is held. Figures appearing in this publication may differ from those published by provincial departments of education. These differences are, for the most part, due to variations in the definition of the educator population.

The survey excludes educators employed in private schools and those in special education schools operated directly by provincial governments. Educators identified as "unclassified" in some of the statistical tables are those who completed a questionnaire but failed to report one or more items under consideration.

### Method

All provinces, with the exception of Québec in both years and Prince Edward Island in 1973-74, were surveyed for this publication. The survey forms were then processed by either the provincial departments of education or by Statistics Canada.

### Definitions

In this publication, the term educator includes teachers, principals, vice-principals, department heads and supervisors. (The term administrator refers to all principals, vice-principals and department heads. The term teacher refers to all other educators.)

(1) Ontario educators were surveyed in the spring of each school year.

### Champ d'application des données

La présente publication porte sur les années scolaires 1972-73 et 1973-74. On a supprimé certains tableaux qui figuraient dans la publication de 1970-71 et 1971-72 et l'on a modifié la présentation de certains autres pour plus de concision. Vous pouvez vous procurer, sur demande, des tableaux statistiques détaillés semblables à ceux contenus dans les publications antérieures.

L'enquête vise tous les enseignants, surveillants et administrateurs à temps plein ainsi que le personnel des conseils scolaires qui travaillaient dans les écoles au début des années scolaires 1972-73 et 1973-74(1). Sont exclus le personnel d'enseignement à temps partiel, les surveillants et les conseillers des ministères de l'Éducation et des bureaux des conseils scolaires (par exemple, les surintendants, les directeurs, les surveillants, les psychologues, les travailleurs sociaux et les personnes chargées des services aux élèves et d'activités autres que l'enseignement). Chaque personne n'est comptée qu'une fois même si elle occupe plus d'un poste. Les chiffres figurant dans ce bulletin peuvent être différents de ceux publiés par les ministères provinciaux de l'Éducation. Ces différences s'expliquent surtout par le fait que la définition de "personnel d'enseignement" n'est pas la même.

L'enquête ne vise ni le personnel d'enseignement des écoles privées ni celui des écoles spéciales qui relèvent directement des administrations provinciales. Le personnel classé dans la catégorie "non déclaré" dans certains tableaux statistiques est celui qui a rempli un questionnaire, mais a omis de répondre à une ou plusieurs questions à l'étude.

### Méthode

Toutes les provinces, sauf le Québec en 1972-73 et 1973-74 et l'Île du-Prince-Édouard en 1973-74, ont participé à l'enquête aux fins de la présente publication. Les déclarations ont ensuite été dépouillées soit par les ministères provinciaux de l'Éducation ou par Statistique Canada.

### Définitions

Aux fins de la présente publication, l'expression personnel d'enseignement désigne les enseignants, les directeurs, les sous-directeurs, les chefs de département et les surveillants. (Le terme administrateur désigne tous les directeurs, sous-directeurs et chefs de département, et le terme enseignant, tous les autres membres du personnel.)

(1) Le personnel d'enseignement de l'Ontario fait l'objet d'une enquête au printemps de chaque année scolaire.

Public schools are those schools which are operated by local school boards and which are supported by local taxation and supplemented by provincial grants in accordance with the education acts of the provinces or territories in which they are located. Included under this definition are the denominational schools of Newfoundland and the Protestant and Roman Catholic Separate schools where such exist. Schools located on Department of National Defence bases across Canada are also included since they operate within the framework of the public schools of the provinces in which they are located.

Teaching level - Educators are classified as elementary or secondary according to the grade levels they teach and/or supervise.

For statistical purposes the following definitions were used to arrive at "teaching level":

1. An educator who teaches or supervises any grade or combination of grades from pre-Grade 1 through Grade 8 but no grades above 8, is classified as "elementary". (In British Columbia and the Yukon, read Grade 7 in place of Grade 8.)
2. An educator who teaches or supervises any grade or combination of Grades 9 through 13 but no grade below 9, is classified as "secondary". (In British Columbia and the Yukon, read Grade 8 in place of Grade 9.)

The above criteria do not apply to a number of educators. Some did not answer the appropriate question while others teach or supervise at both levels. In these cases, an arbitrary assignment of teaching level was based on the following criterion:

3. If an educator was assigned to a specific school, the level of the school was assumed to be the level of teaching. For example, a school offering Grades 1-10 is defined as elementary while a school offering Grades 7-12 is defined as secondary.

The above criteria provide for historical continuity. In the past, due to a lack of additional data, educators who did not meet the above criteria were assigned the secondary level if teaching in more than one school, otherwise they were classified as elementary. More precise data now being available, the following criteria have been introduced.

Les écoles publiques sont toutes celles qui relèvent des conseils scolaires locaux et qui sont financées par les impôts locaux auxquels viennent s'ajouter des subventions provinciales en vertu de la Loi sur l'éducation de la province ou du territoire dans lequel ces écoles sont situées. Ce terme désigne également les écoles confessionnelles de Terre-Neuve et les écoles protestantes et catholiques romaines séparées; les écoles situées dans les bases militaires du ministère de la Défense nationale au Canada font également partie de cette catégorie puisqu'elles sont considérées au même titre que les écoles publiques des provinces.

Niveau (d'enseignement) - Le personnel d'enseignement est considéré comme travaillant au niveau élémentaire ou secondaire selon les classes auxquelles il enseigne et (ou) qu'il surveille.

Aux fins de la statistique, voici le détail de la définition du terme "niveau":

1. Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes du pré-élémentaire à la 8e année, mais non dans les classes supérieures à la 8e année, est classé au niveau "élémentaire". (Dans le cas de la Colombie-Britannique et du Yukon, lire "7e année" au lieu de "8e année".)
2. Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes de la 9e à la 13e année, mais non dans les classes inférieures à la 9e année, est classé au niveau "secondaire". (Dans le cas de la Colombie-Britannique et du Yukon, lire "8e année" au lieu de "9e année".)

Certains membres du personnel d'enseignement n'entrent pas dans ces catégories parce qu'ils n'ont pas répondu à la question pertinente ou parce qu'ils enseignent ou surveillent dans des classes aux deux niveaux. Dans ces cas, on a déterminé le niveau d'enseignement de façon arbitraire en se fondant sur le critère suivant:

3. Si un membre du personnel d'enseignement est affecté à une école particulière, on suppose que le niveau de l'école est le niveau d'enseignement de la personne. Par exemple, une école qui offre des cours de la 1re à la 10e année est une école primaire et celle qui dispense des cours de la 7e à la 12e année est une école secondaire.

Ces critères permettent une certaine continuité dans le temps. Dans le passé, en raison d'un manque de données, le personnel qui ne répondait pas aux critères ci-dessus était classé au niveau secondaire s'il travaillait dans plus d'une école; autrement, on le considérait comme étant au niveau élémentaire. Comme nous disposons actuellement de données plus précises, nous avons établi les critères suivants.

4. If the question requesting the per cent of time teaching or supervising Grades 1-8 and/or 9-13 was answered, the level of the higher percentage was assigned.

5. If the information noted in "4" above was not available but the specific grades taught and/or supervised were reported, the level was assigned according to the level of the majority of grades.

If none of the above conditions were met, the educator was assigned the elementary level.

Tenure is defined as the number of years of experience with the present school board, which may or may not be continuous.

Years of education approved for salary purposes - The number of years of education approved for salary purposes is defined as the number of years of education beyond the equivalent of the junior matriculation level recognized for salary placement purposes. In the Atlantic Provinces the certification schemes perform this function while in Ontario and the Western Provinces specific questions were asked to provide this information. Every teacher was assigned a numerical value which gives the number of years of education beyond secondary school graduation recognized for salary or grant purposes.

#### Methods of Calculation

Salary - Respondents were requested to report their annual contract salary to the nearest dollar as of the date of completion of the questionnaire. Median and percentile salaries were calculated on these reported salaries based on intervals of \$10. Educators not reporting salaries were excluded from the calculations.

Age - The questionnaire requested the date of birth of each respondent. In the tables of this report, age is calculated as of December 31 of the year under review. For example, age data collected for the 1973-74 school year are calculated as of December 31, 1973.

Experience - Experience is calculated on the basis of 10 months equalling one school year. For example, 7-8 indicates seven years and eight months and is synonymous with 7.8 years. All experience is considered as of June 30 of the previous school year. For example, the number of years of experience reported by teachers in the 1973-74 school year is as of June 30, 1973.

4. Si l'enquêté a répondu à la question relative au pourcentage de temps consacré à l'enseignement ou à la surveillance de la 1<sup>re</sup> à la 8<sup>e</sup> année et (ou) de la 9<sup>e</sup> à la 13<sup>e</sup> année, on lui a attribué le niveau correspondant au pourcentage le plus élevé.

5. Si l'enquêté n'a pas fourni les renseignements dont il est question en "4" ci-dessus, mais qu'il a déclaré les classes dans lesquelles il enseignait et (ou) surveillait, on lui a attribué le niveau correspondant à la majorité des classes.

Si l'enquêté ne remplissait aucune des conditions susmentionnées, on l'a classé au niveau élémentaire.

Le terme états de service (service courant) désigne le nombre d'années d'expérience dans l'enseignement au sein du conseil scolaire actuel, que le service soit continu ou non.

Années de scolarité approuvées à des fins de rémunération - Ce terme désigne les années d'études, au-delà de l'équivalent de l'immatriculation junior, reconnues aux fins de l'établissement des traitements. Dans les provinces de l'Atlantique, c'est le régime de brevets qui joue ce rôle, tandis qu'en Ontario et dans les provinces de l'Ouest, on a dû poser des questions précises en vue d'obtenir ces renseignements. On a attribué à chaque personne une valeur numérique indiquant le nombre d'années de scolarité, au-delà du cycle secondaire, reconnues aux fins de l'établissement des traitements ou des subventions.

#### Méthodes de calcul

Traitement - On a demandé aux enquêtés de déclarer leur traitement annuel au dollar près à la date à laquelle ils ont rempli le questionnaire. Les traitements médians et ceux de chaque percentile ont été calculés, en fonction des traitements déclarés, par intervalles de \$10. Le personnel qui n'a pas déclaré son traitement a été exclu des calculs.

Âge - Chaque enquêté devait déclaré sa date de naissance. Dans les tableaux de la présente publication, l'âge est calculé au 31 décembre de l'année à l'étude. Ainsi, les données sur l'âge recueillies pour l'année scolaire 1973-74 sont calculées au 31 décembre 1973.

Expérience - L'expérience est calculée en fonction d'une période d'enseignement de 10 mois correspondant à une année scolaire. Par exemple, 7-8 signifie sept ans et huit mois et est synonyme de 7.8 années. Toute expérience est relevée au 30 juin de l'année scolaire précédente. Ainsi, le nombre d'année d'expérience déclaré par le personnel pour l'année scolaire 1973-74 est compté au 30 juin 1973.

Years since award of first and highest degree — Information was requested on the year in which the first and highest degrees were obtained. As with age, the number of years since the awarding of first and highest degree is based on the calendar year under review.

#### Limitations

Several salary contracts were still unresolved when the questionnaires were completed and a number of contracts were negotiated retroactively covering periods of one to two years. Caution must therefore be exercised when making interprovincial and historical comparisons. In addition, it should be recognized that variations in median salary do not necessarily indicate variations in the salary schedules on which educators were paid. Since salaries are based on both years of training and years of teaching, changes in the distribution of either of these two factors could cause an increase in the median salary while the salary scale remained unchanged.

The classification of teaching level has been arbitrarily established and as such does not correspond to all provincial definitions. Furthermore, the proportion of educators with teaching assignments covering both the elementary and secondary levels of education varies widely from one province to another. Therefore, caution must be exercised when making interprovincial comparisons.

The present classification was established in 1968-69, rendering invalid any historical comparisons prior to that school year. (See publications prior to 1968-69 for exact definitions previously in use.) For most provinces, the change in definition resulted in an increase in the proportion of teachers classified as "elementary".

Prior to 1970-71, educators in schools operated by the Department of Indian and Northern Affairs in Arctic Québec were included with those of the Northwest Territories. Since 1970-71, educators in Arctic Québec have been excluded from the publication.

The 1972-73 school year marked the reconstituting of a survey of educators in Ontario. In both 1972-73 and 1973-74, between 1% and 2% of staff did not report.

The number of secondary educators in the Yukon in the 1973-74 school year is under-reported by approximately 50.

Années écoulées depuis l'obtention du premier grade et du grade le plus élevé — On a demandé des renseignements au sujet de l'année de l'obtention du premier grade et du grade le plus élevé. Comme dans le cas de l'âge, le nombre d'année écoulées depuis l'obtention du premier grade et du grade le plus élevé est calculé en fonction de l'année civile en question.

#### Restrictions

Plusieurs échelles de traitements contractuels étaient encore indéterminées au moment où les enquêtés ont rempli les questionnaires et un certain nombre de conventions ont été négociées avec un effet rétroactif de un à deux ans. Il faut donc être prudent lorsqu'il s'agit d'établir des comparaisons d'une province à l'autre et dans le temps. De plus, il y a lieu de signaler que les variations du traitement médian ne signifient pas nécessairement que les échelles de traitement du personnel d'enseignement ont fluctué. Comme les traitements sont fondés à la fois sur les années d'études et les années d'expérience dans l'enseignement, des variations au chapitre de l'un ou l'autre de ces deux facteurs pourraient entraîner un relèvement du traitement médian, tandis que l'échelle de traitement demeurerait la même.

La classification selon le niveau a été déterminée de façon arbitraire et, en tant que telle, ne correspond pas aux définitions en usage dans toutes les provinces. De plus, la proportion du personnel d'enseignement dont les fonctions chevauchent les niveaux élémentaire et secondaire varie beaucoup d'une province à l'autre. Il faut donc, ici encore, être prudent lorsqu'il s'agit d'établir des comparaisons interprovinciales.

La classification actuelle a été établie en 1968-69; ainsi, il n'est possible de faire des comparaisons historiques qu'après cette année scolaire. (Voir les publications antérieures à 1968-69 pour connaître les définitions précédemment utilisées.) La modification de la définition a engendré, dans la plupart des provinces, une augmentation de la proportion du personnel classé au niveau "élémentaire".

Avant 1970-71, le personnel d'enseignement qui travaillait dans les écoles de l'Arctique québécois relevant du ministère des Affaires indiennes et du Nord était compris avec celui des Territoires du Nord-Ouest. Depuis 1970-71, il n'est plus visé par l'enquête.

L'année scolaire 1972-73 a marqué l'établissement d'une nouvelle enquête sur le personnel d'enseignement en Ontario. En 1972-73 et 1973-74, entre 1 % et 2 % de ce groupe s'est abstenu de faire une déclaration.

Pour l'année scolaire 1973-74, il y a eu sous-dénombrement du personnel d'enseignement du niveau secondaire au Yukon (~50 environ).

## GENERAL TRENDS

Until the 1971-72 school year parallel growth occurred in the number of students and the size of the teaching force. In 1971-72, the first decrease in enrolment took place. By 1973-74 a trend of declining enrolments was emerging and by 1975-76 this pattern had become well established (see Elementary-Secondary School Enrolment, 1975-76, Catalogue 81-210 and Advance Statistics of Education, 1976-77, Catalogue 81-220). The decline in overall enrolment was caused almost entirely by decreases at the elementary level, secondary enrolments remaining relatively constant over the period.

During the first years of enrolment decline the teaching force continued to grow, though at a considerably slower rate. By 1973-74 the first reduction in the number of teachers took place, a drop from 186,146 in 1972-73 to 185,151 in 1973-74.(2) The decrease in staff occurred two years after the decrease in enrolment for two basic reasons. First, pupil-teacher ratios at the elementary level, where the enrolment decreases occurred, have been traditionally higher than at the secondary level. Second, some local school boards agreed to decrease pupil-teacher ratios while in British Columbia, a general policy was introduced by the Department of Education to reduce pupil-teacher ratios by one in all districts.

The changes noted nationally are not necessarily reflected at the provincial level. Between 1972-73 and 1973-74, for example, British Columbia recorded the largest increase in teaching staff (7%) while Ontario recorded the largest decrease (3%).

## TRENDS IN RETENTION, RECRUITMENT AND LOSSES

While a reduction in the number of teachers did not take place until 1973-74, the rate of growth in the teaching force declined substantially in the early 1970's. As a result, new patterns of retention, recruitment and losses emerged.

The national retention rate in 1973-74 was 89% (up from 85% in 1970-71), ranging from a low of 84% in Newfoundland to a high of 92% in Nova Scotia. The largest change in rate over the four-year period occurred in Manitoba (from 83% to 90%), while the smallest change was recorded in British Columbia (from 88% to 89%). The general increase in retention rates, combined with an initially small increase in staff followed by a reduction, had a significant impact on the rates of teacher losses and recruitment.

(2) Excludes Québec and Prince Edward Island.

## TENDANCES GÉNÉRALES

Avant l'année scolaire 1971-72, le nombre d'élèves et le nombre d'enseignants ont progressé de façon parallèle. En 1971-72, on a enregistré la première diminution des effectifs scolaires. Dès 1973-74, une tendance à la baisse des effectifs se dessinait et, en 1975-76, elle était bien établie (voir Effectifs des écoles primaires et secondaires, 1975-76, n° 81-210 au catalogue et Statistiques de l'enseignement - Estimations, 1976-77, n° 81-220 au catalogue). La baisse de l'ensemble des effectifs était presque entièrement attribuable à des diminutions au niveau élémentaire, les effectifs secondaires étant demeurés relativement stables au cours de cette période.

Au cours des premières années de baisse des effectifs, le corps enseignant a continué de s'accroître, mais à un taux beaucoup moindre. En 1973-74, on a enregistré la première baisse du nombre d'enseignants qui est passé de 186,146 en 1972-73 à 185,151(2). La diminution du personnel enseignant s'est produite deux ans après celle des effectifs pour deux raisons fondamentales. D'abord, les rapports maître/élèves ont toujours été plus élevés au niveau primaire, là où il y a eu baisse des effectifs, qu'au niveau secondaire. Ensuite, certains conseils scolaires ont accepté d'abaisser les rapports maître/élèves et, en Colombie-Britannique, le ministère de l'Éducation a adopté une politique générale visant à réduire de un les rapports maître/élèves dans tous les districts.

Les changements constatés à l'échelle du pays ne se sont pas toujours reflétés au niveau des provinces. Entre 1972-73 et 1973-74, par exemple, la Colombie-Britannique a enregistré la plus forte augmentation du personnel enseignant (7 %), alors qu'on a observé la baisse la plus marquée en Ontario (3 %).

## TENDANCES DE LA PERSÉVÉRANCE, DU RECRUTEMENT ET DES DÉPARTS

Même si l'on n'a pas constaté de baisse du nombre d'enseignants avant 1973-74, le taux de croissance du corps enseignant a beaucoup diminué au début des années 70. En conséquence, de nouvelles tendances de la persévérance, du recrutement et des départs se sont précisées.

En 1973-74, le taux de persévérance au Canada se situait à 89 % (augmentation par rapport à 1970-71 de 85 %), s'échelonnant entre 84 % à Terre-Neuve et 92 % en Nouvelle-Écosse. La plus forte variation du taux au cours de la période de quatre ans a été observée au Manitoba (de 83 % à 90 %), alors que en Colombie-Britannique enregistrait la plus faible variation (de 88 % à 89 %). L'accroissement généralisé des taux de persévérance, joint d'abord à une augmentation peu importante du personnel puis à une réduction, a influé de façon appréciable sur les taux de départ et de recrutement des enseignants.

(2) Sans le Québec et l'île-du-Prince-Édouard.

The national rate of losses to the teaching force in 1973-74 was 11% (down from 15% in 1970-71) ranging from a high of 16% in Newfoundland to a low of 8% in Nova Scotia. The largest change in rate over the four-year period occurred in Manitoba (from 16% to 10%).

The rate of recruitment declined nationally from 17% in 1970-71 to 12% in 1973-74. Newfoundland maintained the highest rate throughout the period, being 18% in 1973-74. British Columbia was the only province to experience an increase in the recruitment rate, from 15% in 1970-71 to 18% in 1973-74, although a decline in rate occurred in the intervening years. Ontario recorded the lowest recruitment rate in 1973-74 (7%). The largest declines during the period took place in Manitoba and Ontario, from 19% to 10% and from 15% to 7% respectively.

With the reduction in the turnover of staff, one might expect that the characteristics of the teaching force would remain relatively constant. However, important changes have occurred. For example, more men are teaching than ever before; the teaching force is becoming older; qualifications and experience continue to increase; mobility has decreased; and salaries continue to increase due not only to contract settlements but also to the increased qualifications and experience of the teaching force.

#### PERSONAL CHARACTERISTICS

Over the past 10 years, there has been a continuing decline in the proportion of females in the teaching force, from 64% in 1963-64 to 59% in 1971-72, to 56% in 1973-74. At the elementary level over the same period, the decline was seven percentage points (from 77% to 73% to 70%), while at the secondary level it was three percentage points (from 35% to 34% to 32%).

Over the past two years there has been a small general increase in the median ages of staff to 32 years in 1973-74, though decreases were recorded in Nova Scotia and Saskatchewan. However, an interprovincial comparison in 1973-74 shows considerable variation from a low of 28 years in Newfoundland to a high of 34 years in British Columbia. Considering the general tendency for enrolments and recruitment to decrease and retention of staff to increase, the median age of the staff should continue to increase in the next few years.

En 1973-74, le taux de départ pour le corps enseignant à l'échelle nationale s'établissait à 11 % (baisse par rapport à 1970-71 (15 %), s'échelonnant entre 16 % à Terre-Neuve et 8 % en Nouvelle-Écosse. La variation la plus importante du taux au cours de la période de quatre ans a été enregistrée au Manitoba (de 16 % à 10 %).

Le taux de recrutement a diminué dans tout le Canada, passant de 17 % en 1970-71 à 12 % en 1973-74. C'est Terre-Neuve qui a conservé le taux le plus élevé au cours de la période entière; en 1973-74, il atteignait 18 %. La Colombie-Britannique a été la seule province à enregistrer un accroissement du taux de recrutement qui est passé de 15 % en 1970-71 à 18 % en 1973-74, bien qu'une baisse se soit produite dans l'intervalle. L'Ontario a enregistré le plus faible taux de recrutement en 1973-74 (7 %). Les baisses les plus importantes au cours de la période ont été observées au Manitoba (de 19 % à 10 %) et en Ontario (de 15 % à 7 %).

En raison du ralentissement du renouvellement du personnel, on pourrait s'attendre que les caractéristiques du corps enseignant demeurent relativement constantes. Mais des changements importants se sont produits. Par exemple, le corps enseignant compte plus d'hommes que jamais; la moyenne d'âge augmente; le niveau des qualifications et de l'expérience ne cesse pas de s'accroître; la mobilité a diminué; et les traitements augmentent toujours, non seulement en raison de la signature de nouveaux contrats de travail, mais aussi à cause de la progression du niveau des qualifications et de l'expérience du corps enseignant.

#### CARACTÉRISTIQUES PERSONNELLES

Au cours des 10 dernières années, la proportion de femmes au sein du corps enseignant n'a cessé de décroître, passant de 64 % en 1963-64 à 59 % en 1971-72 et à 56 % en 1973-74. Au cours de la même période, la baisse au niveau élémentaire a atteint sept points (de 77 % à 73 % à 70 %), alors qu'au niveau secondaire, elle s'est chiffrée à trois points (de 35 % à 34 % à 32 %).

Au cours des deux dernières années, on a observé chez le personnel une légère augmentation généralisée de l'âge médian (32 ans en 1973-74), bien que la Nouvelle-Écosse et la Saskatchewan aient enregistré des baisses. Toutefois, une comparaison interprovinciale de l'âge médian en 1973-74 révèle des variations importantes s'échelonnant entre 28 ans à Terre-Neuve et 34 ans en Colombie-Britannique. Compte tenu de la tendance générale à la baisse des effectifs et du taux de recrutement d'une part et de la tendance à la hausse du taux de persévérance d'autre part, l'âge médian du personnel devrait continuer d'augmenter au cours des prochaines années.

## QUALIFICATIONS

The restructuring and upgrading of minimum requirements for teacher certification introduced by provincial departments of education in the last few years have had a major influence on the redistribution of the teaching staff by qualifications. By 1973-74, certificates previously granted on the basis of a secondary school diploma and two years of teacher training had been discontinued in all provinces except New Brunswick.(3) In all other provinces in 1973-74 the minimum requirements for new staff were either three or four years of post-secondary study. Continuing staff having less than the minimum requirements have generally been given a period of time to upgrade their qualifications.

The impact of these changing requirements was most significant at the elementary level. For example, in 1971-72, 75% of the elementary staff had more than two years of post-secondary education. By 1973-74 the proportion had increased to 83%.(4) The major reason for this change was the higher qualifications of new appointments. At the elementary level, the percentage of newly hired staff having more than two years of post-secondary education ranged from a low of 59% in New Brunswick to a high of 97% in Alberta. More significantly, 72% of the new staff had four or more years of post-secondary education.

At the secondary level, where qualifications have traditionally been higher, the impact of new hirings on the distribution of staff according to qualifications has been less substantial. In fact, continuing staff were more highly qualified than new appointments in all provinces except Nova Scotia, Ontario and Alberta.

While new appointments were entering the profession with higher qualifications, members of the continuing teaching force were also upgrading their qualifications by attending winter and summer programs. As a result, the number of educators with fewer than four years of post-secondary education decreased, while those with four or more years increased. By 1973-74 the proportions of elementary staff with four or more years of post-secondary education had increased to 52% from 46% in 1971-72.

(3) In 1973-74 a secondary school diploma followed by two years of post-secondary education was the minimum requirement in New Brunswick.

(4) Ontario teachers were excluded from this calculation, 1971-72 data being unavailable.

## QUALIFICATIONS

La restructuration et le relèvement des exigences de base pour l'obtention d'un brevet d'enseignement, mis de l'avant ces dernières années par les ministères provinciaux de l'Éducation, ont beaucoup influé sur la répartition du personnel enseignant selon les qualifications. En 1973-74, toutes les provinces sauf le Nouveau-Brunswick(3) avaient cessé de délivrer les brevets décernés après l'obtention d'un diplôme de fin d'études secondaires et deux ans de formation pédagogique. Les exigences de base en 1973-74 pour le nouveau personnel enseignant dans ces provinces prévoyaient trois ou quatre années d'études postsecondaires. En général, le personnel permanent ne répondant pas aux exigences de base a bénéficié d'un délai pour se perfectionner.

Les conséquences de ces nouvelles exigences se sont surtout fait sentir au niveau élémentaire. En 1971-72, par exemple, 75 % du personnel enseignant à ce niveau primaire avait fait plus de deux années d'études postsecondaires. La proportion était passée à 83 %(4) en 1973-74. Ce changement s'explique principalement par le niveau plus élevé des qualifications des nouveaux enseignants. Au niveau élémentaire, la proportion du personnel nouvellement embauché ayant fait plus de deux années d'études postsecondaires s'échelonne entre 59 % au Nouveau-Brunswick et 97 % en Alberta. Fait encore plus important, 72 % du nouveau personnel avait fait quatre années ou plus d'études postsecondaires.

Au secondaire, où le niveau des qualifications a toujours été plus élevé, l'embauchage de nouveaux enseignants a influé de façon moins sensible sur la répartition du personnel selon les qualifications. En fait, le personnel permanent était plus qualifié que les enseignants nouvellement embauchés et ce, dans toutes les provinces sauf en Nouvelle-Écosse, en Ontario et en Alberta.

Alors que les nouveaux enseignants faisaient leurs débuts dans l'enseignement avec un niveau plus élevé de qualifications, les membres du personnel enseignant permanent se perfectionnaient en suivant des cours l'hiver et l'été. En conséquence, le nombre d'enseignants ayant fait moins de quatre années d'études postsecondaires a diminué, alors que le nombre de ceux ayant fait plus de quatre années d'études postsecondaires a augmenté pour s'établir à 52 % contre 46 % en 1971-72.

(3) En 1973-74, les exigences de base au Nouveau-Brunswick consistaient en un diplôme de fin d'études secondaires suivi de deux années d'études postsecondaires.

(4) Sans les enseignants de l'Ontario, les données de 1971-72 n'étant pas disponibles.

The increased proportion of the teaching staff with four or more years of post-secondary education is also reflected in the proportion having university degrees. This proportion increased from 52% in 1971-72 to 61% in 1973-74.(5) At the elementary level, the increase was more striking, from 37% to 48%. At the secondary level, 79% held degrees in 1971-72 compared with 84% in 1973-74.

The increasing proportion of staff with university degrees is caused both by the recruitment of more highly qualified personnel and by the upgrading of the continuing staff. In 1973-74, 50% of the new hirings at the elementary level held degrees, compared to 84% at the secondary level. Of the continuing staff who did not hold degrees previously, 2.1% were awarded first degrees in 1971-72 and 2.6% in 1972-73. Of continuing staff already holding one or more degrees, 1.4% earned additional degrees in 1971-72 and 1.7% in 1972-73. These degrees were earned as a result of teachers attending summer, night or extension courses while continuing to teach on a full-time basis.

#### EXPERIENCE

The median teaching experience for all staff in the 1973-74 school year was 7.0 years (unchanged from 1972-73). However, there was considerable interprovincial variation in the median teaching experience ranging from 6.0 years in Newfoundland and the Northwest Territories to 9.0 years in Saskatchewan.

In 1973-74, the median teaching experience for all elementary teachers was 7.0 years (7.2 for males and 7.0 for females), unchanged from 1972-73. At the secondary level the median teaching experience was 7.7 years (8.0 for men and 6.0 for women).

Over the past two years, teaching staff have tended to remain with the employing board of the previous year. Median experience of this type (tenure) was 4.0 years at both levels in 1972-73. In the following year median tenure reached 5.0 years overall, remaining at 4.0 at the elementary level and increasing to 5.0 at the secondary level. Average tenure also increased over the period from 6.2 to 6.5 years at the elementary level and from 6.0 to 6.5 years at the secondary level.

(5) Ontario teachers were excluded from this calculation, 1971-72 data being unavailable.

Le fait qu'une plus forte proportion du personnel enseignant a fait quatre années ou plus d'études postsecondaires se manifeste aussi dans la proportion d'enseignants détenteurs d'un grade universitaire. Cette dernière est passée de 52 % en 1971-72 à 61 % en 1973-74(5). L'augmentation a été plus marquée au niveau élémentaire, soit de 37 % à 48 %. Au secondaire, 79 % du personnel enseignant détenait un grade universitaire en 1971-72, contre 84 % en 1973-74.

La proportion grandissante du personnel enseignant détenteur d'un grade universitaire résulte à la fois du recrutement d'un personnel plus qualifié et du perfectionnement du personnel permanent. En 1973-74, 50 % des nouveaux enseignants au niveau élémentaire détenaient un grade contre 84 % au secondaire. Du nombre des enseignants permanents ne possédant pas de grades auparavant, 2.1 % ont obtenu leur premier grade en 1971-72 et 2.6 % en 1972-73. Du nombre des enseignants permanents déjà titulaires d'un ou de plusieurs grades universitaires, 1.4 % ont acquis d'autres grades en 1971-72 et 1.7 % en 1972-73. Les enseignants ont obtenu ces grades en suivant des cours d'été ou du soir ou des cours de l'extension tout en continuant d'enseigner à temps plein.

#### EXPÉRIENCE

La médiane de l'expérience dans l'enseignement pour l'ensemble du personnel était de 7.0 années pour l'année scolaire 1973-74 (la même qu'en 1972-73). Toutefois, elle a beaucoup varié d'une province à l'autre, s'échelonnant entre 6.0 années à Terre-Neuve et dans les Territoires du Nord-Ouest et 9.0 années en Saskatchewan.

En 1973-74, la médiane de l'expérience dans l'enseignement pour l'ensemble des enseignants au niveau élémentaire était de 7.0 années (7.2 pour les hommes et 7.0 pour les femmes), la même qu'en 1972-73. Au niveau secondaire, elle était de 7.7 années (8.0 pour les hommes et 6.0 pour les femmes).

Au cours des deux dernières années, le personnel enseignant a eu tendance à demeurer au service du conseil scolaire pour lequel il avait travaillé l'année précédente. En 1972-73, la médiane de ce genre d'expérience (service courant) était de 4.0 années aux deux niveaux d'enseignement. L'année suivante, la médiane du service courant pour l'ensemble s'est établie à 5.0 années, demeurant à 4.0 années au niveau élémentaire et passant à 5.0 années au secondaire. La moyenne du service courant a également augmenté au cours de cette période, passant de 6.2 à 6.5 années au niveau élémentaire et de 6.0 à 6.5 années au secondaire.

(5) Sans les enseignants de l'Ontario, les données de 1971-72 n'étant pas disponibles.

Between 1972-73 and 1973-74 the average experience increased 0.3 years at the elementary level (from 9.4 to 9.7) and 0.5 years at the secondary level (from 9.2 to 9.7). Over the same period the average years of post-secondary education increased 0.2 years at the elementary level (from 3.4 to 3.6) and 0.1 years at the secondary level (from 4.9 to 5.0).

The major cause of the recent increase in tenure is the declining rate of inter-board transfers, a drop from 2.6% in 1972-73 to 2.1% in 1973-74.(6)

#### SALARIES

In 1973-74, the median salary of staff was \$10,500 (\$9,704 at the elementary level and \$12,990 at the secondary level). These figures represent increases of 11% at the elementary level, 9% at the secondary level and 10% overall between 1972-73 and 1973-74.

Median salary increases reflect not only changes in collective agreements but also an upward redistribution of the experience and qualifications of the teaching force. Between 1972-73 and 1973-74 average experience increased 0.3 years at the elementary level (from 9.4 to 9.7) and 0.5 years at the secondary level (from 9.2 to 9.7). Over the same period the average years of post-secondary education increased 0.2 years at the elementary level (from 3.4 to 3.6) and 0.1 years at the secondary level (from 4.9 to 5.0).

An examination of staff having fewer than 13 years of experience(7) reveals an average increase of 0.3 years experience between 1972-73 and 1973-74. The number of teachers having 13 or more years of experience increased from 50,757 in 1972-73 to 52,117 in 1973-74. Thus the percentage increase in salaries cited above exaggerates the increases due to changes in the salary grids in teacher contracts.

#### OTHER DATA

Not all data used in the above analysis appear in the statistical tables which follow. For example, data pertaining specifically to new hirings or to continuing staff have been generated by province. Although not published here these data are available on request.

(6) A historical comparison prior to 1972-73 is not possible at this time due to changes in definition and method (see Limitations page 10).

(7) Salaries are typically not incremented after 10-12 years of experience.

Entre 1972-73 et 1973-74, la moyenne de l'expérience s'est accrue de 0.3 année au niveau élémentaire (de 9.4 à 9.7) et de 0.5 année au secondaire (de 9.2 à 9.7). Au cours de la même période, le nombre moyen d'années d'études postsecondaires a augmenté de 0.2 année au niveau élémentaire (de 3.4 à 3.6) et de 0.1 année au secondaire (de 4.9 à 5.0).

L'accroissement récent du nombre d'années de service courant s'explique principalement par la baisse du taux de mutations d'un conseil à l'autre, qui est tombé de 2.6 % en 1972-73 à 2.1 % en 1973-74(6).

#### TRAITEMENTS

En 1973-74, le traitement médian du personnel était de \$10,500 (\$9,704 au niveau élémentaire et \$12,990 au secondaire). Ces chiffres représentent des augmentations de 11 % au niveau élémentaire, de 9 % au secondaire et de 10 % dans l'ensemble entre 1972-73 et 1973-74.

La progression du traitement médian est attribuable non seulement à la négociation de nouvelles conventions collectives, mais aussi à une nouvelle répartition vers le haut de l'expérience et des qualifications du corps enseignant. Entre 1972-73 et 1973-74, la moyenne de l'expérience a augmenté de 0.3 année au niveau élémentaire (de 9.4 à 9.7) et de 0.5 année au secondaire (de 9.2 à 9.7). Au cours de la même période, le nombre moyen d'années d'études postsecondaires s'est accru de 0.2 année au niveau élémentaire (de 3.4 à 3.6) et de 0.1 année au secondaire (de 4.9 à 5.0).

En étudiant les données sur le personnel possédant moins de 13 années d'expérience(7), on observe une augmentation moyenne de 0.3 année entre 1972-73 et 1973-74. Le nombre d'enseignants possédant 13 années d'expérience ou plus s'est accru, passant de 50,757 en 1972-73 à 52,117 en 1973-74. Aussi, l'augmentation en pourcentage des traitements dont il est question plus haut constitue une surestimation des progressions, car les nouvelles échelles de traitement prévues dans les contrats des enseignants n'y sont pas prises en compte.

#### AUTRES DONNÉES

Les tableaux statistiques qui suivent ne présentent pas toutes les données utilisées aux fins de l'analyse qui précède. Par exemple, les données se rapportant en particulier aux nouveaux enseignants ou au personnel enseignant permanent ont été produites par province. Ces données ne sont pas publiées ici, mais on peut les obtenir sur demande.

(6) Il est actuellement impossible d'établir une comparaison chronologique antérieure à 1972-73, car des modifications ont été apportées aux définitions et aux méthodes (voir les Restrictions à la page 10).

(7) Aucune augmentation de traitement en raison de l'expérience n'est accordée après 10-12 années de service.

## PREFACE

Statistics Canada has published an annual report on the qualifications, salary and experience of teachers in public elementary and secondary schools since 1939, with the exception of 1950-51, 1951-52 and 1955-56. Basic data for these three years are contained in the historical tables of the 1970-71 and 1971-72 issue.

Compared with the 1970-71 and 1971-72 issue, the detail and number of statistical tables have been reduced in this publication. However, tables comparable to those produced in previous publications are available on request. In addition, a generalized data retrieval system is now available, allowing users a variety of detailed statistical tables on request.

This report was prepared in the Elementary-Secondary Education Section of the Education, Science and Culture Division by M. Meloche and J. Seidle. Technical assistance was provided by Arlene Tamarit and Josephine Stanic.

PETER G. KIRKHAM,  
Chief Statistician of Canada.

## PRÉFACE

Statistique Canada a publié, chaque année depuis 1939 (sauf pour les années scolaires 1950-51, 1951-52 et 1955-56), un bulletin sur les qualifications, le traitement et l'expérience des enseignants des écoles primaires et secondaires publiques. Les données de base pour les trois années exclues figurent dans les tableaux chronologiques du numéro de 1970-71 et 1971-72.

Les tableaux statistiques sont moins nombreux et moins détaillés dans la présente publication comparativement à celles des années 1970-71 et 1971-72. Vous pouvez vous procurer sur demande des tableaux semblables à ceux présentés dans les publications antérieures. De plus, un système généralisé d'extraction des données permet aux utilisateurs d'obtenir, sur demande, divers tableaux statistiques détaillés.

Ce bulletin a été rédigé par M. Meloche et J. Seidle de la Section de l'enseignement primaire et secondaire de la Division de l'éducation, des sciences et de la culture, avec la collaboration technique d'Arlene Tamarit et de Joséphine Stanic.

Le statisticien en chef du Canada,  
PETER G. KIRKHAM.

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

- - amount too small to be expressed.

<sup>p</sup> preliminary figures.

<sup>r</sup> revised figures.

<sup>x</sup> confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

<sup>p</sup> nombres provisoires.

<sup>r</sup> nombres rectifiés.

<sup>x</sup> confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### HIGHLIGHTS

- Total teaching staff in 1975-76 was 194,340 of which 123,174 were elementary and 71,166 were secondary (see page 33).
- Total teaching staff increased by 2% between 1974-75 and 1975-76 (see page 15).
- The national rate of retention of the teaching force in 1975-76 was 89%, compared with 85% in 1970-71 (see page 15).(1)
- The national recruitment rate of the teaching force in 1975-76 was 12%, compared with 17% in 1970-71 (see page 15).(1)
- The percentage of new hirings coming from post-secondary institutions decreased from 62% in 1965-66 to 54% in 1975-76 (see page 17).(1)
- An estimated 18,344 teachers were recruited in 1975-76 (see page 17).
- Median salary of all teaching staff in 1975-76 was \$14,004, an increase of 21% from 1974-75 (see page 25 for details by level).(1)
- Median age of teaching staff in 1975-76 was 32.7 years (see page 27).(1)
- Median years of teaching experience in 1975-76 was 8.0 (see page 26).(1)
- Fifty-seven per cent of the elementary teaching staff and 87% of the secondary teaching staff in 1975-76 reported having at least one degree (see page 26).(1)

(1) Excludes Ontario.

### POINTS SAILLANTS

- Le personnel enseignant se chiffrait au total à 194,340 personnes en 1975-76, dont 123,174 au niveau élémentaire et 71,166 au niveau secondaire (voir page 33).
- Le personnel enseignant, au total, a enregistré une augmentation de 2 % entre 1974-75 et 1975-76 (voir page 15).
- Le taux national de maintien de l'emploi du personnel enseignant a été de 89 % en 1975-76 par rapport à 85 % en 1970-71 (voir page 15)(1).
- Le taux national de recrutement du personnel enseignant a été de 12 % en 1975-76 par rapport à 17 % en 1970-71 (voir page 15)(1).
- Le pourcentage de nouveaux enseignants venant des établissements postsecondaires a enregistré une diminution, passant de 62 % en 1965-66 à 54 % en 1975-76 (voir page 17)(1).
- On estime à 18,344 le nombre d'enseignants recrutés en 1975-76 (voir page 17).
- Le traitement médian de tout le personnel enseignant était de \$14,004 en 1975-76, soit une augmentation de 21 % par rapport à 1974-75 (voir page 25 pour connaître les détails par niveau)(1).
- L'âge médian du personnel enseignant était de 32.7 ans en 1975-76 (voir page 27)(1).
- L'expérience médiane des enseignants était de 8.0 (voir page 26)(1).
- En 1975-76, 57 % du personnel enseignant au niveau élémentaire et 87 % du personnel enseignant au niveau secondaire ont déclaré qu'ils détenaient au moins un diplôme (voir page 26).

(1) Sans l'Ontario.

## INTRODUCTION

This issue of the publication highlights what is becoming one of the most important subjects in education, the movement of teachers into and out of the profession at a time when enrolments are declining at a rapid rate. The enrolment declines began in 1971-72, decreasing 5% by 1975-76. During the same period, the total number of teachers employed in public education increased slightly each year, except for a decline in 1973-74.

In addition to the analysis of the teacher movement, the following topics have been addressed as they relate to new hirings to the teaching force:(1)

1. The following sources for new hirings were examined:
  - (a) universities or other post-secondary institutions,
  - (b) household responsibilities,
  - (c) occupations other than teaching.
2. Both new recruits and returning teachers were studied according to the position into which they were hired and according to the size of school to which they were assigned.
3. Years of education approved for salary purposes were examined by teaching level and by years of teaching experience.
4. The age distribution of the new hirings was examined by teaching experience and whether or not these teachers held one or more degrees.
5. Teaching assignment was compared with the major university specialty in an attempt to measure the suitability of the teacher to the subject area taught.

### Scope of Data

The school years 1974-75 and 1975-76 are covered in this publication. Detailed statistical tables comparable to those produced in previous publications are available on request.

- (1) New hirings are defined as teachers who were not teaching in the previous year. This includes new recruits (no previous teaching experience) and returning teachers (with previous teaching experience).

Le présent numéro fait ressortir l'une des questions en voie de devenir la plus importante dans le domaine de l'éducation, c'est-à-dire la mobilité des enseignants à une époque où les effectifs diminuent rapidement. C'est en 1971-72 que les effectifs ont commencé à diminuer; en 1975-76, ils avaient diminués de 5 %. Au cours de la même période, le nombre total d'enseignants a augmenté chaque année, sauf en 1973-74.

En plus de l'analyse de la mobilité des enseignants, nous nous sommes intéressés aux questions suivantes puisqu'elles ont trait aux nouveaux enseignants(1):

1. On a étudié d'où venaient ces nouveaux enseignants:
  - a) étudiants d'universités ou d'autres établissements de niveau postsecondaire,
  - b) personnes demeurant au foyer,
  - c) personne exerçant une autre profession dans un domaine différent de l'enseignement.
2. On a effectué une étude sur les nouvelles recrues et sur les enseignants qui recommencent à enseigner selon la fonction exercée lorsqu'ils ont été engagés et selon la taille de l'établissement où ils ont été nommés.
3. On a étudié la question du nombre d'années reconnues aux fins de calcul de la rémunération selon le niveau d'enseignement et le nombre d'années d'expérience dans l'enseignement.
4. La répartition par âge des nouveaux enseignants a été étudiée en fonction de l'expérience dans l'enseignement et du nombre de diplômes détenus par l'enseignant (un ou plusieurs).
5. On a établi un rapport entre la charge d'enseignement confiée à l'enseignant et son principal domaine de spécialisation de façon à déterminer s'il possède les compétences nécessaires à l'enseignement de la discipline en question.

### Champ d'application des données

La présente publication porte sur les années scolaires 1974-75 et 1975-76. On peut se procurer, sur demande, des tableaux statistiques détaillés semblables à ceux contenus dans les publications antérieures.

- (1) Les nouveaux enseignants sont les personnes qui n'enseignaient pas au cours de l'année précédente. Cette catégorie comprend les nouvelles recrues (personnes ne possédant aucune expérience dans l'enseignement) et les enseignants qui reviennent à l'enseignement (personnes possédant déjà de l'expérience dans l'enseignement).

This survey includes all full-time school instructional, supervisory and administrative personnel and board staff instructing in schools at the beginning of the school years 1974-75 and 1975-76.(2) Excluded from this report are all part-time educators and supervisory and consultant personnel in the departments of education and local board offices (for example, superintendents, directors, supervisors, psychologists, social workers and others involved in pupil-personnel services or non-teaching activities). Each educator is counted once only even if more than one position is held. Figures appearing in this publication may differ from those published by provincial departments of education. These differences are, for the most part, due to variations in the definition of the educator population.

The survey excludes educators employed in private schools and those in special education schools operated directly by provincial governments. Educators identified as "unclassified" in some of the statistical tables are those who completed a questionnaire but failed to report one or more items under consideration.

#### Method

All provinces with the exception of Quebec were surveyed for this publication. The survey forms were then processed by either provincial departments of education or by Statistics Canada.

#### Definitions

In this publication, the term educator includes teachers, principals, vice-principals, department heads and supervisors. (The term administrator refers to all principals, vice-principals and department heads and the term teacher refers to all other educators.)

Public schools are those schools which are operated by local school boards and which are supported by local taxation and supplemented by provincial grants in accordance with the education acts of the provinces or territories in which they are located. Included under this definition are the denominational schools of Newfoundland and the Protestant and Roman Catholic Separate schools where such exist. Schools located on Department of National Defence bases across Canada are also included since they operate within the framework of the public schools of the provinces in which they are located.

(2) Ontario educators were surveyed in the spring of each school year.

L'enquête vise tous les enseignants, surveillants et administrateurs à temps plein ainsi que le personnel des conseils scolaires qui travaillaient dans les écoles au début des années scolaires 1974-75 et 1975-76(2). Sont exclus le personnel d'enseignement à temps partiel, les surveillants et les conseillers des ministères de l'Éducation et des bureaux des conseils scolaires (par exemple, les surintendants, les directeurs, les surveillants, les psychologues, les travailleurs sociaux et les personnes chargées des services aux élèves et d'activités autres que l'enseignement). Chaque personne n'est comptée qu'une fois même si elle occupe plus d'un poste. Les chiffres figurant dans ce bulletin peuvent être différents de ceux publiés par les ministères provinciaux de l'Éducation. Ces différences s'expliquent surtout par le fait que la définition de "personnel d'enseignement" n'est pas la même.

L'enquête ne vise pas le personnel d'enseignement des écoles privées ni celui des écoles spéciales qui relèvent directement des administrations provinciales. Le personnel classé dans la catégorie "non déclaré" dans certains tableaux statistiques est celui qui a rempli un questionnaire, mais a omis de répondre à une ou plusieurs questions à l'étude.

#### Méthode

Toutes les provinces, sauf le Québec ont participé à l'enquête aux fins de la présente publication. Les déclarations ont ensuite été dépouillées soit par les ministères provinciaux de l'Éducation ou par Statistique Canada.

#### Définitions

Aux fins de la présente publication, l'expression personnel d'enseignement désigne les enseignants, les directeurs, les sous-directeurs, les chefs de département et les surveillants. (Le terme administrateur désigne tous les directeurs, sous-directeurs et chefs de département et le terme enseignant, tous les autres membres du personnel.)

Les écoles publiques sont toutes celles qui relèvent des conseils scolaires locaux et qui sont financées par les impôts locaux auxquels viennent s'ajouter des subventions provinciales en vertu de la Loi sur l'éducation de la province ou du territoire dans lequel ces écoles sont situées. Ce terme désigne également les écoles confessionnelles de Terre-Neuve et les écoles protestantes et catholiques romaines séparées; les écoles situées dans les bases militaires du ministère de la Défense nationale au Canada font également partie de cette catégorie puisqu'elles sont considérées au même titre que les écoles publiques des provinces.

(2) Le personnel d'enseignement de l'Ontario fait l'objet d'une enquête au printemps de chaque année scolaire.

Teaching level - Educators are classified as elementary or secondary according to the grade levels they teach and/or supervise.

For statistical purposes the following definitions were used to arrive at "teaching level":

- (a) An educator who teaches or supervises any grade or combination of grades from pre-Grade 1 through Grade 8 but no grades above 8, is classified as "elementary". (In British Columbia read Grade 7 in place of Grade 8.)
- (b) An educator who teaches or supervises any grade or combination of Grades 9 through 13 but no grade below 9, is classified as "secondary". (In British Columbia read Grade 8 in place of Grade 9.)

The above criteria do not apply to a number of educators. Some did not answer the appropriate question while others teach or supervise at both levels. In these cases, an arbitrary assignment of teaching level was made based on the following criterion:

- (c) If an educator was assigned to a specific school, the level of the school was assumed to be the level of teaching. For example, a school offering Grades 1-10 is defined as elementary while a school offering Grades 7-12 is defined as secondary.

The above criteria provide for historical continuity. In the past, due to a lack of additional data, educators who did not meet the above criteria were assigned the secondary level if teaching in more than one school, otherwise they were classified as elementary. More precise data now being available, the following criteria have been introduced:

- (d) If the question requesting the per cent of time teaching or supervising Grades 1-8 and/or 9-13 was answered, the level of the higher percentage was assigned.
- (e) If the information noted in (d) above was not available but the specific grades taught and/or supervised were reported, the level was assigned according to the level of the majority of grades.

If none of the above conditions were met, the educator was assigned the elementary level.

Niveau (d'enseignement) - Le personnel d'enseignement est considéré comme travaillant au niveau élémentaire ou secondaire selon les classes auxquelles il enseigne et (ou) qu'il surveille.

Aux fins de la statistique, voici le détail de la définition du terme "niveau d'enseignement":

- a) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes du pré-élémentaire à la 8ième année, mais non dans les classes supérieures à la 8ième année, est classé au niveau "élémentaire". (Dans le cas de la Colombie-Britannique il s'agira de la "7ième année" au lieu de "8ième année".)
- b) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes de la 9ième à la 13ième année, mais non dans les classes inférieures à la 9ième année, est classé au niveau "secondaire". (Dans le cas de la Colombie-Britannique c'est la "8ième année" au lieu de "9ième année".)

Certains membres du personnel d'enseignement n'entrent pas dans ces catégories parce qu'ils n'ont pas répondu à la question pertinente ou parce qu'ils enseignent ou surveillent dans des classes aux deux niveaux. Dans ces cas, on a déterminé le niveau d'enseignement de façon arbitraire en se fondant sur le critère suivant:

- c) Si un membre du personnel d'enseignement est affecté à une école particulière, on suppose que le niveau de l'école est le niveau d'enseignement de la personne. Par exemple, une école qui offre des cours de la 1<sup>re</sup> à la 10ième année est une école élémentaire et celle qui dispense des cours de la 7ième à la 12ième année est une école secondaire.

Ces critères permettent une certaine continuité dans le temps. Dans le passé, en raison d'un manque de données, le personnel qui ne répondait pas aux critères ci-dessus était classé au niveau secondaire s'il travaillait dans plus d'une école; autrement, on le considérait comme étant au niveau élémentaire. Comme nous disposons actuellement de données plus précises, nous avons établi les critères suivants:

- d) Si l'enquête a répondu à la question relative au pourcentage de temps consacré à l'enseignement ou à la surveillance de la 1<sup>re</sup> à la 8ième année et (ou) de la 9ième à la 13ième année, on lui a attribué le niveau correspondant au pourcentage le plus élevé.
- e) Si l'enquête n'a pas fourni les renseignements dont il est question en d) ci-dessus, mais qu'il a déclaré les classes dans lesquelles il enseignait et (ou) surveillait, on lui a attribué le niveau correspondant à la majorité des classes.

Si l'enseignant ne répondait à aucune des conditions mentionnées, on le classait au niveau élémentaire.

Tenure is defined as the number of years of experience with the present school board, which may or may not be continuous.

Years of education approved for salary purposes (years of post-secondary education) — The number of years of education approved for salary purposes is defined as the number of years of education beyond the equivalent of the junior matriculation level recognized for salary placement purposes. In the Atlantic provinces the certification schemes perform this function while in Ontario and the Western provinces specific questions were asked to provide this information. Every teacher was assigned a numerical value which gives the number of years of education beyond secondary school graduation recognized for salary or grant purposes.

#### Methods of Calculation

Salary — Respondents were requested to report their annual contract salary to the nearest dollar as of the date of completion of the questionnaire. Median and percentile salaries were calculated on these reported salaries based on intervals of \$10. Educators not reporting salaries were excluded from the calculations.

Age — The questionnaire requested the date of birth of each respondent. In the tables of this report, age is calculated as of December 31 of the year under review. For example, age data collected for the 1975-76 school year is calculated as of December 31, 1975.

Experience — Experience is calculated on the basis of 10 months equalling one school year. For example, 7-8 indicates seven years and eight months and is synonymous with 7.8 years. All experience is considered as of June 30 of the previous school year. For example, the number of years of experience reported by teachers in the 1975-76 school year is as of June 30, 1975.

Years since award of first and highest degree — Information was requested on the year in which the first and highest degrees were obtained. As with age, the number of years since the awarding of first and highest degree is based on the calendar year under review.

Le terme états de service (service courant) désigne le nombre d'années d'expérience dans l'enseignement au sein du conseil scolaire actuel, que le service soit continu ou non.

Années de scolarité reconnues aux fins de calcul de la rémunération (années de formation au niveau postsecondaire) — Ce terme désigne les années d'études, au-delà de l'équivalent de l'immatriculation junior, reconnues aux fins de l'établissement des traitements. Dans les provinces de l'Atlantique, c'est le régime de brevets qui joue ce rôle, tandis qu'en Ontario et dans les provinces de l'Ouest, on a dû poser des questions précises en vue d'obtenir ces renseignements. On a attribué à chaque personne une valeur numérique indiquant le nombre d'années de scolarité, au-delà du cycle secondaire, reconnues aux fins de l'établissement des traitements ou des subventions.

#### Méthodes de calcul

Traitement — On a demandé aux enquêtés de déclarer leur traitement annuel au dollar près à la date à laquelle ils ont rempli le questionnaire. Les traitements médians et ceux de chaque percentile ont été calculés, en fonction des traitements déclarés, par intervalles de \$10. Le personnel qui n'a pas déclaré son traitement a été exclu des calculs.

Âge — Chaque enquêté devait déclarer sa date de naissance. Dans les tableaux de la présente publication, l'âge est calculé au 31 décembre de l'année à l'étude. Ainsi, les données sur l'âge recueillies pour l'année scolaire 1975-76 sont calculées au 31 décembre 1975.

Expérience — L'expérience est calculée en fonction d'une période d'enseignement de 10 mois correspondant à une année scolaire. Par exemple, 7-8 signifie sept ans et huit mois et est synonyme de 7.8 années. Toute expérience est relevée au 30 juin de l'année scolaire précédente. Ainsi, le nombre d'année d'expérience déclaré par le personnel pour l'année scolaire 1975-76 est compté au 30 juin 1975.

Années écoulées depuis l'obtention du premier grade et du grade le plus élevé — On a demandé des renseignements au sujet de l'année de l'obtention du premier grade et du grade le plus élevé. Comme dans le cas de l'âge, le nombre d'année écoulées depuis l'obtention du premier grade et du grade le plus élevé est calculé en fonction de l'année civile en question.

## Limitations

Several salary contracts were still unresolved when the questionnaires were completed and a number of contracts were negotiated retroactively covering periods of one to two years.(3) Caution must therefore be exercised when making interprovincial and historical comparisons. In addition, it should be recognized that variations in median salary do not necessarily indicate variations in the salary schedules on which educators were paid. Since salaries are based on both years of training and years of teaching, changes in the distribution of either of these two factors could cause an increase in the median salary while the salary scale remained unchanged.

The classification of teaching level has been arbitrarily established and as such does not correspond to all provincial definitions. Furthermore, the proportion of educators with teaching assignments covering both the elementary and secondary levels of education varies widely from one province to another. Therefore, caution must be exercised when making interprovincial comparisons.

The present classification was established in 1968-69, rendering invalid any historical comparisons prior to that school year. (See publications prior to 1968-69 for exact definitions previously in use.) For most provinces, the change in definition resulted in an increase in the proportion of teachers classified as "elementary".

Prior to 1970-71, educators in schools operated by the Department of Indian and Northern Affairs in Arctic Quebec were included with those of the Northwest Territories. Since 1970-71, educators in Arctic Quebec have been excluded from the publication.

Information on the Northwest Territories for 1975-76 was incomplete at the time the present issue was being prepared. As a result, 25 educators assigned to the elementary level in all statistical tables should appear in the secondary level. The total number of educators remains unchanged at 651.

(3) Ontario salaries in 1974-75 were at the rate effective in May 1975. In 1975-76 the effective date was September 1975, reflecting, for the most part, the same contracts.

## Restrictions

Plusieurs échelles de traitements contractuels étaient encore indéterminées au moment où les enquêtes ont rempli les questionnaires et un certain nombre de conventions ont été négociées avec un effet rétroactif de un à deux ans(3). Il faut donc être prudent lorsqu'il s'agit d'établir des comparaisons d'une province à l'autre et d'une période à l'autre. De plus, il y a lieu de signaler que les variations du traitement médian ne signifient pas nécessairement que les échelles de traitement du personnel d'enseignement ont fluctué. Comme les traitements sont fondés à la fois sur les années d'études et les années d'expérience dans l'enseignement, des variations au chapitre de l'un ou l'autre de ces deux facteurs pourraient entraîner un relèvement du traitement médian, tandis que l'échelle de traitement demeurerait la même.

La classification selon le niveau d'enseignement a été déterminée de façon arbitraire et, en tant que telle, ne correspond pas aux définitions en usage dans toutes les provinces. De plus, la proportion du personnel d'enseignement dont les fonctions chevauchent les niveaux élémentaire et secondaire varie beaucoup d'une province à l'autre. Il faut donc, ici encore, être prudent lorsqu'il s'agit d'établir des comparaisons interprovinciales.

La classification actuelle a été établie en 1968-69; ainsi, il n'est possible de faire des comparaisons historiques qu'auprès de cette année scolaire. (Voir les publications antérieures à 1968-69 pour connaître les définitions précédemment utilisées.) La modification de la définition a engendré, dans la plupart des provinces, une augmentation de la proportion du personnel classé au niveau "élémentaire".

Avant 1970-71, le personnel d'enseignement qui travaillait dans les écoles de l'Arctique québécois relevant du ministère des Affaires indiennes et du Nord était compris avec celui des Territoires du Nord-Ouest. Depuis 1970-71, il n'est plus visé par l'enquête.

Au moment de la préparation de cette publication, on ne disposait pas des données complètes pour les Territoires du Nord-Ouest. Par suite, en 1975-76 on a classé au niveau élémentaire, dans tous les tableaux statistiques, 25 enseignants qui auraient dû figurer au niveau secondaire. Le nombre total d'enseignants demeure le même, soit 651.

(3) En 1974-75, les traitements des enseignants de l'Ontario se fondaient sur l'échelle en vigueur en mai 1975. En 1975-76, sur l'échelle en vigueur en septembre 1975, ce qui représentait pour la plupart les mêmes contrats.

ANALYSIS OF RETENTION, RECRUITMENT  
AND LOSSES(1)

During the 1960's and early 1970's, the total number of teachers (excluding Quebec) increased substantially from 139,178 in 1965-66 to 184,124 in 1971-72. A small increase in the number of teachers in 1972-73 was followed by a reduction in the 1973-74 school year. Subsequent increases of approximately 2% occurred in 1974-75 and 1975-76.

While the total teaching staff in any given year is of prime importance to qualified teachers wishing to enter the teaching force, the number of vacancies available is a function of the retention and losses of staff relative to the previous year. These factors are considered in the analysis below.

The national retention rate in 1975-76 was 89% (changed from 85% in both 1965-66 and 1970-71). For the three reference years, British Columbia experienced the smallest change in rate (87% to 88% to 89%), while Newfoundland recorded the largest change (74% to 79% to 88%). The significant increase in the national retention rate reduced considerably the opportunity for qualified teachers to either re-enter the profession or to enter it for the first time. The reason for the increase in retention rates may well reflect the concern of practicing teachers for re-employment should they leave the profession at this time.

In determining recruitment rates, new hirings and interprovincial and international transfers have been aggregated and compared to the number of teachers in the previous year.

The national recruitment rate in 1975-76 was 12% (changed from 19% in 1965-66 and

(1) The following provinces were excluded from the analysis due to the unavailability of appropriate data: Saskatchewan for 1965-66 rates of retention, recruitment and losses; Ontario in 1970-71 for source of hiring "from another province or country" and Ontario in 1975-76, for which 1974-75 data were substituted. Ontario figures were not used in the analysis of retention, recruitment and losses for 1965-66 to 1975-76. Table A summarizes the following analysis for the years 1965-66, 1970-71 and 1975-76.

ANALYSE DES FACTEURS: MAINTIEN DE L'EMPLOI,  
RECRUTEMENT ET DÉPARTS(1)

Au cours des années 60 et au début des années 70, le nombre total d'enseignants (à l'exclusion du Québec) a augmenté de façon considérable, passant de 139,178 en 1965-66 à 184,124 en 1971-72. En 1972-73, on enregistrait une légère augmentation du nombre d'enseignants qui devait être suivie d'une diminution au cours de l'année scolaire suivante (1973-74). En 1974-75 et 1975-76, les augmentations du nombre d'enseignants ont été de 2 %.

Bien que le nombre total d'enseignants pour une année donnée soit de toute première importance pour les enseignants qualifiés désirant joindre le corps enseignant, le nombre de postes vacants, lui, dépend des taux de maintien de l'emploi et de départs enregistrés d'une année à l'autre. L'analyse ci-dessous présente une étude de ces facteurs.

En 1975-76, le taux de maintien de l'emploi au Canada se situait à 89 % (comparativement à 85 % en 1965-66 et en 1970-71). Au cours des trois années observées, la Colombie-Britannique a connu la plus faible variation du taux, soit (de 87 % à 88 % à 89 %), alors que Terre-Neuve a enregistré la plus forte variation (de 74 % à 79 % à 88 %). Cet accroissement important du taux de maintien de l'emploi réduit considérablement les possibilités des enseignants qualifiés qui désirent soit revenir enseigner ou faire leurs débuts dans ce domaine. Cette augmentation du taux de maintien de l'emploi pourrait bien traduire la crainte qu'ont les enseignants en fonction de ne plus être réengagés si jamais ils abandonnaient l'enseignement maintenant.

Lors du calcul des taux de recrutement, on a totalisé le nombre de nouveaux enseignants et le nombre de transferts interprovinciaux et internationaux et on les a comparé à ceux de l'année précédente.

En 1975-76, le taux de recrutement au Canada a été de 12 % (par rapport à 19 % en 1965-66 et à

(1) Les provinces suivantes ne font pas partie de l'analyse car elles ne disposaient pas des données appropriées: la Saskatchewan ne disposait pas pour l'année 1965-66 des taux de maintien de l'emploi, de recrutement et de départs; l'Ontario ne disposait pas pour 1970-71 des données sur les nouveaux enseignants venant d'une autre province ou d'un autre pays; pour 1975-76, les données de l'Ontario sont celles de 1974-75. De 1965-66 à 1975-76, on n'a pas tenu compte des données de l'Ontario pour l'analyse des taux de l'emploi, de recrutement et de départs. Le tableau A présente un sommaire de l'analyse suivante pour les années 1965-66, 1970-71 et 1975-76.

17% in 1970-71), with British Columbia having the highest rate (14%) and Nova Scotia the lowest (9%). (2) Prince Edward Island experienced the lowest rate of change over the period (from 18% in 1965-66 to 17% in 1970-71 to 13% in 1975-76), while Newfoundland had the highest rate of change (from 30% to 23% to 13%).

(2) These rates are a direct result of enrolment change. Alberta's enrolment increased by 2% from 1974-75, while Nova Scotia's enrolment decreased by 1%.

17 % en 1970-71). La Colombie-Britannique a enregistré le taux le plus élevé (14 %) et la Nouvelle-Écosse le plus faible (9 %)(2). C'est l'île-du-Prince-Édouard qui a connu la plus faible variation du taux au cours de cette période (soit de 18 % en 1965-66 à 17 % en 1970-71 pour tomber à 13 % en 1975-76), alors que Terre-Neuve enregistrait les plus fortes variations (de 30 % à 23 % pour passer à 13 %).

(2) Ces taux traduisent les variations de l'effectif. En effet, l'effectif de l'Alberta a diminué de 2 % par rapport à 1974-75 et celui de la Nouvelle-Écosse de 1 %.

TABLE A. Rates of Retention and Recruitment of Teachers, 1965-66, 1970-71 and 1975-76

TABEAU A. Taux de maintien de l'emploi et de recrutement des enseignants, 1965-66, 1970-71 et 1975-76

(1) The national rates of retention and recruitment exclude Ontario for 1965-66 to 1975-76. The retention and recruitment rates for Ontario in 1965-66 were 89% and 17% respectively and 86% and 16% in 1970-71. Similar but not completely comparable figures for retention and recruitment are available in Education Statistics, 1975, Ontario Ministry of Education. — Les taux de maintien de l'emploi et de recrutement du Canada ne comprennent pas les données de l'Ontario pour la période de 1965-66 à 1975-76. En 1965-66, les taux de maintien de l'emploi et de recrutement en Ontario étaient respectivement de 89 % et 17 % et en 1970-71 de 86 % et 16 %. Le bulletin du ministère de l'Éducation de l'Ontario intitulé: Education Statistics, 1975 présente des données similaires mais qui ne sont pas entièrement comparables.

While recruitment rates are important indicators of the nature of movement in the teaching force, the actual numbers are of equal importance. In 1975-76, there were an estimated 20,335 teachers recruited (new hirings and teachers transferring from another province or country) in Canada. This compares with 29,108 in 1970-71 and 22,247 in 1965-66.

While the number of teachers recruited has declined over the past few years, the sources have remained in the same order; namely, universities and teacher colleges, other occupations or duties such as household responsibilities and another province or country. However, the proportions have changed. In 1965-66, for example, 62% came from universities or other post-secondary institutions, 11% came from another province or country and the remaining 27% came from other occupations or duties.

Between 1965-66 and 1975-76 there was a drop of eight percentage points in the proportion supplied by universities and an increase of two percentage points in the number of interprovincial and international transfers, while the percentage of teachers recruited from other sources (household duties, occupations other than teaching, etc.) increased by five points.

In 1975-76, there were an estimated 18,344 new hirings (see footnote 1, Introduction) in Canada;(3) 12,495 new hirings occurred at the elementary level and 5,849 (32%) at the secondary level. This figure excludes interprovincial and international transfers who were teaching the previous year.

In both 1972-73 and 1975-76, approximately two thirds of these new hirings were employed at the elementary level (64% and 68% respectively).(4)

While less than one half (49%) of the elementary teachers in 1972-73 were attending universities or other post-secondary institutions the previous year, this figure was 62% at the secondary level. By 1975-76, the elementary proportion had increased to 52% and the secondary had decreased to 60%.

Bien que les taux de recrutement soient des indicateurs importants de l'évolution du corps enseignant, les nombres réels ou chiffres absolus ont tout autant d'importance. En 1975-76, on estime à 20,335 le nombre d'enseignants recrutés (nouveaux enseignants et enseignants venant d'une autre province ou d'un autre pays) au Canada par rapport à 29,108 en 1970-71 et à 22,247 en 1965-66.

Bien que le nombre d'enseignants recrutés ait diminué au cours des dernières années, on constate que leur provenance conserve le même ordre qu'auparavant, c'est-à-dire: étudiants d'universités ou d'écoles normales, personnes ayant exercé une autre profession ou rempli d'autres fonctions (responsabilités au foyer) et personnes venant d'une autre province ou d'un autre pays. Toutefois, les proportions ont varié. Par exemple, en 1965-66, 62 % des nouveaux enseignants venaient des universités ou d'autres établissements postsecondaires, 11 % d'une autre province ou d'un autre pays et les 27 % restant avaient exercé d'autres professions ou rempli d'autres fonctions.

Entre 1965-66 et 1975-76, la proportion d'enseignants venant des universités a diminué de huit points de pourcentage, les transferts d'enseignants au niveau interprovincial et international ont augmenté des deux points de pourcentage, alors que le pourcentage d'enseignants recrutés ailleurs (personnes demeurant au foyer ou ayant une autre profession que l'enseignement) a augmenté de cinq points.

En 1975-76, on estime à 18,344 le nombre de nouveaux enseignants (voir la note 1, Introduction) au Canada(3), dont 12,495 au niveau élémentaire et 5,849 (32 %) au niveau secondaire. Ce chiffre ne comprend pas les enseignants d'une autre province ou d'un autre pays qui enseignaient au cours de l'année précédente.

En 1972-73 et en 1975-76, environ deux tiers de ces nouveaux enseignants travaillaient au niveau élémentaire (respectivement 64 % et 68 %)(4).

On constate en 1972-73 que moins de la moitié (49 %) des nouveaux enseignants à l'élémentaire fréquentait une université ou un établissement postsecondaire au cours de l'année précédente, alors qu'au secondaire ce pourcentage atteignait 62 %. En 1975-76, ce même pourcentage avait atteint 52 % à l'élémentaire et fléchi à 60 % au niveau secondaire.

(3) This number assumes the same rate for Ontario in 1975-76 as in 1974-75.

(4) Data for 1972-73 and 1975-76 only were analyzed because individual teacher characteristics were not available prior to 1972-73.

(3) On a supposé que l'Ontario a enregistré le même taux en 1975-76 qu'en 1974-75.

(4) L'analyse ne porte que sur les données de 1972-73 et de 1975-76 puisqu'avant 1972-73 on ne disposait pas des caractéristiques personnelles des enseignants.

## ANALYSIS OF NEW HIRINGS

New hirings can be divided into two categories:

- (a) new recruits with no previous teaching experience, and
- (b) returning teachers with previous teaching experience.

The analyses which follow provide separate descriptions of the two categories of new hirings.

### Teaching Position

Classroom teachers accounted for 87% (15,917) of the 18,344 positions filled in the 1975-76 school year. An additional 9% (1,569) of the new hirings were employed to teach at the board level or as other school instructional staff. The remaining 4% were made up of relief, supply or itinerant teachers and those who did not report their teaching position.

Teachers with no previous teaching experience comprised 50% of the new classroom teachers at the elementary level and 60% at the secondary level.

At the elementary level, hirings by size of school were almost identical to the distribution of total staff by size of school. However, at the secondary level, schools with fewer than 700 students employed 38% of the new secondary teachers while only 30% of all teachers were employed in schools of this size. (Further detail is provided in Table B.)

### Years of Post-secondary Education

At the elementary level, new recruits without experience had significantly more university training than those who returned to the teaching force. However, the proportions of those who were highly qualified (six or more years of post-secondary instruction) were the same for teachers with and without experience.

At the secondary level, the proportions of new hirings having four or more years of post-secondary education were slightly higher for new recruits to the profession, a larger proportion of returning teachers was highly qualified, 37% having six or more years of university training compared to 30% for beginning teachers.

## ANALYSE DES NOUVEAUX ENSEIGNANTS

Les nouveaux enseignants se divisent en deux catégories, soit:

- a) les nouvelles recrues sans expérience dans l'enseignement, et
- b) les enseignants possédant de l'expérience qui reviennent dans l'enseignement.

L'analyse qui suit, présente séparément une description de chacune de ces deux catégories de nouveaux enseignants.

### Caractéristiques de l'effectif

Les chargés de classe représentaient 87 % (15,917) des 18,344 postes occupés en 1975-76, 9 % enseignaient au niveau des conseils scolaires ou faisaient partie du personnel enseignant d'une autre école, 4 % restant se composaient de remplaçants (à long terme) suppléants ou d'enseignants itinérants et de ceux qui n'ont pas déclaré la nature de leur poste.

Les enseignants sans aucune expérience dans l'enseignement intervenaient pour 50 % des nouveaux chargés de classe au niveau élémentaire et pour 60 % au niveau secondaire.

Au niveau élémentaire, la répartition des nouveaux enseignants selon la taille de l'établissement était à peu près identique à celle du personnel total classé selon le même critère. Toutefois, au niveau secondaire, on constate que les écoles de moins de 700 étudiants avaient à leur service 38 % des nouveaux professeurs du secondaire, alors que seulement 30 % de tous les enseignants travaillent dans des établissements de cette taille. (Le tableau B donne plus de détails à ce sujet.)

### Années d'études au niveau postsecondaire

Au niveau élémentaire, les nouvelles recrues sans expérience avaient une formation universitaire plus poussée que les enseignants qui recommençaient à enseigner. Toutefois, on remarque que le pourcentage d'enseignants qui possédait une formation supérieure (c'est-à-dire six années ou plus de formation au niveau postsecondaire) était le même pour les enseignants avec ou sans expérience.

Au niveau secondaire, les proportions de nouveaux enseignants possédant une formation postsecondaire de quatre années ou plus étaient légèrement plus élevées chez les nouvelles recrues que chez les enseignants qui recommençaient à enseigner, on remarque, toutefois, que dans cette dernière catégorie il y avait plus d'enseignants qui possédaient une formation supérieure, (formation universitaire de six années ou plus) soit 37 % contre 30 % pour les enseignants débutants.

TABLE B. Percentage of New Hirings and Total Teaching Staff by School Enrolment, 1975-76

TABLEAU B. Pourcentage des nouveaux enseignants et pourcentage par rapport à tout le personnel enseignant selon la taille de l'établissement, 1975-76

| 700-1,199 .....                              | 32  | 35  |
| 1,200 and over — et plus .....               | 30  | 34  |
| Board instructional — Conseil scolaire ..... | --  | 1   |
| Total .....                                  | 100   | 100   |

Four or more years of education was chosen for the above analysis because normally a bachelors degree requires four years of post-secondary education. However, there are some exceptions, the most important being that three years of post-secondary education plus a professional year of training normally do not fulfill degree requirements and some degree programs require five years. The tables below reflect these small differences.

Dans l'analyse ci-dessus nous avons mis l'accent sur des études postsecondaires, de quatre années ou plus puisqu'il faut habituellement quatre années d'études postsecondaires pour obtenir un baccalauréat. Il y a, toutefois, des exceptions, dont la plus importante est le fait que trois années d'études postsecondaires plus une année de formation professionnelle ne satisfont habituellement pas aux exigences d'obtention du diplôme; certains programmes menant à un grade universitaire ont une durée de cinq ans.

### Experience and Age

Experience, in addition to university training, is recognized as a prime determinant of teacher qualifications. While the total teaching staff averaged 10.5 years of teaching experience, the staff returning to the profession averaged 7.5 years with no appreciable difference being recorded by level. (See Table C for further detail.)

### Expérience et âge

En plus de la formation universitaire, l'expérience constitue également un facteur de toute première importance au titre des qualifications des enseignants. Dans le tableau suivant on constate que l'ensemble du personnel enseignant possède en moyenne 10.5 années d'expérience dans l'enseignement et que le personnel qui recommence à enseigner en possède 7.5; il n'y a toutefois aucune différence marquée entre les niveaux. (Le tableau C donne plus de détails.)

TABLE C. Average Years of Experience of Teachers, 1975-76

(1) Ontario data are for 1974-75. - Les données sur l'Ontario portent sur l'année 1974-75.

In 1975-76, 91% of the new recruits (no previous teaching experience) were under 30 years of age, compared with 38% for the total teaching force in that year. Seven per cent were between 30 and 50 years of age (compared with 49% for all teachers).

En 1975-76, il y avait 91 % des nouvelles recrues (ne possédant aucune expérience antérieure dans l'enseignement) qui avaient moins de trente ans par rapport à 38 % pour l'ensemble du personnel enseignant au cours de la même année. Il y en avait 7 % entre 30 et 50 ans (par rapport à 49 % pour tous les enseignants).

Of the new recruits under 30 years of age at the elementary level, 75% had one or more degrees, while the comparable figure at the secondary level was 90%. These figures for teachers between 30 and 50 were 59% and 61% respectively.

Returning teachers (with previous teaching experience) demonstrate a different age pattern from new recruits. Forty-three per cent were under 30 years of age in 1975-76; 49% were between 30 and 50. Of returning teachers under 30, 52% had one or more degrees at the elementary level, compared to 89% at the secondary level. Comparable figures for the 30-50-year age group were 46% and 83% respectively.

#### University Specialty and Subject Taught, Secondary Level

While experience and years of post-secondary education are important factors to consider in analyzing the suitability of new hirings to their assignments, a third factor is the degree to which university specialization matches subject taught. The analysis below considers this latter measure for new hirings at the secondary level by comparing two variables; subject in which the teacher has primary teaching responsibility and major university specialty.

Of the new staff at the secondary level, 14% were hired to teach science as their primary subject, 13% to teach English, 9% to teach mathematics and 9% to teach physical education. Of the teachers hired to teach these subjects, 43%, 56%, 59% and 65% respectively reported the same subject as their major university specialty. Additional detail is provided in Table D.

Parmi les nouvelles recrues de moins de 30 ans, 75 % au niveau élémentaire détenaient un ou plusieurs diplômes, alors qu'au niveau secondaire ce pourcentage atteignait 90 %. Pour les enseignants entre 30 et 50 ans, ces chiffres étaient respectivement de 59 % et de 61 %.

Les enseignants qui recommencent à enseigner présentent une structure par âge différente de celle des nouvelles recrues (43 % avaient moins de 30 ans, 49 % entre 30 et 50 ans). Parmi ceux qui ont moins de trente ans, 52 % détenaient un ou plusieurs diplômes au niveau élémentaire par rapport à 89 % au niveau secondaire. Pour les enseignements de cette catégorie entre 30 et 50 ans les chiffres étaient respectivement de 46 % et de 83 %.

#### Spécialisation au niveau universitaire et discipline enseignée, niveau secondaire

Alors que l'expérience et le nombre d'années d'études postsecondaires constituent d'importants facteurs à considérer lors de l'analyse des aptitudes des nouveaux enseignants à remplir leurs fonctions, il en existe un troisième qui consiste à déterminer dans quelle mesure la discipline enseignée correspond à la spécialisation suivie au niveau universitaire. L'analyse présente une étude de la fréquence de ce dernier phénomène chez les nouveaux enseignants ce, en comparant deux variables: la principale discipline d'enseignement et la spécialisation au niveau universitaire.

Parmi les nouveaux enseignants au niveau secondaire, 14 % ont été engagés pour enseigner les sciences comme principale discipline, 13 % pour enseigner l'anglais, 9 % pour les mathématiques et 9 % pour enseigner l'éducation physique. De ce nombre de personnes engagées pour l'enseignement de ces disciplines, 43 %, 56 %, 59 % et 65 % ont respectivement déclaré que la discipline enseignée correspondait à leur spécialisation universitaire. Le tableau D présente des détails supplémentaires.

(1) Definition of subjects — Définition des disciplines:

1. Science includes: physics, chemistry, biology and general science. — Le programme des sciences comprend: physique, chimie, biologie et programme général de sciences.
2. Social studies includes: history and geography. — Les études sociales: histoire et géographie.
3. English includes: reading, drama (theatre) and language arts. — L'anglais: lecture, art dramatique (théâtre) et les arts linguistiques.
4. French includes: French taught as a second language to English students and French taught to francophone students (primarily French literature). — Le français comprend les cours de français offerts comme cours de langue seconde aux étudiants anglophones et les cours de français offerts aux étudiants francophones (particulièrement la littérature française).

## GENERAL TRENDS

While the preceding analysis dealt with a subgroup of the total teaching force, Ontario data being estimated, the following analyses relate to all teachers employed in the 1975-76 school year, excluding Ontario.

### Salaries

In 1975-76 the median salary of staff was 14,004 (13,079 at the elementary level and 15,928 at the secondary level). These figures represent increases of 21% at the elementary level, 19% at the secondary level and 21% overall between 1974-75 and 1975-76.

Median salary increases reflect not only changes in collective agreements but also an upward redistribution of the experience and qualifications of the teaching force. Between 1974-75 and 1975-76 average experience remained constant at 10.0 years at the elementary level and increased by .1 years at the secondary level (from 10.0 to 10.1). Over the same period the average years of post-secondary education increased .1 years at the elementary level (from 4.1 to 4.2) and .1 years at the secondary level (from 5.1 to 5.2).

### Qualifications

The restructuring and upgrading of minimum requirements for teacher certification introduced by provincial departments of education in the last few years have had a major influence on the redistribution of the teaching staff by qualifications. By 1974-75, certificates previously granted on the basis of a secondary school diploma and two years of teacher training had been discontinued in all provinces, the minimum requirements for new staff varying from three to four years of post-secondary study.(1) Continuing staff having less than the minimum requirements have generally been given a period of time to upgrade their qualifications.

The impact of these changing requirements was most significant at the elementary level. For example, in 1972-73, 78% of the elementary staff had more than two years of post-secondary education. By 1975-76 the proportion had increased to 89%. The major reason for this change was the higher qualifications of new appointments (see page 19).

(1) Source: Salary Categories for Canadian Teachers, 1973, Canadian Teachers' Federation.

## TENDANCES GÉNÉRALES

Alors que l'analyse précédente portait sur un groupe particulier dans l'ensemble du corps enseignant, les analyses suivantes se rapportent à tous les enseignants employés au cours de l'année scolaire 1975-76 sauf l'Ontario.

### Traitements

En 1975-76, le traitement médian du personnel était de 14,004 (13,079 au niveau élémentaire et de 15,928 au niveau secondaire). Ces chiffres représentent des augmentations de 21 % au niveau élémentaire, de 19 % au secondaire et de 21 % dans l'ensemble entre 1974-75 et 1975-76.

La progression du traitement médian est attribuable non seulement à la négociation de nouvelles conventions collectives, mais aussi à une nouvelle répartition vers le haut de l'expérience et des qualifications du corps enseignant. Entre 1974-75 et 1975-76, la moyenne de l'expérience est demeurée constante au niveau élémentaire (10 ans) et a augmenté de .1 au secondaire (de 10.0 à 10.1). Au cours de la même période, le nombre moyen d'années d'études postsecondaires s'est accru de .1 année au niveau élémentaire (de 4.1 à 4.2) et de .1 année au secondaire (de 5.1 à 5.2).

### Titres de compétence

La restructuration et le relèvement des exigences de base pour l'obtention d'un brevet d'enseignement, mis de l'avant ces dernières années par les ministères provinciaux de l'éducation, ont beaucoup influé sur la répartition du personnel enseignant selon les qualifications. En 1974-75, toutes les provinces avaient cessé de délivrer les brevets décernés après l'obtention d'un diplôme de fin d'études secondaires et deux ans de formation pédagogique. Les exigences de base pour le nouveau personnel enseignant dans ces provinces prévoyaient trois ou quatre années d'études postsecondaires(1). En général, le personnel permanent ne répondant pas aux exigences de base a bénéficié d'un délai pour se perfectionner.

Les conséquences de ces nouvelles exigences se sont surtout fait sentir au niveau élémentaire. En 1972-73, par exemple, 78 % du personnel enseignant à ce niveau avait fait plus de deux années d'études postsecondaires. La proportion était passée à 89 % en 1975-76. Ce changement s'explique principalement par le niveau plus élevé des qualifications des nouveaux enseignants (voir page 19).

(1) Source: Salary Categories for Canadian Teachers, 1973, Fédération canadienne des enseignants.

At the secondary level, where qualifications have traditionally been higher, the impact of new hirings on the distribution of staff according to qualifications has been less substantial.

While new appointments were entering the profession with higher qualifications, members of the continuing teaching force were also upgrading their qualifications by attending winter and summer programs. As a result, the number of educators with fewer than four years of post-secondary education decreased. By 1975-76 the proportions of elementary staff with four or more years of post-secondary education had increased to 69% from 53% in 1972-73.

The increased proportion of the teaching staff with four or more years of post-secondary education is also reflected in the proportion having university degrees. This proportion increased from 56% in 1972-73 to 68% in 1975-76. At the elementary level, the increase was more striking, from 42% to 57%. At the secondary level, 81% held degrees in 1972-73 compared with 87% in 1975-76.

The increasing proportion of staff with university degrees is caused both by the recruitment of more highly qualified personnel (see page 19) and by the upgrading of the continuing staff. Of the continuing staff who did not hold degrees previously, 6% were awarded first degrees in 1973-74 and 5% in 1974-75. Of continuing staff already holding one or more degrees, 2% earned additional degrees in 1973-74 and 2% in 1974-75. These degrees were earned as a result of teachers attending summer, night or extension courses while continuing to teach on a full-time basis.

### Experience

The median teaching experience for all staff in the 1975-76 school year was 8.0 years (up .3 years from 1974-75). However, there was considerable interprovincial variation in the median teaching experience, ranging from 6.0 years in Northwest Territories to 9.0 years in Saskatchewan and New Brunswick.

In 1975-76, the median teaching experience for all elementary teachers was 7.6 years (7.0 for males and 8.0 for females), unchanged from 1974-75. At the secondary level the median teaching experience was 8.0 years (9.0 for men and 6.0 for women).

Over the past two years, teaching staff have tended to remain with the employing board of the previous year. Median experience of this type (tenure) was 4.6 years in 1974-75

Au secondaire, où le niveau des qualifications a toujours été plus élevé, l'embauche de nouveaux enseignants a influé de façon moins sensible sur la répartition du personnel selon les qualifications.

Alors que les nouveaux enseignants faisaient leurs débuts dans l'enseignement avec un niveau plus élevé de qualifications, les membres du personnel enseignant permanent se perfectionnaient en suivant des cours l'hiver et l'été. En conséquence, le nombre d'enseignants ayant fait moins de quatre années d'études postsecondaires a diminué. En 1975-76, le pourcentage du personnel enseignant au niveau élémentaire ayant fait plus de quatre années d'études postsecondaires a augmenté pour s'établir à 69 % contre 53 % en 1972-73.

Le fait qu'une plus forte proportion du personnel enseignant a fait quatre années ou plus d'études postsecondaires se manifeste aussi dans la proportion d'enseignants détenteurs d'un grade universitaire. Cette dernière est passée de 56 % en 1971-72 à 68 % en 1975-76. L'augmentation a été plus marquée au niveau élémentaire, soit de 42 % à 57 %. Au secondaire, 81 % du personnel enseignant détenait un grade universitaire en 1972-73, contre 87 % en 1975-76.

L'augmentation de la proportion du personnel enseignant détenteur d'un grade universitaire résulte à la fois du recrutement d'un personnel plus qualifié et du perfectionnement du personnel permanent. Du nombre des enseignants permanents ne possédant pas de grades auparavant, 6 % ont obtenu leur premier grade en 1973-74 et 5 % en 1974-75. Du nombre des enseignants permanents déjà titulaires d'un ou de plusieurs grades universitaires, 2 % ont d'autres grades en 1973-74 et 2 % en 1974-75. Les enseignants ont obtenu ces grades en suivant des cours d'été ou du soir ou des cours de l'extension tout en continuant d'enseigner à temps plein.

### Expérience

La médiane de l'expérience dans l'enseignement pour l'ensemble du personnel était de 8.0 années pour l'année scolaire 1975-76 (augmentation de .3 années depuis 1974-75). Toutefois, elle a beaucoup varié d'une province à l'autre, s'échelonnant entre 6.0 années dans les Territoires du Nord-Ouest et 9.0 années en Saskatchewan et au Nouveau-Brunswick.

En 1975-76, la médiane de l'expérience dans l'enseignement pour l'ensemble des enseignants au niveau élémentaire était de 7.6 années (7.0 pour les hommes et 8.0 pour les femmes), la même qu'en 1974-75. Au niveau secondaire, elle était de 8.0 années (9.0 pour les hommes et 6.0 pour les femmes).

Au cours des deux dernières années, le personnel enseignant a eu tendance à demeurer au service du conseil scolaire pour lequel il avait travaillé l'année précédente. En 1974-75, la médiane

(4.0 at the elementary level and 5.0 at the secondary level). In the following year median tenure reached 5.0 years overall, increasing to 5.0 at the elementary level and remaining at 5.0 at the secondary level. Average tenure also increased over the period from 6.2 to 6.5 years at the elementary level and from 6.4 to 6.6 years at the secondary level.

The major cause of the recent increase in tenure is the declining rate of interboard transfers, a drop from 4.6% in 1974-75 to 4.1% in 1975-76.(2)

#### Personal Characteristics

Over the past 10 years, there has been a continuing decline in the proportion of females in the teaching force, from 60% in 1970-71, to 55% in 1975-76. At the elementary level over the same period, the decline was seven percentage points (from 75% to 68%), while at the secondary level it was three percentage points (from 35% to 32%).

Over the past two years there has been a small general increase in the median ages of staff to 32.7 years in 1975-76, though decreases were recorded in Prince Edward Island. However, an interprovincial comparison in 1975-76 shows considerable variation from a low of 28.9 years in Newfoundland to a high of 33.6 years in Alberta and British Columbia. Considering the general tendency for enrolments and recruitments to decrease and retention of staff to increase, the median age of the staff should continue to increase in the next few years.

---

(2) A historical comparison prior to 1972-73 is not possible at this time due to changes in definition and method (see Limitations, page 13).

de ce genre d'expérience (service courant) était de 4.6 années (4.0 à l'élémentaire et 5.0 au secondaire). L'année suivante, la médiane du service courant pour l'ensemble s'est établie à 5.0 années, augmentant à 5.0 années au niveau élémentaire et demeurant à 5.0 années au secondaire. La moyenne du service courant a également augmenté au cours de cette période, passant de 6.2 à 6.5 années au niveau élémentaire et de 6.4 à 6.6 années au secondaire.

L'accroissement récent du nombre d'années de service courant s'explique principalement par la baisse du taux de mutations d'un conseil à l'autre, qui est tombé de 4.6 % en 1974-75 à 4.1 % en 1975-76(2).

#### Caractéristiques personnelles

Au cours des 10 dernières années, la proportion de femmes au sein du corps enseignant n'a cessé de décroître, passant de 60 % en 1970-71 à 55 % en 1975-76. Au cours de la même période, la baisse au niveau élémentaire a atteint sept points de pourcentage (de 75 % à 68 %), alors qu'au niveau secondaire, elle s'est chiffrée à trois points (de 35 % à 32 %).

Au cours des deux dernières années, on a observé chez le personnel une légère augmentation, généralisée, de l'âge médian (32.7 ans en 1975-76), bien que l'Île-du-Prince-Édouard ait enregistré des baisses. Toutefois, une comparaison interprovinciale de l'âge médian en 1975-76 relève des variations importantes s'échelonnant entre 28.9 ans à Terre-Neuve et 33.6 ans en Alberta et en Colombie-Britannique. Compte tenu de la tendance générale à la baisse des effectifs et du taux de recrutement d'une part et de la tendance à la hausse du taux de maintien de l'emploi d'autre part, l'âge médian du personnel devrait continuer d'augmenter au cours des prochaines années.

---

(2) Il est actuellement impossible d'établir une comparaison chronologique antérieure à 1972-73, car des modifications ont été apportées aux définitions et aux méthodes (voir les Restrictions, page 13).

STATISTICAL TABLES

## PREFACE

Statistics Canada has published an annual report on the qualifications, salary and experience of teachers in public elementary and secondary schools since 1939, with the exception of 1950-51, 1951-52 and 1955-56. Basic data for these three years are contained in the historical tables of the 1970-71 and 1971-72 issue.

Compared with the 1970-71 and 1971-72 issue, the detail and number of statistical tables have been reduced in this publication. However, tables comparable to those produced in previous publications are available on request. In addition, a generalized data retrieval system is now available, allowing users a variety of detailed statistical tables on request.

This report was prepared in the Elementary-Secondary Education Section of the Education, Science and Culture Division by M. Meloche and J. Seidle. Technical assistance was provided by Arlene Tamarit and Josephine Stanic.

PETER G. KIRKHAM,  
Chief Statistician of Canada.

## PRÉFACE

Statistique Canada a publié, chaque année depuis 1939 (sauf pour les années scolaires 1950-51, 1951-52 et 1955-56), un bulletin sur les qualifications, le traitement et l'expérience des enseignants des écoles primaires et secondaires publiques. Les données de base pour les trois années exclues figurent dans les tableaux chronologiques du numéro de 1970-71 et 1971-72.

Les tableaux statistiques sont moins nombreux et moins détaillés dans la présente publication comparativement à celles des années 1970-71 et 1971-72. Vous pouvez vous procurer sur demande des tableaux semblables à ceux présentés dans les publications antérieures. De plus, un système généralisé d'extraction des données permet aux utilisateurs d'obtenir, sur demande, divers tableaux statistiques détaillés.

Ce bulletin a été rédigé par M. Meloche et J. Seidle de la Section de l'enseignement primaire et secondaire de la Division de l'éducation, des sciences et de la culture, avec la collaboration technique d'Arlene Tamarit et de Joséphine Stanic.

Le statisticien en chef du Canada,  
PETER G. KIRKHAM.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

- - amount too small to be expressed.

<sup>p</sup> preliminary figures.

<sup>r</sup> revised figures.

<sup>x</sup> confidential to meet secrecy requirements of the Statistics Act.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

<sup>p</sup> nombres provisoires.

<sup>r</sup> nombres rectifiés.

<sup>x</sup> confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## INTRODUCTION

The 1975-76 issue highlighted an in depth analysis of retention, recruitment and losses of staff in both the long and short terms. This issue of the publication includes a study of the relationship between changes in enrolment and the teaching staff since 1972-73. Patterns at the national, provincial and interprovincial levels are examined. A comparison of teachers in the metropolitan and non-metropolitan areas is made with respect to characteristics such as qualifications, teaching experience and salary. These data compliment those published on metropolitan areas in the 1976-77 issue of "Elementary-Secondary School Enrolment" (catalogue 81-210). The characteristics of teachers occupying administrative positions are also studied, particularly with reference to the proportions of male and female administrators in schools of varying size.

### Scope of Data

The school year 1976-77 is covered in this publication. Detailed statistical tables comparable to those produced in previous publications are available on request.

This survey includes all full-time school instructional, supervisory and administrative personnel and board staff instructing in schools at the beginning of the school year 1976-77.<sup>(1)</sup> Excluded from this report are all part-time educators and supervisory and consultant personnel in the departments of education and local board offices (for example, superintendents, directors, supervisors, psychologists, social workers and others involved in pupil-personnel services or non-teaching activities). Each educator is counted once only even if more than one position is held. Figures appearing in this publication may differ from those published by provincial departments of education. These differences are, for the most part, due to variations in the definition of the educator population.

The survey excludes educators employed in private schools and those in special education schools operated directly by provincial governments. Educators identified as "unclassified" in some of the statistical tables are those who completed a questionnaire but failed to report one or more items under consideration.

---

(1) Ontario educators were surveyed in the spring of each school year.

Le numéro de 1975-76 présentait une analyse détaillée à court et à long terme des tendances de la persévérance, du recrutement et des départs au sein du corps enseignant. Le présent numéro de cette publication contient une étude du rapport entre les variations de l'effectif étudiant et celles du personnel enseignant depuis 1972-73. On y examine les tendances à l'échelle nationale, provinciale et interprovinciale. On y compare les qualifications, l'expérience et les traitements des enseignants des régions métropolitaines et des régions non métropolitaines. Ces données sont complémentaires à celles qui sont publiées relativement aux régions métropolitaines dans l'édition de 1976-77 de la publication, "Effectifs des écoles primaires et secondaires" (n° 81-210 au catalogue). On examine également les caractéristiques des enseignants occupant des postes administratifs, plus particulièrement le pourcentage d'hommes et de femmes administrateurs dans les écoles de différente taille.

### Champ d'application des données

La présente publication porte sur l'année scolaire 1976-77. On peut se procurer, sur demande, des tableaux statistiques détaillés semblables à ceux contenus dans les publications antérieures.

L'enquête vise tous les enseignants, surveillants et administrateurs à plein temps ainsi que le personnel des conseils scolaires qui travaillaient dans les écoles au début de l'année scolaire 1976-77<sup>(1)</sup>. Sont exclus le personnel d'enseignement à temps partiel, les surveillants et les conseillers des ministères de l'Éducation et des bureaux des conseils scolaires (par exemple, les superintendants, les directeurs, les surveillants, les psychologues, les travailleurs sociaux et les personnes chargées des services aux élèves et d'activités autres que l'enseignement). Chaque personne n'est comptée qu'une fois même si elle occupe plus d'un poste. Les chiffres figurant dans ce bulletin peuvent être différents de ceux publiés par les ministères provinciaux de l'Éducation. Ces différences s'expliquent surtout par le fait que la définition de "personnel d'enseignement" n'est pas la même.

L'enquête ne vise pas le personnel d'enseignement des écoles privées ni celui des écoles spéciales qui relèvent directement des administrations provinciales. Le personnel classé dans la catégorie "non déclaré" dans certains tableaux statistiques est celui qui a rempli un questionnaire, mais a omis de répondre à une ou plusieurs questions à l'étude.

---

(1) Le personnel d'enseignement de l'Ontario fait l'objet d'une enquête au printemps de chaque année scolaire.

### Method

All provinces with the exception of Quebec were surveyed for this publication. The survey forms were then processed by either provincial departments of education or by Statistics Canada.

### Definitions

In this publication, the term educator includes teachers, principals, vice-principals, department heads and supervisors. (The term administrator refers to all principals, vice-principals and department heads. The term teacher refers to all other educators.)

Public schools are those schools which are operated by local school boards and which are supported by local taxation and supplemented by provincial grants in accordance with the education acts of the provinces or territories in which they are located. Included under this definition are the denominational schools of Newfoundland, and the Protestant and Roman Catholic Separate schools where such exist. Schools located on Department of National Defence bases across Canada are also included since they operate within the framework of the public schools of the provinces in which they are located.

### Teaching Level

Educators are classified as elementary or secondary according to the grade levels they teach and/or supervise.

For statistical purposes the following definitions were used to arrive at "teaching level":

- (a) An educator who teaches or supervises any grade or combination of grades from pre-Grade 1 through Grade 8 but no grades above 8, is classified as "elementary". (In British Columbia read Grade 7 in place of Grade 8.)
- (b) An educator who teaches or supervises any grade or combination of Grades 9 through 13 but no grade below 9, is classified as "secondary". (In British Columbia read Grade 8 in place of Grade 9.)

The above criteria do not apply to a number of educators. Some did not answer the appropriate question while others teach or supervise at both levels. In these cases, an

### Méthode

Toutes les provinces sauf le Québec ont participé à l'enquête aux fins de la présente publication. Les déclarations ont ensuite été dépouillées soit par les ministères provinciaux de l'Éducation ou par Statistique Canada.

### Définitions

Aux fins de la présente publication, l'expression personnel d'enseignement désigne les enseignants, les directeurs, les sous-directeurs, les chefs de département et les surveillants. (Le terme administrateur désigne tous les directeurs, sous-directeurs et chefs de département et le terme enseignant, tous les autres membres du personnel.)

Les écoles publiques sont toutes celles qui relèvent des conseils scolaires locaux et qui sont financées par les impôts locaux auxquels viennent s'ajouter des subventions provinciales en vertu de la Loi sur l'éducation de la province ou du territoire dans lequel ces écoles sont situées. Ce terme désigne également les écoles confessionnelles de Terre-Neuve et les écoles protestantes et catholiques romaines séparées; les écoles situées dans les bases militaires du ministère de la Défense nationale au Canada font également partie de cette catégorie puisqu'elles sont considérées au même titre que les écoles publiques des provinces.

### Niveau (d'enseignement)

Le personnel d'enseignement est considéré comme travaillant au niveau élémentaire ou secondaire selon les classes auxquelles il enseigne et (ou) qu'il surveille.

Aux fins de la statistique, voici le détail de la définition du terme "niveau d'enseignement":

- a) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes du pré-élémentaire à la 8ième année, mais non dans les classes supérieures à la 8ième année, est classé au niveau "élémentaire". (Dans le cas de la Colombie-Britannique il s'agira de la "7ième année" au lieu de "8ième année".)
- b) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes de la 9ième à la 13ième année, mais non dans les classes inférieures à la 9ième année, est classé au niveau "secondaire". (Dans le cas de la Colombie-Britannique c'est la "8ième année" au lieu de "9ième année".)

Certains membres du personnel d'enseignement n'entrent pas dans ces catégories parce qu'ils n'ont pas répondu à la question pertinente ou parce qu'ils enseignent ou surveillent dans des classes

arbitrary assignment of teaching level was made based on the following criterion:

- (c) If an educator was assigned to a specific school, the level of the school was assumed to be the level of teaching. For example, a school offering Grades 1-10 is defined as elementary while a school offering Grades 7-12 is defined as secondary.

The above criteria provide for historical continuity. In the past, due to a lack of additional data, educators who did not meet the above criteria were assigned the secondary level if teaching in more than one school, otherwise they were classified as elementary. More precise data now being available, the following criteria have been introduced.

- (d) If the question requesting the per cent of time teaching or supervising Grades 1-8 and/or 9-13 was answered, the level of the higher percentage was assigned.
- (e) If the information noted in (d) above was not available but the specific grades taught and/or supervised were reported, the level was assigned according to the level of the majority of grades.

If none of the above conditions were met, the educator was assigned the elementary level.

Tenure is defined as the number of years of experience with the present school board, which may or may not be continuous.

Years of Education Approved for Salary Purposes (years of post-secondary education)

The number of years of education approved for salary purposes is defined as the number of years of education beyond the equivalent of the junior matriculation level recognized for salary placement purposes. In the Atlantic provinces the certification schemes perform this function while in Ontario and the Western Provinces specific questions were asked to provide this information. Every teacher was assigned a numerical value which gives the number of years of education beyond secondary school graduation recognized for salary or grant purposes.

aux deux niveaux. Dans ces cas, on a déterminé le niveau d'enseignement de façon arbitraire en se fondant sur le critère suivant:

- c) Si un membre du personnel d'enseignement est affecté à une école particulière, on suppose que le niveau de l'école est le niveau d'enseignement de la personne. Par exemple, une école qui offre des cours de la 1<sup>ère</sup> à la 10<sup>ième</sup> année est une école élémentaire et celle qui dispense des cours de la 7<sup>ième</sup> à la 12<sup>ième</sup> année est une école secondaire.

Ces critères permettent une certaine continuité dans le temps. Dans le passé, en raison d'un manque de données, le personnel qui ne répondait pas aux critères ci-dessus était classé au niveau secondaire s'il travaillait dans plus d'une école; autrement, on le considérait comme étant au niveau élémentaire. Comme nous disposons actuellement de données plus précises, nous avons établi les critères suivants.

- d) Si l'enquête a répondu à la question relative au pourcentage de temps consacré à l'enseignement ou à la surveillance de la 1<sup>ère</sup> à la 8<sup>ième</sup> année et (ou) de la 9<sup>ième</sup> à la 13<sup>ième</sup> année, on lui a attribué le niveau correspondant au pourcentage le plus élevé.
- e) Si l'enquête n'a pas fourni les renseignements dont il est question en d) ci-dessus, mais qu'il a déclaré les classes dans lesquelles il enseignait et (ou) surveillait, on lui a attribué le niveau correspondant à la majorité des classes.

Si l'enseignant ne répondait à aucune des conditions mentionnées, on le classait au niveau élémentaire.

Le terme états de service (service courant) désigne le nombre d'années d'expérience dans l'enseignement au sein du conseil scolaire actuel, que le service soit continu ou non.

Années de scolarité reconnues aux fins de calcul de la rémunération (années de formation au niveau postsecondaire)

Ce terme désigne les années d'études, au-delà de l'équivalent de l'immatriculation junior, reconnues aux fins de l'établissement des traitements. Dans les provinces de l'Atlantique, c'est le régime de brevets qui joue ce rôle, tandis qu'en Ontario et dans les provinces de l'Ouest, on a dû poser des questions précises en vue d'obtenir ces renseignements. On a attribué à chaque personne une valeur numérique indiquant le nombre d'années de scolarité, au-delà du cycle secondaire, reconnues aux fins de l'établissement des traitements ou des subventions.

## Methods of Calculation

### Salary

Respondents were requested to report their annual contract salary to the nearest dollar as of the date of completion of the questionnaire. Median and percentile salaries were calculated on these reported salaries based on intervals of \$10. Educators not reporting salaries were excluded from the calculations.

### Age

The questionnaire requested the date of birth of each respondent. In the tables of this report, age is calculated as of December 31 of the year under review. For example, age data collected for the 1976-77 school year is calculated as of December 31, 1976.

### Experience

Experience is calculated on the basis of 10 months equalling one school year. For example, 7-8 indicates seven years and eight months and is synonymous with 7.8 years. All experience is considered as of June 30 of the previous school year. For example, the number of years of experience reported by teachers in the 1976-77 school year is as of June 30, 1976.

### Years Since Award of First and Highest Degree

Information was requested on the year in which the first and highest degrees were obtained. As with age, the number of years since the awarding of first and highest degree is based on the calendar year under review.

### Limitations

Several salary contracts were still unresolved when the questionnaires were completed and a number of contracts were negotiated retroactively covering periods of one to two years. Caution must therefore be exercised when making interprovincial and historical comparisons. In addition, it should be recognized that variations in median salary do not necessarily indicate variations in the salary schedules on which educators were paid. Since salaries are based on both years of training and years of teaching, changes in the distribution of either of these two factors could cause an increase in the median salary while the salary scale remained unchanged.

## Méthodes de calcul

### Traitement

On a demandé aux enquêtés de déclarer leur traitement annuel au dollar près à la date à laquelle ils ont rempli le questionnaire. Les traitements médians et ceux de chaque percentile ont été calculés, en fonction des traitements déclarés, par intervalles de \$10. Le personnel qui n'a pas déclaré son traitement a été exclu des calculs.

### Âge

Chaque enquêté devait déclarer sa date de naissance. Dans les tableaux de la présente publication, l'âge est calculé au 31 décembre de l'année à l'étude. Ainsi, les données sur l'âge recueillies pour l'année scolaire 1976-77 sont calculées au 31 décembre 1976.

### Expérience

L'expérience est calculée en fonction d'une période d'enseignement de 10 mois correspondant à une année scolaire. Par exemple, 7-8 signifie sept ans et huit mois et est synonyme de 7.8 années. Toute expérience est relevée au 30 juin de l'année scolaire précédente. Ainsi, le nombre d'année d'expérience déclaré par le personnel pour l'année scolaire 1976-77 est compté au 30 juin 1976.

### Années écoulées depuis l'obtention du premier grade et du grade le plus élevé

On a demandé des renseignements au sujet de l'année de l'obtention du premier grade et du grade le plus élevé. Comme dans le cas de l'âge, le nombre d'année écoulées depuis l'obtention du premier grade et du grade le plus élevé est calculé en fonction de l'année civile en question.

### Restrictions

Plusieurs échelles de traitements contractuels étaient encore indéterminées au moment où les enquêtés ont rempli les questionnaires et un certain nombre de conventions ont été négociées avec un effet rétroactif de un à deux ans. Il faut donc être prudent lorsqu'il s'agit d'établir des comparaisons d'une province à l'autre et d'une période à l'autre. De plus, il y a lieu de signaler que les variations du traitement médian ne signifient pas nécessairement que les échelles de traitement du personnel d'enseignement ont fluctué. Comme les traitements sont fondés à la fois sur les années d'études et les années d'expérience dans l'enseignement, des variations au chapitre de l'un ou l'autre de ces deux facteurs pourraient entraîner un relèvement du traitement médian, tandis que l'échelle de traitement demeurerait la même.

The classification of teaching level has been arbitrarily established and as such does not correspond to all provincial definitions. Furthermore, the proportion of educators with teaching assignments covering both the elementary and secondary levels of education varies widely from one province to another. Therefore, caution must be exercised when making interprovincial comparisons.

The present classification was established in 1968-69, rendering invalid any historical comparisons prior to that school year. (See publications prior to 1968-69 for exact definitions previously in use.) For most provinces, the change in definition resulted in an increase in the proportion of teachers classified as "elementary".

Prior to 1970-71, educators in schools operated by the Department of Indian and Northern Affairs in Arctic Quebec were included with those of the Northwest Territories. Since 1970-71, educators in Arctic Quebec have been excluded from the publication.

La classification selon le niveau d'enseignement a été déterminée de façon arbitraire et, en tant que telle, ne correspond pas aux définitions en usage dans toutes les provinces. De plus, la proportion du personnel d'enseignement dont les fonctions chevauchent les niveaux élémentaire et secondaire varie beaucoup d'une province à l'autre. Il faut donc, ici encore, être prudent lorsqu'il s'agit d'établir des comparaisons interprovinciales.

La classification actuelle a été établie en 1968-69; ainsi, il n'est possible de faire des comparaisons historiques qu'auprès de cette année scolaire. (Voir les publications antérieures à 1968-69 pour connaître les définitions précédemment utilisées.) La modification de la définition a engendré, dans la plupart des provinces, une augmentation de la proportion du personnel classé au niveau "élémentaire".

Avant 1970-71, le personnel d'enseignement qui travaillait dans les écoles de l'Arctique québécois relevant du ministère des Affaires indiennes et du Nord était compris avec celui des Territoires du Nord-Ouest. Depuis 1970-71, il n'est plus visé par l'enquête.

TRENDS IN RETENTION, RECRUITMENT  
AND LOSSES(1)

The national retention rate in 1976-77 was 91% (up from 89% in 1975-76), ranging from 66% in the Yukon to a high of 93% in Nova Scotia. The retention rates increased in all provinces, except Manitoba (remaining unchanged at 89%), Yukon (declining from 72% to 66%), and the Northwest Territories (declining from 78% to 73%).

The general increase in retention rates, combined with an initially small increase in staff had a significant impact on the rates of teacher losses and recruitment.

The national rate of losses to the teaching force in 1976-77 was 10% (down from 11% in 1975-76), ranging from a high of 34% in the Yukon to a low of 7% in Nova Scotia. The largest change in rate over the one-year period occurred in the Yukon (from 20% to 34%).

The rate of recruitment declined nationally from 12% in 1975-76 to 10% in 1976-77. Nova Scotia reported the lowest recruitment rate (5%). The Yukon experienced the largest change (from 29% in 1975-76 to 34% in 1976-77).

With the reduction in the turnover of staff, one might expect that the characteristics of the teaching force would remain relatively constant. However, important changes have occurred. For example, more men are teaching than ever before; the teaching force is becoming older; qualifications and experience continue to increase; mobility has decreased; and salaries continue to increase due not only to contract settlements but also to the increased qualifications and experience of the teaching force.

---

(1) Analysis excludes Ontario, comparable data for 1975-76 being unavailable.

TENDANCE DE LA PERSÉVÉRANCE, DU RECRUTEMENT  
ET DÉPARTS(1)

En 1976-77, le taux de persévérance au Canada se situait à 91 % (augmentation par rapport à 1975-76, où le taux était de 89 %), s'échelonnant entre 66 % au Yukon et 93 % en Nouvelle-Écosse. Le taux de persévérance a augmenté dans toutes les provinces, sauf au Manitoba (où il est demeuré à 89 %), au Yukon (où il est passé de 72 % à 66 %) et dans les Territoires du Nord-Ouest (où il est passé de 78 % à 73 %).

L'augmentation généralisée des taux de persévérance, jointe à une faible augmentation initiale du personnel a influé de façon appréciable sur les taux de départ et de recrutement des enseignants.

En 1976-77, le taux de départ pour le corps enseignant à l'échelle nationale s'établissait à 10 % (baisse par rapport à 1975-76, où le taux était de 11 %), s'échelonnant entre 34 % au Yukon et 7 % en Nouvelle-Écosse. La variation la plus importante au cours de l'année étudiée a été observée au Yukon (où le taux est passé de 20 % à 34 %).

Le taux de recrutement a diminué dans tout le Canada, passant de 12 % en 1975-76 à 10% en 1976-77. C'est la Nouvelle-Écosse qui a enregistré le taux de recrutement le plus faible (5 %). Le Yukon a enregistré l'accroissement le plus important (passant de 29 % en 1975-76 à 34 % en 1976-77).

En raison du ralentissement du renouvellement du personnel, on pourrait s'attendre que les caractéristiques du corps enseignant demeurent relativement constantes. Mais des changements importants se sont produits. Par exemple, le corps enseignant compte plus d'hommes que jamais; la moyenne d'âge augmente; le niveau des qualifications et de l'expérience ne cesse pas de s'accroître; la mobilité a diminué; et les traitements augmentent toujours, non seulement en raison de la signature de nouveaux contrats de travail, mais aussi à cause de la progression du niveau des qualifications et de l'expérience du corps enseignant.

---

(1) L'analyse ne porte pas sur l'Ontario, car des données comparables pour 1975-76 ne sont pas disponibles.

## GENERAL TRENDS

### Salaries

In 1976-77 the median salary of staff was 16,615 (15,215 at the elementary level and 19,415 at the secondary level). These figures represent increases of 20% at the elementary level, 18% at the secondary level and 20% overall between 1975-76 and 1976-77.

Median salary increases reflect not only changes in collective agreements but also an upward redistribution of the experience and qualifications of the teaching force. Between 1975-76 and 1976-77 average experience increased by .1 years (to 10.6 years) at the elementary level and increased by .2 years at the secondary level (from 10.5 to 10.7). Over the same period the average years of post-secondary education increased .1 years at the elementary level (from 4.0 to 4.1 and remained unchanged at the secondary level (5.2).

### Qualifications

The restructuring and upgrading of minimum requirements for teacher certification introduced by provincial departments of education in the last few years have had a major influence on the redistribution of the teaching staff by qualifications. By 1974-75, certificates previously granted on the basis of a secondary school diploma and two years of teacher training had been discontinued in all provinces, the minimum requirements for new staff varying from three to four years of post-secondary study.(1) Continuing staff having less than the minimum requirements have generally been given a period of time to upgrade their qualifications.

The impact of these changing requirements was most significant at the elementary level. For example, in 1972-73, 65% of the elementary staff had more than two years of post-secondary education. By 1976-77 the proportion had increased to 82%.

While new appointments were entering the profession with higher qualifications, members of the continuing teaching force were also upgrading their qualifications by attending winter and summer programs. As a result, the number of educators with fewer than four years of post-secondary education decreased. By 1976-77 the proportions of elementary staff with four or more years of post-secondary education had increased to 65% from 45% in 1972-73.

## TENDANCES GÉNÉRALES

### Traitements

En 1976-77 le traitement médian du personnel était de 16,615 (15,215 au niveau élémentaire et de 19,415 au secondaire). Ces chiffres représentent des augmentations de 20 % au niveau élémentaire, de 18 % au secondaire et de 20 % dans l'ensemble entre 1975-76 et 1976-77.

La progression du traitement médian est attribuable non seulement à la négociation de nouvelles conventions collectives, mais aussi à une nouvelle répartition vers le haut de l'expérience et des qualifications du corps enseignant. Entre 1975-76 et 1976-77, la moyenne de l'expérience a augmenté de .1 au niveau élémentaire (à 10.6) et a augmenté de .2 au secondaire (de 10.5 à 10.7). Au cours de la même période, le nombre moyen d'années d'études postsecondaires s'est accru de .1 année au niveau élémentaire (de 4.0 à 4.1) et est demeuré constant au secondaire (5.2).

### Titres de compétence

La restructuration et le relèvement des exigences de base pour l'obtention d'un brevet d'enseignement, mis de l'avant ces dernières années par les ministères provinciaux de l'Éducation, ont beaucoup influé sur la répartition du personnel enseignant selon les qualifications. En 1974-75, toutes les provinces avaient cessé de délivrer les brevets décernés après l'obtention d'un diplôme de fin d'études secondaires et deux ans de formation pédagogique. Les exigences de base pour le nouveau personnel enseignant dans ces provinces prévoyaient trois ou quatre années d'études postsecondaires(1). En général, le personnel permanent ne répondant pas aux exigences de base a bénéficié d'un délai pour se perfectionner.

Les conséquences de ces nouvelles exigences se sont surtout fait sentir au niveau élémentaire. En 1972-73, par exemple, 65 % du personnel enseignant à ce niveau avait fait plus de deux années d'études postsecondaires. La proportion était passée à 82 % en 1976-77.

Alors que les nouveaux enseignants faisaient leurs débuts dans l'enseignement avec un niveau plus élevé de qualifications, les membres du personnel enseignant permanent se perfectionnaient en suivant des cours l'hiver et l'été. En conséquence, le nombre d'enseignants ayant fait moins de quatre années d'études postsecondaires a diminué. En 1976-77, le pourcentage du personnel enseignant au niveau élémentaire ayant fait plus de quatre années d'études postsecondaires a augmenté pour s'établir à 65 % contre 45 % en 1972-73.

(1) Source: Salary Categories for Canadian Teachers, 1973, Fédération canadienne des enseignants.

The increased proportion of the teaching staff with four or more years of post-secondary education is also reflected in the proportion having university degrees. This proportion increased from 52% in 1972-73 to 64% in 1976-77. At the elementary level, the increase was more striking, from 34% to 53%. At the secondary level, 81% held degrees in 1972-73 compared with 84% in 1976-77.

The increasing proportion of staff with university degrees is caused both by the recruitment of more highly qualified personnel and by the upgrading of the continuing staff. Of the continuing staff who did not hold degrees previously, 4% were awarded first degrees in 1975-76. Of continuing staff already holding one or more degrees, 2% earned additional degrees in 1975-76.(2) These degrees were earned as a result of teachers attending summer, night or extension courses while continuing to teach on a full-time basis.

#### Experience

The median teaching experience for all staff in the 1976-77 school year was 9.0 years (up 1.0 years from 1975-76). However, there was considerable interprovincial variation in the median teaching experience, ranging from 7.0 years in Newfoundland, Yukon and Northwest Territories to 10.0 years in New Brunswick.

In 1976-77, the median teaching experience for all elementary teachers was 8.3 years (9.0 for males and 8.0 for females), up .3 years from 1975-76. At the secondary level the median teaching experience was 9.0 years (10.0 for men and 7.0 for women).

Over the past two years, teaching staff have tended to remain with the employing board of the previous year. Median experience of this type (tenure) was 5.0 years in 1975-76 (5.0 at the elementary level and 6.0 at the secondary level). In the following year median tenure reached 6.0 years overall, increasing to 6.0 at the elementary level and remaining at 6.0 at the secondary level. Average tenure also increased over the period from 6.7 to 7.2 years at the elementary level and from 6.9 to 7.4 years at the secondary level.

(2) Ontario excluded as information on degrees for continuing staff in Ontario was not available.

Le fait qu'une plus forte proportion du personnel enseignant a fait quatre années ou plus d'études postsecondaires se manifeste aussi dans la proportion d'enseignants détenteurs d'un grade universitaire. Cette dernière est passée de 52 % en 1972-73 à 64 % en 1976-77. L'augmentation a été plus marquée au niveau élémentaire, soit de 34 % à 53 %. Au secondaire, 81 % du personnel enseignant détenait un grade universitaire en 1972-73, contre 84 % en 1976-77.

L'augmentation de la proportion du personnel enseignant détenteur d'un grade universitaire résulte à la fois du recrutement d'un personnel plus qualifié et du perfectionnement du personnel permanent. Du nombre des enseignants permanents ne possédant pas de grades auparavant, 4 % ont obtenu leur premier grade en 1975-76. Du nombre des enseignants permanents déjà titulaires d'un ou de plusieurs grades universitaires, 2 % ont d'autres grades en 1975-76(2). Les enseignants ont obtenu ces grades en suivant des cours d'été ou du soir ou des cours de l'extension tout en continuant d'enseigner à plein temps.

#### Expérience

La médiane de l'expérience dans l'enseignement pour l'ensemble du personnel était de 9.0 années pour l'année scolaire 1976-77 (augmentation de 1.0 années depuis 1975-76). Toutefois, elle a beaucoup varié d'une province à l'autre, s'échelonnant entre 7.0 années dans le Terre-Neuve, le Yukon et les Territoires du Nord-Ouest et de 10.0 années au Nouveau-Brunswick.

En 1976-77, la médiane de l'expérience dans l'enseignement pour l'ensemble des enseignants au niveau élémentaire était de 8.3 années (9.0 pour les hommes et 8.0 pour les femmes), augmentation de .3 année. Au niveau secondaire, elle était de 9.0 années (10.0 pour les hommes et 7.0 pour les femmes).

Au cours des deux dernières années, le personnel enseignant a eu tendance à demeurer au service du conseil scolaire pour lequel il avait travaillé l'année précédente. En 1975-76, la médiane de ce genre d'expérience (service courant) était de 5.0 années (5.0 à l'élémentaire et 6.0 au secondaire). L'année suivante, la médiane du service courant pour l'ensemble s'est établie à 6.0 années, augmentant à 6.0 années au niveau élémentaire et demeurant à 6.0 années au secondaire. La moyenne du service courant a également augmenté au cours de cette période, passant de 6.7 à 7.2 années au niveau élémentaire et de 6.9 à 7.4 années au secondaire.

(2) Sans l'Ontario, l'information concernant les grades universitaires pour personnel enseignant permanent dans l'Ontario, n'était pas disponible.

The major cause of the recent increase in tenure is the declining rate of interboard transfers, a drop from 4.1% in 1975-76 to 3.4% in 1976-77.(3)

#### Personal Characteristics

Over the past five years, there has been a continuing decline in the proportion of females in the teaching force, from 57% in 1972-73 to 54% in 1976-77. At the elementary level over the same period the decline was three percentage points (from 71% to 68%), while at the secondary level it was one percentage point (from 32% to 31%).

Over the past two years there has been a small general increase in the median ages of staff to 33.5 years in 1976-77. However, an interprovincial comparison in 1976-77 shows considerable variation from a low of 29.6 years in Newfoundland to a high of 34.0 years in British Columbia. Considering the general tendency for enrolments and recruitments to decrease and retention of staff to increase, the median age of the staff should continue to increase in the next few years.

---

(3) Data on interboard transfers exclude Ontario for 1975-76 and 1976-77.

L'accroissement récent du nombre d'années de service courant s'explique principalement par la baisse du taux de mutations d'un conseil à l'autre, qui est tombé de 4.1 % en 1975-76 à 3.4 % en 1976-77(3).

#### Caractéristiques personnelles

Au cours des cinq dernières années, la proportion de femmes au sein du corps enseignant n'a cessé de décroître, passant de 57 % en 1972-73 à 54 % en 1976-77. Au cours de la même période, la baisse au niveau élémentaire a atteint trois points de pourcentage (de 71 % à 68 %), alors qu'au niveau secondaire, elle s'est chiffrée à un point (de 32 % à 31 %).

Au cours des deux dernières années, on a observé chez le personnel une légère augmentation, généralisée, de l'âge médian (33.5 ans en 1976-77). Toutefois, une comparaison interprovinciale de l'âge médian en 1976-77 relève des variations importantes s'échelonnant entre 29.6 ans à Terre-Neuve et 34.0 ans en Colombie-Britannique. Compte tenu de la tendance générale à la baisse des effectifs et du taux de recrutement d'une part et de la tendance à la hausse du taux de maintien de l'emploi d'autre part, l'âge médian du personnel devrait continuer d'augmenter au cours des prochaines années.

---

(3) Les données sur les transferts entre conseil scolaires ne comprennent pas l'Ontario pour les années 1975-76 et 1976-77.

AN ANALYSIS OF GROWTH IN THE  
TEACHING STAFF

Provincial Trends in Relation  
to Changing Enrolment

In 1976-77, the total number of teachers(1) reached 195,230, an increase of 0.5% over the previous year and 4% since 1972-73. However, variations occurred by level of education,(2) the elementary sector decreasing by 0.2% since 1975-76 and increasing by 3.5% since 1972-73, the secondary level increasing by 1.5% since 1975-76 and by 5% over the four year period. These changes in the teaching staff reflect changing requirements for teachers at a time when significant enrolment patterns were likewise developing (see Table A for details). Total enrolment(3) decreased 0.8% over 1975-76 and 2.6% over 1972-73. Declines at the elementary level were 1.9% over the past year and 6.4% over the four year period, while secondary enrolment increased 1.5% and 6.2%, respectively.

At the elementary level, it is interesting to note that over the four year period (1972-73 to 1976-77) decreases in enrolment were proportionally greater than decreases in staff in all provinces except Prince Edward Island. In fact, four provinces recorded gains in staff while experiencing an enrolment decline. Over the past year, however, rates of staff decreases have exceeded enrolment decreases in Prince Edward Island, Nova Scotia, New Brunswick and Saskatchewan, thus reversing the four year pattern. The number of teachers declined in Ontario and Manitoba as well but the rates of decreases were less than those for enrolment.

In contrast to the situation at the elementary level over the four year period, Newfoundland, New Brunswick, Ontario and Alberta all recorded greater rates of increase in secondary enrolment than in staff. Over the past year, six provinces maintained the same relationship as for the four year period (1972-73 to 1976-77) while Ontario gained

(1) The following analysis includes full-time teachers only in all provinces except Quebec.

(2) For the purposes of this analysis, the elementary level is defined as kindergarten to Grade 8 and the secondary level as Grade 9 and higher.

(3) Enrolment is as of September 30, with kindergarten students being counted as half-time.

ANALYSE DU TAUX DE CROISSANCE DU  
PERSONNEL ENSEIGNANT

Tendances provinciales en fonction des  
variations de l'effectif étudiant

En 1976-77, le nombre total d'enseignants(1) atteignait 195,230, soit une augmentation de 0.5 % par rapport à l'année précédente et un accroissement de 4 % depuis 1972-73. Toutefois, on constate des variations par niveau d'enseignement(2); au niveau élémentaire, une diminution de 0.2 % du nombre d'enseignants depuis 1975-76 et une augmentation de 3.5 % depuis 1972-73; au niveau secondaire, une augmentation de 1.5 % depuis 1975-76 et une augmentation de 5 % pour l'ensemble de cette période de quatre ans. Ces variations du nombre d'enseignants suivent la courbe d'évolution de la demande d'enseignants à une époque où l'on enregistre des variations notables au niveau des effectifs étudiants (voir le tableau A pour les détails). L'effectif total(3) a régressé de 0.8 % par rapport à 1975-76 et de 2.6 % depuis 1972-73. Au niveau élémentaire, les effectifs ont diminué de 1.9 % par rapport à l'année dernière et de 6.4 % par rapport à l'ensemble de la période de quatre ans; au niveau secondaire, les diminutions ont été respectivement de 1.5 % et de 6.2 %.

Pour l'ensemble de cette période de quatre ans (1972-73 à 1976-77), il est intéressant de constater qu'à l'élémentaire les baisses de l'effectif étudiant ont été proportionnellement plus importantes que celles du personnel enseignant ce, dans toutes les provinces à l'exception de l'Île-du-Prince-Édouard. De fait, quatre provinces ont enregistré simultanément une augmentation du personnel enseignant et une baisse des effectifs. Toutefois, l'année dernière, l'Île-du-Prince-Édouard, la Nouvelle-Écosse, le Nouveau-Brunswick et la Saskatchewan ont connu des taux de diminution du personnel enseignant supérieurs aux baisses d'effectif, soit l'inverse de la tendance observée sur l'ensemble des quatre années. Le nombre d'enseignants a également diminué en Ontario et au Manitoba mais les taux de diminution étaient inférieurs à ceux des effectifs.

Contrairement à la situation observée au niveau élémentaire au cours de la période de quatre ans, Terre-Neuve, le Nouveau-Brunswick, l'Ontario et l'Alberta ont toutes enregistré au niveau secondaire des taux d'augmentation des effectifs supérieurs à ceux du personnel. L'année dernière, six provinces ont conservé le même rapport que pendant la période de quatre ans (1972-73 à 1976-77);

(1) L'analyse suivante porte sur tous les enseignants à plein temps de toutes les provinces sauf le Québec.

(2) Aux fins de la présente analyse, le niveau élémentaire comprend les classes de la maternelle à la 8ième année; le niveau secondaire, 9ième année et suivantes.

(3) Effectif au 30 septembre; les élèves de la maternelle sont comptés à raison d'une demi-journée.

relatively more staff than students and Manitoba and Nova Scotia reduced staff while small enrolment increases took place.

en Ontario, le taux de croissance du personnel enseignant a été proportionnellement supérieur à celui des effectifs; le Manitoba et la Nouvelle-Écosse ont accusé des diminutions du personnel et connu de faibles augmentations des effectifs.

TABLE A. Percentage Changes in Teaching Staff and in Enrolment, by Level of Education, 1972-73 to 1976-77 and 1975-76 to 1976-77

The phenomenon of an increasing teacher population at a time of general decline in enrolment is a function of several factors which have changed over the past few years. Among the factors influencing the ultimate number of teaching positions to be filled, one of the more important is average class size. Although statistics on this factor are not available for all provinces, and thus cannot reflect the situation at the national level, available data are presented below.

Between 1975-76 and 1976-77, class sizes at the elementary level dropped by a full unit in five of eight provinces (see table below). At the secondary level a drop of one was recorded in four provinces, an increase of

Le phénomène de l'augmentation du nombre d'enseignants à une époque où l'on enregistre une baisse généralisée des effectifs dépend de l'évolution de plusieurs facteurs au cours des quelques dernières années. Entre autres, le nombre ultime de postes d'enseignement à combler dépend d'un facteur très comportant: la taille moyenne d'une classe. Bien que l'on ne dispose pas de ce genre de statistiques pour toutes les provinces et qu'on ne saurait de ce fait dresser un tableau de la situation à l'échelle nationale, il est quand même possible d'étudier les données disponibles afin d'arriver à mieux comprendre l'incidence de ce facteur sur la taille du corps enseignant.

Entre 1975-76 et 1976-77, la taille des classes au niveau élémentaire a diminué d'une unité complète dans cinq des huit provinces (voir le tableau suivant). Au niveau secondaire, quatre provinces ont enregistré une baisse d'une unité, deux

one in two provinces, while two remained unchanged. Class sizes in the Atlantic region, in general, are the same and approximately two units greater than in the western provinces. Thus, the general decrease in average class sizes has meant that more teachers have been required than would have been necessary had class sizes remained the same as in the 1975-76 school year.

provinces, une augmentation de deux unités et les deux autres ont conservé le même niveau. Dans l'ensemble, la taille des classes dans les régions de l'Atlantique est demeurée la même et comporte environ deux unités de plus que dans les provinces de l'Ouest. Par conséquent, la diminution généralisée de la taille moyenne des classes signifie qu'il aurait fallu engager plus d'enseignants que si la taille des classes était demeurée au même niveau qu'en 1975-76.

#### Average Class Size, 1975-76, 1976-77

#### Metropolitan and Non-Metropolitan Trends in Teaching Staff and Enrolment

While enrolments have declined over the last five years in all provinces except Alberta,(4) such has not necessarily been the case either by level of education or by metropolitan compared to non-metropolitan areas. In fact, striking differences exist

(4) Alberta expanded its Early Childhood Services programme in 1974-75.

#### Tendances d'évolution du personnel enseignant et des effectifs, régions métropolitaines et non métropolitaines

Bien qu'au cours des cinq dernières années les effectifs aient diminué dans toutes les provinces sauf en Alberta(4), tel n'a pas été nécessairement le cas si l'on fait des comparaisons par niveau d'enseignement ou entre les régions métropolitaines et non métropolitaines. En effet, il existe

(4) L'Alberta a élargi en 1974-75 le cadre de son programme préscolaire (Early Childhood Services).

between and within provinces (Elementary-Secundary School Enrolment, 1975-76 and 1976-77, Catalogue 81-210). These differences and trends are examined below in relation to shifts in the teaching staff, using 1972-73 as the base of comparison.(5)

#### 1. Metropolitan Areas(6)

In all provinces except Ontario, the number of teachers increased between 1972-73 and 1976-77 (from 0.6% in New Brunswick to 15.7% in Nova Scotia). The increases recorded in Prince Edward Island, Nova Scotia, New Brunswick, Manitoba and Saskatchewan had the greatest influence on the overall increase in the number of teaching positions in those provinces. During this same period of time enrolment in the metropolitan areas declined in all provinces except Alberta (ranging from - 0.9% in Ontario to - 12.5% in Nova Scotia).

#### 2. Non-Metropolitan Areas

The teaching staff in the non-metropolitan areas in Prince Edward Island, New Brunswick, Manitoba and Saskatchewan declined since 1972-73 (ranging from - 6.7% in Prince Edward Island to - 0.5% in Manitoba), gains being recorded in all other provinces.

The non-metropolitan gains in Newfoundland, Ontario, Alberta and British Columbia all contributed most significantly to the overall increase of teaching staffs in those provinces.

Between 1972-73 and 1976-77 enrolments increased in Alberta and British Columbia, with declines in the remaining provinces ranging from - 1.8% in Newfoundland to - 11.9% in Saskatchewan.

In general, the area (metropolitan, or non-metropolitan) recording the greater enrolment decrease experienced the lesser staff increase. (The reverse also held true). However, there were several exceptions, the most notable being in Nova Scotia where both

des écarts notables entre les provinces et au sein même des provinces. (Voir la publication de Statistique Canada intitulée: Effectifs des écoles élémentaires et secondaires, 1975-76 et 1976-77, n° 81-210 au catalogue). Nous présentons ci-dessous une étude des écarts et des tendances enregistrés au niveau des variations du nombre d'enseignants, l'année 1972-73 sert de base de comparaison(5).

#### 1. Régions métropolitaines(6)

Dans toutes les provinces sauf en Ontario, il y a eu une augmentation du nombre d'enseignants entre 1972-73 et 1976-77 (ces augmentations s'échelonnent entre 0.6 % au Nouveau-Brunswick et 15.7 % en Nouvelle-Ecosse). Globalement, les augmentations enregistrées à l'Île-du-Prince-Édouard, en Nouvelle-Écosse, au Nouveau-Brunswick, au Manitoba et en Saskatchewan ont eu une incidence majeure sur l'augmentation totale du nombre d'enseignants dans ces provinces. Au cours de cette même période, les effectifs ont diminué dans toutes les provinces sauf en Alberta (les diminutions s'échelonnent entre - 0.9 % en Ontario et - 12.5 % en Nouvelle-Écosse).

#### 2. Régions non métropolitaines

Depuis 1972-73, on constate qu'il y a eu une diminution du personnel enseignant dans les régions non métropolitaines situées à l'Île-du-Prince-Édouard, au Nouveau-Brunswick, au Manitoba et en Saskatchewan (soit entre - 6.7 % à l'Île-du-Prince-Édouard et - 0.5 % au Manitoba); toutes les autres provinces ont enregistré des augmentations.

Les augmentations enregistrées dans les régions non métropolitaines de Terre-Neuve, de l'Alberta et de la Colombie-Britannique ont contribué de façon très significative à l'augmentation globale du personnel enseignant dans ces provinces.

Entre 1972-73 et 1976-77, les effectifs ont augmenté en Alberta et en Colombie-Britannique, et diminué dans les autres provinces (les diminutions s'échelonnant entre - 1.8 % à Terre-Neuve et - 11.9 % en Saskatchewan).

En général, la région (métropolitaine ou non métropolitaine) ayant accusé la baisse d'effectif la plus importante enregistrait l'augmentation de personnel la plus faible. (L'inverse se vérifie également). Toutefois, il y avait plusieurs exceptions, la plus remarquable étant en Nouvelle-Écosse

(5) The major direction of this analysis is in relating variations between metropolitan and non-metropolitan areas. While comparable data for 1976-77 were unavailable at the time this study was being prepared, it is expected that the overall conclusions will apply likewise for the 1976-77 school year.

(6) See appendix for definitions of the metropolitan centres. Data for teachers in Quebec were unavailable at the time this study was being prepared.

(5) Cette analyse vise surtout à comparer les variations entre les régions métropolitaines et les régions non métropolitaines. Bien qu'on ne dispose pas au moment de la préparation de cette étude des données comparables pour 1976-77, il y a tout lieu de croire que les conclusions globales s'appliqueront vraisemblablement à l'année scolaire 1976-77.

(6) Voir l'appendice pour connaître les définitions des centres métropolitains. On ne disposait pas des données du Québec lors de la préparation de cette étude.

enrolment declines and staff gains in the metropolitan areas were approximately three times greater than in the non-metropolitan areas. Ontario, the only province to record a staff decrease in the metropolitan areas, recorded a similar decline in enrolment. However, the non-metropolitan areas of Ontario recorded enrolment declines together with staff increases. In Alberta the situation was similar. Staff growth in the metropolitan centers of Alberta was slightly slower than enrolment growth while in the non-metropolitan areas staff increases were significantly greater than enrolment increases.

### 3. Staff Variations by Level of Education

At the elementary level, all provinces except Prince Edward Island, New Brunswick and Manitoba showed increases in their teacher population between 1972-73 and 1975-76. In these three provinces, the overall decreases were due to declines at the non-metropolitan level, being 10.0%, 2.0% and 1.7% respectively, while the metropolitan areas in these provinces underwent increases of 5.1%, 1.3% and 0.7%. In the remaining provinces, where overall increases occurred at the elementary level, three distinct patterns emerged independent of regional location. In Newfoundland, Nova Scotia, Alberta and British Columbia, both metropolitan and non-metropolitan areas experienced increases. In Ontario, the metropolitan centres showed a decrease of 1.2% while the non-metropolitan areas underwent an increase of 2.0%. The reverse situation occurred in Saskatchewan, where an increase of 5.8% took place in the metropolitan centres, and a decrease of 0.6% occurred in the non-metropolitan areas.

At the secondary level, only New Brunswick, Saskatchewan and Alberta did not increase their teacher population between 1972-73 and 1975-76. New Brunswick showed decreases of 0.6% in both metropolitan and non-metropolitan areas. In Saskatchewan and Alberta the metropolitan centres showed increases of 4.0% and 1.1% respectively and the non-metropolitan areas showed decreases of 3.7% and 11.5% respectively. In the remaining provinces, increases occurred in both the metropolitan and non-metropolitan areas.

### 4. Qualifications by Level of Education

Of equal importance in the study of metropolitan and non-metropolitan areas are the relative qualifications of the teaching staff. As the general teaching population

où les diminutions d'effectif et les augmentations du personnel dans les régions métropolitaines ont été environ trois fois plus grandes que dans les régions non métropolitaines. L'Ontario, seule province à avoir enregistré une baisse du personnel enseignant dans les régions métropolitaines, a également accusé une baisse similaire des effectifs. Toutefois, les régions non métropolitaines de l'Ontario ont enregistré simultanément des diminutions d'effectif et des augmentations du personnel. On constate une situation similaire en Alberta. Dans les centres métropolitains de l'Alberta, le taux de croissance du personnel a été légèrement plus lent que celui de l'effectif, tandis que dans les régions non métropolitaines, les augmentations du personnel ont été beaucoup plus importantes que celles des effectifs.

### 3. Variations du personnel selon le niveau d'enseignement

Au niveau élémentaire, toutes les provinces sauf l'île-du-Prince-Édouard, le Nouveau-Brunswick et le Manitoba ont connu des augmentations du nombre d'enseignants entre 1972-73 et 1975-76. Dans les trois provinces mentionnées, les diminutions globales s'expliquaient par des baisses enregistrées au niveau des régions non métropolitaines (diminutions globales respectives de 10.0 %, 2.0 % et 1.7 %); les régions métropolitaines de ces mêmes provinces connaissaient des augmentations respectives de 5.1 %, 1.3 % et de 0.7 %. Dans les autres provinces où des augmentations ont été enregistrées à l'élémentaire, il se dégage trois tendances distinctes indépendantes du type de région. Tout d'abord, il y a eu des augmentations du personnel dans les régions métropolitaines et non métropolitaines de Terre-Neuve, de la Nouvelle-Écosse, de l'Alberta et de la Colombie-Britannique. Deuxièmement, en Ontario, il y a eu une baisse de 1.2 % dans les centres métropolitains et une augmentation de 2.0 % dans les régions non métropolitaines. Enfin, la situation inverse s'est produite en Saskatchewan, soit une augmentation de 5.8 % dans les centres métropolitains et une diminution de 0.6 % dans les régions non métropolitaines.

Au niveau secondaire, le Nouveau-Brunswick, la Saskatchewan et l'Alberta représentent les seules provinces où le nombre d'enseignants n'a pas augmenté entre 1972-73 et 1975-76. Le Nouveau-Brunswick a enregistré des diminutions de 0.6 % dans les régions métropolitaines et non métropolitaines. En Saskatchewan et en Alberta, les centres métropolitains affichaient des augmentations respectives de 4.0 % et de 1.1 % et les régions non métropolitaines, des diminutions respectives de 3.7 % et 11.5 %. Toutes les autres provinces ont enregistré des augmentations au niveau des régions métropolitaines et non métropolitaines.

### 4. Qualifications selon le niveau d'enseignement

Il est également important dans une étude comparative de ce genre de rapprocher les qualifications relatives du personnel enseignant des régions métropolitaines et non métropolitaines.

has become more qualified with respect to experience and years of education, the traditional disparities between the metropolitan and non-metropolitan teachers have begun to disappear. This is illustrated in the notable decrease between 1972-73 and 1975-76 in the proportion of teachers in the non-metropolitan areas who had fewer than four years of post-secondary education (see Table D for details).

Between 1972-73 and 1975-76, elementary teachers in general became more qualified due largely to provincial changes in certification requirements. The dramatic change during this period of time was the decrease of 23 percentage points in less qualified teachers (three years of education) in the non-metropolitan areas. By 1975-76, little variation in years of post-secondary education existed between the metropolitan and non-metropolitan areas of the Atlantic region and Ontario.

In the Western provinces in 1972-73 there was a rather large disparity between metropolitan and non-metropolitan areas in terms of highly qualified staff (six or more years of post-secondary education). Since that time, these proportions have increased in parallel, the absolute difference remaining fixed.

At the secondary level, the proportion of teachers having four or more years of training did not differ significantly within provinces. However, in Newfoundland and the Western provinces the proportion of staff with six or more years of post-secondary education was much higher in the metropolitan areas in 1972-73, the absolute difference remaining the same in 1975-76. The other provinces showed little variation in proportion between metropolitan and non-metropolitan areas.

## 5. Experience

Over the four year period under consideration the percentage of teachers with fewer than five years of experience decreased by between one and seven percentage points(7) in both the metropolitan and non-metropolitan areas. The group of teachers reporting five to nine years of experience as well as those with ten or more years increased independent of area, while the 25 and over group remained constant throughout.

(7) See Statistics Canada publication: Salaries and Qualifications of Teachers in Public Elementary and Secondary Schools, 1974-75 and 1975-76, Catalogue 81-202.

Puisque le personnel enseignant est devenu plus qualifié du point de vue de l'expérience et du nombre d'années de formation, on commence à voir disparaître les écarts traditionnels entre les enseignants des régions métropolitaines et ceux des régions non métropolitaines. En effet, entre 1972-73 et 1975-76, on constate qu'il y a eu une diminution importante du nombre d'enseignants des régions non métropolitaines qui avaient fait moins de quatre années d'études postsecondaires (voir le tableau D pour les détails).

Entre 1972-73 et 1975-76, les enseignants de l'élémentaire sont devenus plus qualifiés surtout en raison de modifications apportées par les provinces aux exigences d'obtention d'un brevet. La variation de loin la plus importante enregistrée au cours de cette période a été la diminution de 23 points du pourcentage des enseignants les moins qualifiés (soit moins de quatre années d'études) dans les régions non métropolitaines. En 1975-76, on enregistre peu de différence entre le nombre d'années d'études postsecondaires des enseignants des régions métropolitaines et ceux des régions non métropolitaines dans les provinces de l'Atlantique et de l'Ontario.

Dans les provinces de l'Ouest, il y avait en 1972-73 un écart assez important entre les qualifications des enseignants des régions métropolitaines et celles des enseignants des régions non métropolitaines (en ce qui concerne le personnel hautement qualifié: soit six années ou plus d'études postsecondaires). Depuis lors, ces proportions ont augmenté parallèlement, l'écart en valeur absolue demeurant fixe.

Au niveau secondaire, le nombre d'enseignants possédant quatre années ou plus d'études postsecondaires n'a pas considérablement varié d'une province à l'autre. Toutefois, en 1972-73, les régions métropolitaines de Terre-Neuve et des provinces de l'Ouest disposaient d'une proportion très élevée de personnel ayant six années d'études postsecondaires et l'écart absolu est demeuré le même en 1975-76. Proportionnellement, les autres provinces ont enregistré peu de variations entre les régions métropolitaines et non métropolitaines.

## 5. Expérience

Au cours des quatre années observées, le pourcentage d'enseignants ayant moins de cinq années d'expérience a diminué de un à sept points de pourcentage(7) dans les régions métropolitaines et non métropolitaines. Le nombre d'enseignants ayant cinq à neuf années d'expérience ou dix années ou plus a augmenté, indépendamment de la région, le nombre d'enseignants ayant 25 années et plus d'expérience est demeuré constant au cours de cette période.

(7) Voir la publication de Statistique Canada intitulée: Traitements et qualifications des enseignants des écoles publiques primaires et secondaires, 1974-75 et 1975-76, n° 81-202 au catalogue.

## 6. Salaries

In general, the relatively larger increase in qualifications of non-metropolitan teachers resulted in a reduction in salary disparities. In 1972-73 the average difference between metro and non-metro average salaries was \$776. By 1975-76 the difference had been reduced to \$670, a 13% decrease.

The smallest difference in average salaries between metropolitan and non-metropolitan areas was recorded in New Brunswick (a difference of \$270 in 1972-73, \$194 in 1975-76), the metropolitan and non-metropolitan areas having almost identical qualifications and experience. The largest discrepancy occurred in Manitoba (\$1,575 in 1972-73, \$1,353 in 1975-76), the variations in qualifications between the metropolitan and non-metropolitan areas being the largest in the country, while the variation in experience was the third highest.

A study of average salaries in the metropolitan and non-metropolitan centres indicates that while the range of salaries in the metropolitan areas increased between 1972-73 and 1975-76, it decreased in the non-metropolitan areas (see Table B).

## 6. Traitements

De façon globale, le relèvement assez important du niveau des compétences des enseignants des régions non métropolitaines a permis de réduire l'écart entre les traitements. En 1972-73, l'écart moyen entre les traitements des enseignants des régions métropolitaines et ceux des régions non métropolitaines s'élevait à \$776. En 1975-76, cet écart était passé à \$670, soit une diminution de 13 %.

C'est le Nouveau-Brunswick qui a enregistré l'écart de traitement moyen le moins élevé entre les enseignants des régions métropolitaines et ceux des régions non métropolitaines (soit un écart de \$270 en 1972-73 et de \$194 en 1975-76), les qualifications et l'expérience des enseignants étant presque identiques dans les deux types de régions. Le Manitoba a enregistré l'écart le plus considérable (\$1,575 en 1972-73, \$1,353 en 1975-76), les différences des qualifications entre les enseignants des régions métropolitaines et ceux des régions non métropolitaines y étant les plus considérables au pays, d'une part et d'autre part, l'écart entre les niveaux d'expérience dans cette province se situant au troisième rang national.

D'après une étude sur les traitements moyens des enseignants des centres métropolitains et non métropolitains, l'écart de traitements des enseignants des régions métropolitaines s'est élargi entre 1972-73 et 1975-76 alors qu'il a rétréci dans les régions non métropolitaines (voir le tableau B).

(1) Individual metropolitan centres have been combined in each province. — On a réuni les centres métropolitains isolés de chacune des provinces.  
(2) Average years teaching experience. — Nombre moyen d'années d'expérience dans l'enseignement.  
(3) Average years education approved for salary purposes. — Nombre moyen d'années de scolarité approuvées à des fins de rémunération.

The range of total salaries in 1972-73 in the metropolitan areas was \$254 more than those in the non-metropolitan areas. By 1975-76, this increased to \$661. This latter increase was due primarily to the increase at the elementary level (a range increase of \$1,095), while at the secondary level it was up by \$323.

In summary, the average salaries in the metropolitan areas have become more variant between 1972-73 and 1975-76, while they have become less so in the non-metropolitan areas.

#### An Analysis of the Distribution of Staff by Teaching Position

Previous issues of this publication presented the distribution of teachers by teaching level and sex. The present issue provides not only a basis for a historical comparison of these factors but introduces three significant variables: size of school and experience and qualifications of teachers.

In 1976-77 at the elementary(8) level (both provincially and nationally) the proportion of male principals increases in direct relation to the school enrolment (from 67% males in schools with enrolments under 100 to 92% in schools with enrolments exceeding 400). With the exception of Newfoundland, this phenomenon exists nationally for vice-principals as well, although the proportions are somewhat smaller (62% males in schools with enrolments under 100 to 82% in schools with enrolments exceeding 400).

The large majority of elementary schools enrol between 100 and 400 students. While the trends described above hold true for schools of this size, the proportions of male and female administrators vary regionally. For example, in the Atlantic region, where the female proportion of the total teaching staff varies from 64% to 78%, the female proportion of principals ranges from 22% to 35%. In the remaining provinces, while females constitute between 66% and 70% of the total staff, the proportion of female principals varies from 7% to 14%. The proportions are similar for vice-principals, exceeding 30% in the Atlantic provinces and Manitoba and in the remaining provinces ranging from 7% in British Columbia to 27% in Alberta.

(8) In 1976-77, the proportion of female elementary teachers was 68%.

Comme l'indique également le tableau B, pour l'ensemble des enseignants il y avait en 1972-73 un écart de \$254 entre les traitements moyens des enseignants des régions métropolitaines et ceux des régions non métropolitaines. En 1975-76, cet écart s'élevait à \$661. Cet élargissement de l'écart a surtout été causé par l'accroissement enregistré à l'élémentaire (un écart de \$1,095); au secondaire, l'écart s'élevait à \$323.

En résumé, les traitements moyens des enseignants des régions métropolitaines ont enregistré une amplification de leur variation entre 1972-73 et 1975-76, alors que dans les régions non métropolitaines ils ont eu tendance à se stabiliser.

#### Analyse de la répartition du personnel selon le statut d'enseignement

Les numéros précédents de cette publication présentaient la répartition des enseignants selon le niveau et le sexe. Le présent bulletin fournit non seulement une base à des fins de comparaison chronologique mais introduit également trois variables significatives: la taille de l'école, l'expérience et les qualifications des enseignants.

En 1976-77, au niveau élémentaire(8) (à l'échelle provinciale et nationale), l'augmentation du nombre de directeurs (hommes) a été directement proportionnelle à la taille de l'effectif (les proportions de directeurs variant de 67 % dans les écoles où l'effectif est inférieur à 100 à 92 % dans les écoles où l'effectif dépasse 400). On constate également le même phénomène chez les sous-directeurs dans l'ensemble du Canada, sauf à Terre-Neuve, bien que les proportions soient un peu plus faibles (elles varient de 62 % d'hommes sous-directeurs dans les écoles comptant moins de 100 élèves à 82 % dans les écoles dépassant 400).

L'effectif de la grande majorité des écoles élémentaires se situait entre 100 et 400 élèves. Bien que les tendances que l'on vient de décrire soient valables globalement pour des écoles de cette taille, les proportions d'hommes et de femmes administrateurs varient d'une région à l'autre. Par exemple, dans les provinces de l'Atlantique, où les femmes représentent entre 64 et 78 % de l'ensemble du personnel enseignant, le nombre de directrices varie entre 22 et 35 %. Dans les autres provinces, les femmes représentent entre 66 et 70 % du personnel enseignant total et de 7 à 14 % des directrices d'écoles. Les proportions chez les sous-directrices sont similaires, soit supérieures à 30 % dans les provinces de l'Atlantique et au Manitoba et dans les autres provinces s'échelonnant entre 7 % en Colombie-Britannique et 27 % en Alberta.

(8) En 1976-77, la proportion d'enseignantes à l'élémentaire s'élevait à 68 %.

The second largest number of schools enrol between 400 and 699 students. In these schools, the proportion of female principals is 12% or less, excepting Newfoundland(22%). For vice-principals, these proportions are relatively higher in the Atlantic region (34% to 36% in Newfoundland, Prince Edward Island and Nova Scotia) than in the remaining provinces (from 6% in British Columbia to 28% in Alberta).

At the secondary(9) level, males fill almost all principalships, particularly in the larger schools, the only province having more than 10% female principals in schools of less than 400 students being Newfoundland (32%). In no province does the proportion of female principals exceed 5% in schools having more than 400 students.

Although there are proportionally more female vice-principals, nowhere does the proportion exceed 15% except in schools of less than 400 students in Ontario and Manitoba.

Female representation increases significantly at the department head level. For example, in schools of 400 to 699 students, five provinces have more than 20% females (ranging from 21% in Prince Edward Island to 37% in Nova Scotia). In schools of 700 to 999 students, the female representation varies from 9% in Saskatchewan to 26% in Manitoba, only two provinces exceeding 20%. While in schools exceeding 1,000 students in Nova Scotia, New Brunswick and Ontario, the proportion of female department heads approximates their representation in the schools. This phenomenon is repeated only for Manitoba in schools having 700 to 999 students.

In brief, it is apparent that the distribution of female teachers in senior positions is significantly smaller than their representation of the total teaching force, particularly at the secondary level (the relative distribution has not changed significantly since 1972-73). Females who do hold senior positions tend to be employed in smaller schools. Relative to males in similar positions, female teachers are less well qualified in terms of years of education, but have more years of teaching experience.

(9) In 1976-77, the proportion of female secondary teachers was 31%.

Viennent au deuxième rang les écoles ayant un effectif situé entre 400 et 699 élèves. Dans ces écoles, la proportion de directrices est de 12 % ou moins, sauf à Terre-Neuve (22 %). Les proportions de sous-directrices sont relativement plus élevées dans les provinces de l'Atlantique (34 % à 36 % à Terre-Neuve, à l'Île-du-Prince-Édouard et en Nouvelle-Écosse) que dans les autres provinces (s'échelonnant entre 6 % en Colombie-Britannique et 28 % en Alberta).

Au niveau secondaire(9), les hommes occupent presque tous les postes de directeurs, surtout dans les écoles les plus importantes, Terre-Neuve est la seule province à avoir plus de 10 % de directrices, qui se trouvent dans les écoles de moins de 400 étudiants (soit 32 %). Dans les écoles de plus de 400 élèves, il n'y a aucune province où la proportion de directrices dépasse 5 %.

Bien qu'il y ait proportionnellement plus de femmes sous-directrices que directrices, la proportion ne dépasse jamais 15 % sauf dans les écoles de moins de 400 élèves de l'Ontario et du Manitoba.

La participation féminine a considérablement augmenté au niveau des postes de chefs de département. Par exemple, dans les écoles de 400 à 699 élèves, cinq provinces comptent plus de 20 % de femmes chefs de département (les proportions s'échelonnent de 21 % à l'Île-du-Prince-Édouard à 37 % en Nouvelle-Écosse). Dans les écoles de 700 à 999 élèves, la participation féminine s'échelonne de 9 % en Saskatchewan à 26 % au Manitoba, deux provinces seulement dépassent 20 %. Dans les écoles de 1,000 élèves et plus situées en Nouvelle-Écosse, au Nouveau-Brunswick et en Ontario, la proportion de femmes chefs de département égale à peu près leur représentation dans les écoles. Ce phénomène ne se répète qu'au Manitoba dans les écoles de 700 à 999 élèves.

Au total, on constate que le nombre d'enseignantes occupant des postes supérieurs est nettement plus faible que leur proportion au sein de l'ensemble du corps enseignant, plus particulièrement au niveau secondaire (la répartition relative n'a pas tellement varié depuis 1972-73). Les femmes occupant des postes supérieurs ont tendance à travailler dans des écoles plus petites. Comparativement aux hommes occupant les mêmes postes, les enseignantes sont moins qualifiées pour ce qui est du nombre d'années d'études mais possèdent toutefois plus d'années d'expérience.

(9) En 1976-77, la proportion d'enseignantes au secondaire s'élevait à 31 %.

## PREFACE

Statistics Canada has published an annual report on the qualifications, salary and experience of teachers in public elementary and secondary schools since 1939, with the exception of 1950-51, 1951-52 and 1955-56. Basic data for these three years are contained in the historical tables of the 1970-71 and 1971-72 issue.

Compared with the 1970-71 and 1971-72 issue, the detail and number of statistical tables have been reduced in this publication. However, tables comparable to those produced in previous publications are available. In addition, a generalized data retrieval system is now available, allowing users a variety of detailed statistical tables.

Percentage distributions of educators in the non-public sectors (private, Indian Affairs and DND Overseas) have been introduced. Statistics on these educators appear in Appendix A and include the following variables: teaching position and level, age, years of post-secondary education, highest university degree, and province or country of initial teaching certificate.

This report was prepared in the Elementary-Secondary Education Section of the Education, Science and Culture Division by M. Vigder and J. Seidle. Technical assistance was provided by A. Tamarit, A. Monsour, J. Stanic and L. Frederick.

PETER G. KIRKHAM,  
Chief Statistician of Canada.

## PRÉFACE

Statistique Canada a publié, chaque année depuis 1939 (sauf pour les années scolaires 1950-51, 1951-52 et 1955-56), un bulletin sur les qualifications, le traitement et l'expérience des enseignants des écoles primaires et secondaires publiques. Les données de base pour les trois années exclues figurent dans les tableaux chronologiques du numéro de 1970-71 et 1971-72.

Les tableaux statistiques sont moins nombreux et moins détaillés dans la présente publication comparativement à celles des années 1970-71 et 1971-72. Vous pouvez vous procurer des tableaux semblables à ceux présentés dans les publications antérieures. De plus, un système généralisé d'extraction des données permet aux utilisateurs d'obtenir divers tableaux statistiques détaillés.

Le bulletin donne maintenant les répartitions en pourcentage du personnel d'enseignement des établissements qui ne sont pas sous régie publique (écoles privées, écoles du ministère des Affaires indiennes et du Nord et écoles du ministère de la Défense nationale situées outre-mer). Les données, présentées à l'appendice A, sont ventilées selon les variables suivantes: statut d'enseignement, niveau, âge, nombre d'années d'études postsecondaires, grade universitaire le plus élevé et province ou pays d'obtention du premier brevet d'enseignement.

Ce bulletin a été rédigé par M. Vigder et J. Seidle de la Section de l'enseignement élémentaire et secondaire de la Division de l'éducation, des sciences et de la culture, avec la collaboration technique de A. Tamarit, A. Monsour, J. Stanic et L. Frederick.

Le statisticien en chef du Canada,  
PETER G. KIRKHAM.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- <sup>r</sup> revised figures.
- <sup>x</sup> confidential to meet secrecy requirements of the Statistics Act.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- <sup>x</sup> confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## HIGHLIGHTS

- Total teaching staff in 1977-78 was 196,037 of which 123,465 were elementary and 72,572 were secondary.
- Total teaching staff increased by .4% between 1976-77 and 1977-78.
- Approximately 18,600 educators terminated their employment in 1975-76 (9% of the total staff for that year).
- The majority of terminations were female elementary classroom teachers having a bachelor's degree and fewer than six years of teaching experience in their current province.
- The national rate of retention of the teaching force in 1977-78 was 92% compared with 84% in 1970-71.
- The national recruitment rate of the teaching force in 1977-78 was 8%, compared with 16% in 1970-71.
- An estimated 15,900 teachers were recruited in 1977-78.
- The proportion of new hirings coming from post-secondary institutions decreased to 50% in 1977-78.
- Median salary of all teaching staff in 1977-78 was 18,408, an increase of 11% from 1976-77.
- Median age of teaching staff in 1977-78 was 34.3 years.
- Median years of teaching experience in 1977-78 was 9.0.
- Sixty-two per cent of the elementary teaching staff and 88% of the secondary teaching staff in 1977-78 reported having at least one degree.

## POINTS SAILLANTS

- Le personnel enseignant se chiffrait au total à 196,037 personnes en 1977-78, dont 123,465 au niveau élémentaire et 72,572 au niveau secondaire.
- Le personnel enseignant, au total, a enregistré une augmentation de .4 % entre 1976-77 et 1977-78.
- Environ 18,600 membres du personnel enseignant ont quitté leur emploi en 1975-76, soit 9 % de l'ensemble du personnel.
- La plupart des départs ont été enregistrés chez les enseignantes de l'élémentaire qui possédaient un baccalauréat et avaient moins de six ans d'expérience dans leur province d'enseignement.
- Le taux national de maintien de l'emploi du personnel enseignant a été de 92 % en 1977-78 par rapport à 84 % en 1970-71.
- Le taux national de recrutement du personnel enseignant a été de 8 % en 1977-78 par rapport à 16 % en 1970-71.
- On estime à 15,900 le nombre d'enseignants recrutés en 1977-78.
- Le pourcentage de nouveaux enseignants venant des établissements postsecondaires a enregistré une diminution, à 50 % en 1977-78.
- Le traitement médian de tout le personnel enseignant était de 18,408 en 1977-78, soit une augmentation de 11 % par rapport à 1976-77.
- L'âge médian du personnel enseignant était de 34.3 ans en 1977-78.
- L'expérience médiane des enseignants était de 9.0.
- En 1977-78, 62 % du personnel enseignant au niveau élémentaire et 88 % du personnel enseignant au niveau secondaire ont déclaré qu'ils détenaient au moins un diplôme.

## INTRODUCTION

Since June of 1977 four issues of this publication have been produced covering the period from 1972-73 to 1977-78. The most significant development in elementary-secondary education during this five-year period has been the general decline in enrolment. It is within this context that the movements into and out of the teaching profession have been measured and the trends assessed. In addition, an in-depth study of the characteristics of educators entering and leaving the profession has been undertaken. The current issue of this publication represents the culmination in the study of this aspect of the teaching force.

The first issue in this series of publications dealt with the general change in the rate of growth or decline of the teaching force. Historical trends in the rates of recruitment, retention and losses of the teaching staff were examined.

The second publication updated the findings with respect to retention, recruitment and losses with particular emphasis on recruitment. The characteristics of the recruits were studied over the long and short term.

The third and most recent issue of the publication, while maintaining the review of the retention, recruitment and losses of educators, placed the growth and/or decline of the teaching force in the context of declines in enrolment. The analysis of these trends was conducted at the metropolitan level for the first time, and complemented the analysis presented in the 1975-76 and 1976-77 issues of the enrolment publication (Catalogue 81-210).

The analysis contained in this publication concerns those teachers who terminated their employment between the 1975-76 and 1976-77 school years. It should be noted, however, that these findings can also be generalized to those teachers who terminated over the past four years.(1)

### Scope of Data

The school year 1977-78 is covered in this publication. Detailed statistical tables comparable to those produced in previous publications are available.

(1) An identical analysis was conducted on terminations from 1973-74 with similar results.

Depuis juin 1977, Statistique Canada a publié dans la présente série quatre bulletins qui traitent des années 1972-73 à 1977-78. Au cours de ces cinq années, l'évolution de l'enseignement élémentaire et secondaire a été marquée principalement par la diminution générale des effectifs scolaires. C'est donc dans cette optique que l'on a étudié les arrivées et les départs du personnel d'enseignement et évalué les tendances. On a, de plus, entrepris une étude approfondie des caractéristiques des enseignants qui débutent dans la profession et de ceux qui la quittent. Le présent bulletin fait état des résultats obtenus dans le cadre de cette étude.

Le premier bulletin de la série porte sur l'évolution générale du personnel d'enseignement du point de vue de son augmentation ou de sa diminution. On y dégage des tendances chronologiques touchant le recrutement, le maintien et les départs.

Le deuxième bulletin, bien qu'il renferme des données à jour sur ces trois derniers sujets, s'arrête surtout au recrutement. On y examine, sur une longue et sur une courte période, les caractéristiques des personnes engagées.

Le troisième bulletin contient, outre des éléments d'information sur le recrutement, le maintien et les départs, des données sur l'augmentation ou la diminution du personnel d'enseignement sous l'angle de la baisse des effectifs scolaires. L'analyse de ces tendances, qui a été effectuée au niveau des régions métropolitaines pour la première fois, complète l'étude présentée dans les bulletins de 1975-76 et de 1976-77 sur les effectifs scolaires (n° 81-210 au catalogue).

L'analyse du présent bulletin a pour objet les enseignants qui ont quitté leur emploi entre les années scolaires 1975-76 et 1976-77. Il faut toutefois noter que les résultats obtenus peuvent également s'appliquer aux personnes qui ont quitté l'enseignement au cours des quatre dernières années(1).

### Champ d'application des données

La présente publication porte sur l'année scolaire 1977-78. On peut se procurer des tableaux statistiques détaillés semblables à ceux contenus dans les publications antérieures.

(1) Une analyse du même genre sur les départs qui se sont produits en 1973-74 a donné des résultats semblables.

This survey includes all full-time school instructional, supervisory and administrative personnel and board staff instructing in schools at the beginning of the school year 1977-78. Excluded from this report are all part-time educators, and supervisory and consultant personnel in the departments of education and local board offices (for example, superintendents, directors, supervisors, psychologists, social workers and others involved in pupil-personnel services or non-teaching activities). Each educator is counted once only even if more than one position is held. Figures appearing in this publication may differ from those published by provincial departments of education. These differences are, for the most part, due to variations in the definition of the educator population.

The survey excludes educators employed in private schools and those in special education schools operated directly by provincial governments. Educators identified as "unclassified" in some of the statistical tables are those who completed a questionnaire but failed to report one or more items under consideration.

#### Method

All Departments of Education survey each public school educator in their respective provinces. Each school board office is required to verify that each educator under its employ has completed a questionnaire, which is then forwarded to the Department of Education. In all cases, data from the questionnaires are processed and placed on computer tapes. Internal consistency of the information is ensured in various verification procedures. Statistics Canada is responsible for the processing of data from Newfoundland, Prince Edward Island, New Brunswick, the Yukon, Northwest Territories, private and Indian Affairs schools and the DND schools located overseas. Data from the remaining provinces are processed by the provincial Departments of Education who forward computer tapes of the results to Statistics Canada. This procedure ensures that virtually 100% of all staff are surveyed and data are of high quality. Limitations respecting particular information supplied are provided on pages 10 and 11 under the title "Limitations".

#### Definitions

In this publication, the term educator includes teachers, principals, vice-principals, department heads and supervisors. (The term administrator refers to all principals, vice-principals and department heads. The term teacher refers to all other educators.)

L'enquête vise tous les enseignants, surveillants et administrateurs à plein temps ainsi que le personnel des conseils scolaires qui travaillaient dans les écoles au début de l'année scolaire 1977-78. Sont exclus le personnel d'enseignement à temps partiel, les surveillants et les conseillers des ministères de l'Éducation et des bureaux des conseils scolaires (par exemple, les surintendants, les directeurs, les surveillants, les psychologues, les travailleurs sociaux et les personnes chargées des services aux élèves et d'activités autres que l'enseignement). Chaque personne n'est comptée qu'une fois même si elle occupe plus d'un poste. Les chiffres figurant dans ce bulletin peuvent être différents de ceux publiés par les ministères provinciaux de l'Éducation. Ces différences s'expliquent surtout par le fait que la définition de "personnel d'enseignement" n'est pas la même.

L'enquête ne vise pas le personnel d'enseignement des écoles privées ni celui des écoles spéciales qui relèvent directement des administrations provinciales. Le personnel classé dans la catégorie "non déclaré" dans certains tableaux statistiques est celui qui a rempli un questionnaire, mais a omis de répondre à une ou plusieurs questions à l'étude.

#### Méthode

Tous les ministères de l'Éducation mènent dans leur province une enquête auprès de chaque membre du personnel d'enseignement des écoles publiques. Tous les bureaux des conseils scolaires doivent vérifier si les membres du personnel à leur service ont tous rempli un questionnaire, lequel est ensuite envoyé au ministère intéressé. Les données fournies sur les questionnaires sont traitées, puis enregistrées sur bande magnétique. Diverses méthodes de vérification permettent d'assurer la compatibilité interne des données. Statistique Canada s'occupe du traitement des données recueillies à Terre-Neuve, à l'Île-du-Prince-Édouard, au Nouveau-Brunswick, au Yukon et dans les Territoires du Nord-Ouest ainsi que dans toutes les écoles privées, dans les écoles qui relèvent du ministère des Affaires indiennes et du Nord et dans les écoles du ministère de la Défense nationale situées outre-mer. Dans les autres provinces, les données recueillies sont traitées par le ministère de l'Éducation, qui expédie à Statistique Canada les résultats enregistrés sur bande magnétique. Ainsi, la quasi-totalité des membres du personnel d'enseignement est prise en compte dans le cadre de l'enquête et les données sont d'excellente qualité. Les limites de certains genres de données sont indiquées aux pages 10 et 11, sous la rubrique "Restrictions".

#### Définitions

Aux fins de la présente publication, l'expression personnel d'enseignement désigne les enseignants, les directeurs, les sous-directeurs, les chefs de département et les surveillants. (Le terme administrateur désigne tous les directeurs, sous-directeurs et chefs de département et le terme enseignant, tous les autres membres du personnel.)

Public schools are those schools which are operated by local school boards and which are supported by local taxation and supplemented by provincial grants in accordance with the education acts of the provinces or territories in which they are located. Included under this definition are the denominational schools of Newfoundland, and the Protestant and Roman Catholic Separate schools where such exist. Schools located on Department of National Defence bases across Canada are also included since they operate within the framework of the public schools of the provinces in which they are located.

#### Teaching Level

Educators are classified as elementary or secondary according to the grade levels they teach and/or supervise.

For statistical purposes the following definitions were used to arrive at "teaching level":

- (a) An educator who teaches or supervises any grade or combination of grades from pre-Grade 1 through Grade 8 but no grades above 8, is classified as "elementary". (In British Columbia read Grade 7 in place of Grade 8.)
- (b) An educator who teaches or supervises any grade or combination of Grades 9 through 13 but no grade below 9, is classified as "secondary". (In British Columbia read Grade 8 in place of Grade 9.)

The above criteria do not apply to a number of educators. Some did not answer the appropriate question while others teach or supervise at both levels. In these cases, an arbitrary assignment of teaching level was made based on the following criterion:

- (c) If an educator was assigned to a specific school, the level of the school was assumed to be the level of teaching. For example, a school offering Grades 1-10 is defined as elementary while a school offering Grades 7-12 is defined as secondary.

The above criteria provide for historical continuity. In the past, due to a lack of additional data, educators who did not meet the above criteria were assigned the secondary level if teaching in more than one school,

Les écoles publiques sont toutes celles qui relèvent des conseils scolaires locaux et qui sont financées par les impôts locaux auxquels viennent s'ajouter des subventions provinciales en vertu de la Loi sur l'éducation de la province ou du territoire dans lequel ces écoles sont situées. Ce terme désigne également les écoles confessionnelles de Terre-Neuve et les écoles protestantes et catholiques romaines séparées; les écoles situées dans les bases militaires du ministère de la Défense nationale au Canada font également partie de cette catégorie puisqu'elles sont considérées au même titre que les écoles publiques des provinces.

#### Niveau (d'enseignement)

Le personnel d'enseignement est considéré comme travaillant au niveau élémentaire ou secondaire selon les classes auxquelles il enseigne et (ou) qu'il surveille.

Aux fins de la statistique, voici le détail de la définition du terme "niveau d'enseignement":

- a) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes du pré-élémentaire à la 8<sup>e</sup> année, mais non dans les classes supérieures à la 8<sup>e</sup> année, est classé au niveau "élémentaire". (Dans le cas de la Colombie-Britannique il s'agira de la "7<sup>e</sup> année" au lieu de "8<sup>e</sup> année".)
- b) Le personnel d'enseignement qui enseigne ou surveille dans une ou plusieurs classes de la 9<sup>e</sup> à la 13<sup>e</sup> année, mais non dans les classes inférieures à la 9<sup>e</sup> année, est classé au niveau "secondaire". (Dans le cas de la Colombie-Britannique c'est la "8<sup>e</sup> année" au lieu de "9<sup>e</sup> année".)

Certains membres du personnel d'enseignement n'entrent pas dans ces catégories parce qu'ils n'ont pas répondu à la question pertinente ou parce qu'ils enseignent ou surveillent dans des classes aux deux niveaux. Dans ces cas, on a déterminé le niveau d'enseignement de façon arbitraire en se fondant sur le critère suivant:

- c) Si un membre du personnel d'enseignement est affecté à une école particulière, on suppose que le niveau de l'école est le niveau d'enseignement de la personne. Par exemple, une école qui offre des cours de la 1<sup>ère</sup> à la 10<sup>e</sup> année est une école élémentaire et celle qui dispense des cours de la 7<sup>e</sup> à la 12<sup>e</sup> année est une école secondaire.

Ces critères permettent une certaine continuité dans le temps. Dans le passé, en raison d'un manque de données, le personnel qui ne répondait pas aux critères ci-dessus était classé au niveau secondaire s'il travaillait dans plus d'une école;

otherwise they were classified as elementary. More precise data now being available, the following criteria have been introduced:

- (d) If the question requesting the per cent of time teaching or supervising Grades K-8 and/or 9-13 was answered, the level of the higher percentage was assigned.
- (e) If the information noted in (d) above was not available but the specific grades taught and/or supervised were reported, the level was assigned according to the level of the majority of grades.

If none of the above conditions were met, the educator was assigned the elementary level.

Tenure is defined as the number of years of experience with the present school board, which may or may not be continuous.

Years of Education Approved for Salary Purposes (Years of Post-secondary Education)

The number of years of education approved for salary purposes is defined as the number of years of education beyond the equivalent of the junior matriculation level recognized for salary placement purposes. In the Atlantic provinces the certification schemes perform this function while in Ontario and the Western provinces specific questions were asked to provide this information. Every teacher was assigned a numerical value which gives the number of years of education beyond secondary school graduation recognized for salary or grant purposes.

Methods of Calculation

Salary

Respondents were requested to report their annual contract salary to the nearest dollar as of the date of completion of the questionnaire. Median and percentile salaries were calculated on these reported salaries based on intervals of \$10. Educators not reporting salaries were excluded from the calculations.

Age

The questionnaire requested the date of birth of each respondent. In the tables of this report, age is calculated as of December 31 of the year under review. For example, age data collected for the 1977-78 school year are calculated as of December 31, 1977.

autrement, on le considèrerait comme étant au niveau élémentaire. Comme nous disposons actuellement de données plus précises, nous avons établi les critères suivants.

- d) Si l'enquêté a répondu à la question relative au pourcentage de temps consacré à l'enseignement ou à la surveillance de la 1<sup>ère</sup> à la 8<sup>e</sup> année et (ou) de la 9<sup>e</sup> à la 13<sup>e</sup> année, on lui a attribué le niveau correspondant au pourcentage le plus élevé.
- e) Si l'enquêté n'a pas fourni les renseignements dont il est question en d) ci-dessus, mais qu'il a déclaré les classes dans lesquelles il enseignait et (ou) surveillait, on lui a attribué le niveau correspondant à la majorité des classes.

Si l'enseignant ne répondait à aucune des conditions mentionnées, on le classait au niveau élémentaire.

Le terme états de service (service courant) désigne le nombre d'années d'expérience dans l'enseignement au sein du conseil scolaire actuel, que le service soit continu ou non.

Années de scolarité reconnues aux fins de calcul de la rémunération (années de formation au niveau postsecondaire)

Ce terme désigne les années d'études, au-delà de l'équivalent de l'immatriculation junior, reconnues aux fins de l'établissement des traitements. Dans les provinces de l'Atlantique, c'est le régime de brevets qui joue ce rôle, tandis qu'en Ontario et dans les provinces de l'Ouest, on a dû poser des questions précises en vue d'obtenir ces renseignements. On a attribué à chaque personne une valeur numérique indiquant le nombre d'années de scolarité, au-delà du cycle secondaire, reconnues aux fins de l'établissement des traitements ou des subventions.

Méthodes de calcul

Traitement

On a demandé aux enquêtés de déclarer leur traitement annuel au dollar près à la date à laquelle ils ont rempli le questionnaire. Les traitements médians et ceux de chaque percentile ont été calculés, en fonction des traitements déclarés, par intervalles de \$10. Le personnel qui n'a pas déclaré son traitement a été exclu des calculs.

Âge

Chaque enquêté devait déclarer sa date de naissance. Dans les tableaux de la présente publication, l'âge est calculé au 31 décembre de l'année à l'étude. Ainsi, les données sur l'âge recueillies pour l'année scolaire 1977-78 sont calculées au 31 décembre 1977.

## Experience

Experience is calculated on the basis of ten months equalling one school year. For example, 7-8 indicates seven years and eight months and is synonymous with 7.8 years. All experience is considered as of June 30 of the previous school year. For example, the number of years of experience reported by teachers in the 1977-78 school year is as of June 30, 1977.

## Limitations

Some salary contracts were still unresolved when the questionnaires were completed and a number of contracts were negotiated retroactively covering periods of one to two years. Caution must therefore be exercised when making interprovincial and historical comparisons. In addition, it should be recognized that variations in median salary do not necessarily indicate variations in the salary schedules on which educators were paid. Since salaries are based on both years of training and years of teaching, changes in the distribution of either of these two factors could cause an increase in the median salary while the salary scale remained unchanged.

The classification of teaching level has been arbitrarily established and as such does not correspond to all provincial definitions. Furthermore, the proportion of educators with teaching assignments covering both the elementary and secondary levels of education varies widely from one province to another. Therefore, caution must be exercised when making interprovincial comparisons.

The present classification was established in 1968-69, rendering invalid any historical comparisons prior to that school year. (See publications prior to 1968-69 for exact definitions previously in use.) For most provinces, the change in definition resulted in an increase in the proportion of teachers classified as "elementary".

Statistics on the non-public educators in Appendix A are presented as percentage distributions only. This was necessary due to the under-reporting of data in these sectors.

Prior to 1970-71, educators in schools operated by the Department of Indian and Northern Affairs in Arctic Quebec were included with those of the Northwest Territories. Since 1970-71, educators in Arctic Quebec have been excluded from the publication.

## Expérience

L'expérience est calculée en fonction d'une période d'enseignement de dix mois correspondant à une année scolaire. Par exemple, 7-8 signifie sept ans et huit mois et est synonyme de 7.8 années. Toute expérience est relevée au 30 juin de l'année scolaire précédente. Ainsi, le nombre d'année d'expérience déclaré par le personnel pour l'année scolaire 1977-78 est compté au 30 juin 1977.

## Restrictions

Quelques échelles de traitements contractuels étaient encore indéterminées au moment où les enquêteurs ont rempli les questionnaires et un certain nombre de conventions ont été négociées avec un effet rétroactif de un à deux ans. Il faut donc être prudent lorsqu'il s'agit d'établir des comparaisons d'une province à l'autre et d'une période à l'autre. De plus, il y a lieu de signaler que les variations du traitement médian ne signifient pas nécessairement que les échelles de traitement du personnel d'enseignement ont fluctué. Comme les traitements sont fondés à la fois sur les années d'études et les années d'expérience dans l'enseignement, des variations au chapitre de l'un ou l'autre de ces deux facteurs pourraient entraîner un relèvement du traitement médian, tandis que l'échelle de traitement demeurerait la même.

La classification selon le niveau d'enseignement a été déterminée de façon arbitraire et, en tant que telle, ne correspond pas aux définitions en usage dans toutes les provinces. De plus, la proportion du personnel d'enseignement dont les fonctions chevauchent les niveaux élémentaire et secondaire varie beaucoup d'une province à l'autre. Il faut donc, ici encore, être prudent lorsqu'il s'agit d'établir des comparaisons interprovinciales.

La classification actuelle a été établie en 1968-69; ainsi, il n'est possible de faire des comparaisons historiques qu'auprès de cette année scolaire. (Voir les publications antérieures à 1968-69 pour connaître les définitions précédemment utilisées.) La modification de la définition a engendré, dans la plupart des provinces, une augmentation de la proportion du personnel classé au niveau "élémentaire".

Les données de l'appendice A sur le personnel des établissements qui ne sont pas sous régie publique ne sont exprimées qu'en pourcentages à cause de la sous-représentation qui existe dans ce secteur.

Avant 1970-71, le personnel d'enseignement qui travaillait dans les écoles de l'Arctique québécois relevant du ministère des Affaires indiennes et du Nord était compris avec celui des Territoires du Nord-Ouest. Depuis 1970-71, il n'est plus visé par l'enquête.

RATES OF RETENTION, RECRUITMENT  
AND LOSSES

The national retention rate in 1977-78 was 92% (up from 91% in 1976-77), ranging from 71% in the Northwest Territories to a high of 95% in Nova Scotia. The retention rates increased in all provinces except Newfoundland and Alberta (remaining unchanged at 92%), and the Northwest Territories (declining from 73% to 71%).

The general increase in retention rates, combined with an initially small increase in staff had a significant impact on the rates of teacher losses and recruitment.

The national rate of losses to the teaching force in 1977-78 was 8%, ranging from a high of 29% in the Northwest Territories to a low of 6% in Nova Scotia. The largest change in rate over the one-year period occurred in the Yukon (from 34% to 25%).

The rate of recruitment declined nationally to 8% in 1977-78. Nova Scotia, New Brunswick and Ontario reported the lowest recruitment rate (7%). The Yukon experienced the largest change (from 34% in 1976-77 to 27% in 1977-78).

With the reduction in the turnover of staff, one might expect that the characteristics of the teaching force would remain relatively constant. However, important changes have occurred. For example, more men are teaching than ever before; the teaching force is becoming older; mobility has decreased; and salaries continue to increase due not only to contract settlements but also to the increased qualifications and experience of the teaching force.

TAUX DE LA PERSÉVÉRANCE, DU RECRUTEMENT  
ET DÉPARTS

En 1977-78 le taux de persévérance au Canada se situait à 92 % (augmentation par rapport à 1976-77, où le taux était de 91 %), s'échelonnant entre 71 % au Territoires du Nord-Ouest et 95 % en Nouvelle-Écosse. Le taux de persévérance a augmenté dans toutes les provinces, sauf au Terre-Neuve et Alberta (où il est demeuré à 92 %) et dans les Territoires du Nord-Ouest (où il est passé de 73 % à 71 %).

L'augmentation généralisée des taux de persévérance, jointe à une faible augmentation initiale du personnel a influé de façon appréciable sur les taux de départ et de recrutement des enseignants.

En 1977-78, le taux de départ pour le corps enseignant à l'échelle nationale s'établissait à 8 %, s'échelonnant entre 29 % dans les Territoires du Nord-Ouest et 6 % en Nouvelle-Écosse. La variation la plus importante au cours de l'année étudiée a été observée au Yukon (où le taux est passé de 34 % à 25 %).

Le taux de recrutement a diminué dans tout le Canada à 8 % en 1977-78. La Nouvelle-Écosse, Nouveau-Brunswick et l'Ontario ont enregistré le taux de recrutement le plus faible (7 %). Le Yukon a enregistré l'accroissement le plus important (passant de 34 % en 1976-77 à 27 % en 1977-78).

En raison du ralentissement du renouvellement du personnel, on pourrait s'attendre à ce que les caractéristiques du corps enseignant demeurent relativement constantes. Mais des changements importants se sont produits. Par exemple, le corps enseignant compte plus d'hommes que jamais; la moyenne d'âge augmente; la mobilité a diminué; et les traitements augmentent toujours, non seulement en raison de la signature de nouveaux contrats de travail, mais aussi à cause de la progression du niveau des qualifications et de l'expérience du corps enseignant.

## GENERAL TRENDS

### Salaries

In 1977-78 the median salary of staff was 18,408 (16,938 at the elementary level and 21,306 at the secondary level). These figures represent increases of 11% at the elementary level, 10% at the secondary level and 11% overall between 1976-77 and 1977-78.

Median salary increases are due not only to changes in collective agreements but also to a redistribution of the experience and qualifications of the teaching force. Between 1976-77 and 1977-78 average experience decreased by .2 years (to 10.4 years) at the elementary level and decreased by .1 years at the secondary level (from 10.7 to 10.6).<sup>(2)</sup> Over the same period the average years of post-secondary education remained unchanged at the elementary level (4.1) and unchanged at the secondary level (5.2).

### Qualifications

The restructuring and upgrading of minimum requirements for teacher certification introduced by provincial departments of education in the last few years have had a major influence on the redistribution of the teaching staff by qualifications. By 1974-75, certificates previously granted on the basis of a secondary school diploma and two years of teacher training had been discontinued in all provinces, the minimum requirements for new staff varying from three to four years of post-secondary study.<sup>(3)</sup> Continuing staff having less than the minimum requirements have generally been given a period of time to upgrade their qualifications.

The impact of these changing requirements was most significant at the elementary level. For example, in 1972-73, 65% of the elementary staff had more than two years of post-secondary education. By 1977-78 the proportion had increased to 82%.

While new appointments were entering the profession with higher qualifications, members of the continuing teaching force were also upgrading their qualifications by attending

(2) Median years experience in 1976-77 were based on the exclusion of new hirings in Ontario, for which data were not reported. As a result median years of experience reported for Ontario in 1976-77 were spuriously high (9.0), remaining unchanged in 1977-78.

## TENDANCES GÉNÉRALES

### Traitements

En 1977-78 le traitement médian du personnel était de 18,408 (16,938 au niveau élémentaire et de 21,306 au secondaire). Ces chiffres représentent des augmentations de 11 % au niveau élémentaire, de 10 % au secondaire et de 11 % dans l'ensemble entre 1976-77 et 1977-78.

La progression du traitement médian est attribuable non seulement à la négociation de nouvelles conventions collectives, mais aussi à une nouvelle répartition de l'expérience et des qualifications du corps enseignant. Entre 1976-77 et 1977-78, la moyenne de l'expérience a diminué de .2 au niveau élémentaire (à 10.4) et a diminué de .1 au secondaire (de 10.7 à 10.6)<sup>(2)</sup>. Au cours de la même période, le nombre moyen d'années d'études postsecondaires est demeuré constant au niveau élémentaire (4.1) et est demeuré constant au secondaire (5.2).

### Titres de compétence

La restructuration et le relèvement des exigences de base pour l'obtention d'un brevet d'enseignement, mis de l'avant ces dernières années par les ministères provinciaux de l'Éducation, ont beaucoup influé sur la répartition du personnel enseignant selon les qualifications. En 1974-75, toutes les provinces avaient cessé de délivrer les brevets décernés après l'obtention d'un diplôme de fin d'études secondaires et deux ans de formation pédagogique. Les exigences de base pour le nouveau personnel enseignant dans ces provinces prévoyaient trois ou quatre années d'études postsecondaires<sup>(3)</sup>. En général, le personnel permanent ne répondant pas aux exigences de base a bénéficié d'un délai pour se perfectionner.

Les conséquences de ces nouvelles exigences se sont surtout fait sentir au niveau élémentaire. En 1972-73, par exemple, 65 % du personnel enseignant à ce niveau avait fait plus de deux années d'études postsecondaires. La proportion était passée à 82 % en 1977-78.

Alors que les nouveaux enseignants faisaient leurs débuts dans l'enseignement avec un niveau plus élevé de qualifications, les membres du personnel enseignant permanent se perfectionnaient en

(2) Dans le calcul du nombre médian d'années d'expérience pour 1976-77, on n'a pas pris en compte les nouveaux enseignants engagés en Ontario, pour lesquels il n'existait aucune déclaration de données. Par conséquent, dans cette province, la médiane a été artificiellement élevée (9.0) en 1976-77, et elle est restée constante en 1977-78.

(3) Source: Salary Categories for Canadian Teachers, 1973, Fédération canadienne des enseignants.

winter and summer programs. As a result, the number of educators with fewer than four years of post-secondary education decreased. By 1977-78 the proportions of elementary staff with four or more years of post-secondary education had increased to 66% from 45% in 1972-73.

The increased proportion of the teaching staff with four or more years of post-secondary education is also reflected in the proportion having university degrees. This proportion increased from 52% in 1972-73 to 71% in 1977-78. At the elementary level, the increase was more striking, from 34% to 62%. At the secondary level, 81% held degrees in 1972-73 compared with 88% in 1977-78.

#### Experience

The median teaching experience for all staff in the 1977-78 school year was 9.0 years. However, there was considerable inter-provincial variation in the median teaching experience, ranging from 6.0 years in the Northwest Territories to 10.0 years in New Brunswick and Prince Edward Island.

In 1977-78, the median teaching experience for all elementary teachers was 8.0 years (9.0 for males and 8.0 for females), down .3 years from 1976-77. At the secondary level the median teaching experience was 9.0 years (10.0 for men and 7.0 for women), unchanged from 1976-77. (4)

Over the past two years, teaching staff have tended to remain with the employing board of the previous year. Median experience of this type (tenure) was 6.0 years in 1976-77 (6.0 at the elementary level and 6.0 at the secondary level). In the 1977-78 school year, median tenure was 6.0 years overall, remaining constant at 6.0 at the elementary level and increasing to 7.0 at the secondary level. Average tenure also increased over the period from 7.2 to 7.4 years at the elementary level and from 7.4 to 7.7 years at the secondary level.

#### Personal Characteristics

Over the past six years, there has been a continuing decline in the proportion of females in the teaching force, from 57% in 1972-73 to 54% in 1977-78. At the elementary level over the same period the decline was four percentage points (from 71% to 67%), while at the secondary level it was one percentage point (from 32% to 31%).

(4) See footnote (2) on page 17.

suyvant des cours l'hiver et l'été. En conséquence, le nombre d'enseignants ayant fait moins de quatre années d'études postsecondaires a diminué. En 1977-78, le pourcentage du personnel enseignant au niveau élémentaire ayant fait plus de quatre années d'études postsecondaires a augmenté pour s'établir à 66 % contre 45 % en 1972-73.

Le fait qu'une plus forte proportion du personnel enseignant a fait quatre années ou plus d'études postsecondaires se manifeste aussi dans la proportion d'enseignants détenteurs d'un grade universitaire. Cette dernière est passée de 52 % en 1972-73 à 71 % en 1977-78. L'augmentation a été plus marquée au niveau élémentaire, soit de 34 % à 62 %. Au secondaire, 81 % du personnel enseignant détenait un grade universitaire en 1972-73, contre 88 % en 1977-78.

#### Expérience

La médiane de l'expérience dans l'enseignement pour l'ensemble du personnel était de 9.0 années pour l'année scolaire 1977-78. Toutefois, elle a beaucoup varié d'une province à l'autre, s'échelonnant entre 6.0 années dans les Territoires du Nord-Ouest et de 10.0 années au Nouveau-Brunswick et à l'île-du-Prince-Édouard.

En 1977-78, la médiane de l'expérience dans l'enseignement pour l'ensemble des enseignants au niveau élémentaire était de 8.0 années (9.0 pour les hommes et 8.0 pour les femmes), une diminution de .3 année. Au niveau secondaire, elle était de 9.0 années (10.0 pour les hommes et 7.0 pour les femmes) (4).

Au cours des deux dernières années, le personnel enseignant a eu tendance à demeurer au service du conseil scolaire pour lequel il avait travaillé l'année précédente. En 1976-77, la médiane de ce genre d'expérience (service courant) était de 6.0 années (6.0 à l'élémentaire et 6.0 au secondaire). L'année suivante, la médiane du service courant pour l'ensemble s'est établie à 6.0 années, 6.0 années au niveau élémentaire et augmentant à 7.0 années au secondaire. La moyenne du service courant a également augmenté au cours de cette période, passant de 7.2 à 7.4 années au niveau élémentaire et de 7.4 à 7.7 années au secondaire.

#### Caractéristiques personnelles

Au cours des six dernières années, la proportion de femmes au sein du corps enseignant n'a cessé de décroître, passant de 57 % en 1972-73 à 54 % en 1977-78. Au cours de la même période, la baisse au niveau élémentaire a atteint quatre points de pourcentage (de 71 % à 67 %), alors qu'au niveau secondaire, elle s'est chiffrée à un point (de 32 % à 31 %).

(4) Voir la note (2) à la page 17.

Over the past two years there has been a small general increase in the median age of staff to 34.3 years in 1977-78. However, an interprovincial comparison in 1977-78 shows considerable variation from a low of 30.4 years in Newfoundland to a high of 34.8 years in Ontario. Considering the general tendency for enrolment and recruitment to decrease and retention of staff to increase, the median age of the staff should continue to increase in the next few years.

Au cours des deux dernières années, on a observé chez le personnel une légère augmentation, généralisée, de l'âge médian (34.3 ans en 1977-78). Toutefois, une comparaison interprovinciale de l'âge médian en 1977-78 relève des variations importantes s'échelonnant entre 30.4 ans à Terre-Neuve et 34.8 ans en Ontario. Compte tenu de la tendance générale à la baisse des effectifs et du taux de recrutement d'une part et de la tendance à la hausse du taux de maintien de l'emploi d'autre part, l'âge médian du personnel devrait continuer d'augmenter au cours des prochaines années.

AN ANALYSIS OF TERMINATIONS FROM  
THE 1975-76 SCHOOL YEAR

Nine per cent of the teaching force in 1975-76 (18,599) did not return to teach the following September. Some of these teachers retired, others left the profession to take up different occupations, some had their employment terminated and others returned to university. Although these teachers were not surveyed to establish why they left the profession, it has been possible to identify them on the data files. Subsequent analysis of their characteristics permits the reader to arrive at certain conclusions. The following general statements can be made:

- (1) Seventy-one per cent of the terminations were from the elementary level of education (63% of the 1975-76 staff taught at this level).
- (2) Seventy-three per cent were female (55% of the 1975-76 staff were female).
- (3) Sixty-eight per cent were under 35 years of age (57% of the 1975-76 staff were under 35).
- (4) A high proportion were relatively highly qualified.

Various characteristics of these terminated teachers are studied below. Readers wishing further detail should refer to the statistical tables presented in Appendix B. Those wishing to examine the changing nature of the teaching force are referred specifically to the 1975-76 issue of this publication, which examined the new recruits in detail.

1. Age

A comparison of the age distribution of terminating educators and the total 1975-76 staff indicates that a disproportionate number of both young and older teachers are terminating their employment (see table below). While 38% of all educators in 1975-76 were under 30 years of age, 52% of the total terminating teachers were under 30. Likewise, a greater proportion of the terminated staff were over 55 than was their representation in the total teaching force.

ANALYSE DES DÉPARTS POUR L'ANNÉE  
SCOLAIRE 1975-76

En 1975-76, 9 % des membres du personnel enseignant (18,599) n'ont pas repris leur travail au début de l'année scolaire suivante. Certains d'entre eux ont pris leur retraite et, alors que l'emploi de certains avait pris fin, d'autres se sont orientés vers une carrière différente ou sont retournés à l'université. Bien qu'on n'ait pas déterminé par voie d'enquête les raisons pour lesquelles ces enseignants avaient quitté leur emploi, on a pu trouver ces raisons dans les fichiers de données. L'analyse des caractéristiques de ce groupe permet au lecteur de tirer certaines conclusions. Voici quelques renseignements d'ordre général:

- (1) Soixante et onze pour cent des enseignants qui ont quitté leur emploi venaient de l'élémentaire (où enseignaient, en 1975-76, 63 % de l'ensemble du personnel).
- (2) Soixante-treize pour cent d'entre eux étaient des femmes (en 1975-76, 55 % des membres du personnel étaient des femmes).
- (3) Soixante-huit pour cent étaient âgés de moins de 35 ans (en 1975-76, 57 % des enseignants avaient moins de 35 ans).
- (4) Une forte proportion de ces enseignants avaient un niveau de scolarité relativement élevé.

Nous examinerons ci-après diverses caractéristiques de ces enseignants. Les lecteurs qui désirent de plus amples renseignements pourront consulter les tableaux statistiques de l'appendice B. Ceux qui veulent étudier l'évolution du corps professoral consulteront le bulletin de 1975-76 de la présente série, qui traite du recrutement de façon détaillée.

1. Âge

Si l'on compare la répartition selon l'âge des enseignants qui ont quitté leur emploi et la composition de l'ensemble du corps enseignant en 1975-76, on constate qu'un nombre extrêmement élevé de jeunes enseignants et d'enseignants plus âgés ont laissé leur emploi cette année-là (voir le tableau ci-dessous). Ainsi, les moins de 30 ans ne représentaient que 38 % de l'ensemble du personnel, mais 52 % des enseignants qui ont quitté leur emploi appartenaient à ce groupe d'âge. De même, chez les 55 ans et plus, la proportion des départs a été supérieure au pourcentage que représente ce groupe d'âge dans l'ensemble du corps enseignant.

| Age — Âge  | Elementary<br>—<br>Élémentaire |                       |       | Secondary<br>—<br>Secondaire |                       |       | Total               |                       |       |
|--|--------------------------------|-----------------------|-------|------------------------------|-----------------------|-------|---------------------|-----------------------|-------|
|  | Male<br>—<br>Hommes            | Female<br>—<br>Femmes | Total | Male<br>—<br>Hommes          | Female<br>—<br>Femmes | Total | Male<br>—<br>Hommes | Female<br>—<br>Femmes | Total |
| per cent — pourcentage                                       |                                |                       |       |                              |                       |       |                     |                       |       |

Note: Percentages sum to 100 vertically. — Nota: Les pourcentages s'additionnent verticalement.

An examination of these data by sex and level of education (see Appendix B, Table B.2) indicates a number of significant differences between the proportion of staff terminating and the proportion of the total teaching force. For example, a relatively small number of elementary females in the 35-54 age group terminated, while a relatively small number of secondary males terminated in the under 30 age group. In general, the remaining figures indicate no significant differences of this type.

La ventilation de ces données selon le sexe et le niveau d'enseignement (voir appendice B, tableau B.2) fait ressortir un certain nombre de différences importantes. Ainsi, un nombre très peu élevé de femmes de 35 à 54 ans ont laissé leur emploi au niveau élémentaire, tandis qu'un nombre relativement faible d'hommes de moins de 30 ans quittaient l'enseignement au niveau secondaire. En général, les autres chiffres n'accusent pas d'écarts sensibles.

## 2. Teaching Position

While the majority of terminated staff were regular classroom teachers, a disproportionately small number of both males and females terminated in comparison with their proportions in the total 1975-76 teaching staff (see table below for details).

No significant differences appeared between the proportion of terminated principals and their proportion in the total 1975-76 teaching staff. Differences by sex were likewise non-significant.

The remainder of the terminations (including vice-principals, department heads and other school and board instructional and administrative staff) show significant differences when compared with their representation in the total teaching force. A disproportionately large number of these educators terminated (14% as opposed to the 3% of total staff that they comprise), particularly the female staff.

## 2. Statut d'enseignement

Quoique la plupart des personnes qui ont quitté leur emploi en 1975-76 soient des enseignants, ces derniers, tant les hommes que les femmes, ne représentent en fait que des proportions extrêmement faibles des départs, compte tenu de leur importance dans l'ensemble du personnel (voir le tableau ci-dessous).

Pour ce qui est des directeurs, il ne semble pas y avoir d'écart considérable entre la proportion des départs et la proportion que représente ce groupe dans l'ensemble du personnel. Les variations selon le sexe ne sont pas non plus significatives.

En revanche, dans le cas des autres membres du personnel (sous-directeurs, chefs de département et autres membres du personnel enseignant et administratif des écoles et des conseils scolaires), il existe des écarts prononcés. En effet, une proportion très élevée des membres de ce groupe, surtout de sexe féminin, ont quitté leur emploi en 1975-76 (14 %, alors qu'ils ne représentent que 3 % de l'ensemble du personnel).

(1) This includes vice-principals, department heads and other school and board instructional and administrative staff. - Comprend les sous-directeurs, les chefs de département et les autres membres du personnel enseignant et administratif des écoles et des conseils scolaires.

The statistical table below summarizes terminations by teaching position and age group. Although regular classroom teachers account for the majority of terminations in all age groups, their representation decreases with age. While this is true for both sexes, the decline is less significant for males

Le tableau ci-dessous fait état des départs selon le statut d'enseignement et le groupe d'âge. Dans tous les groupes d'âge, les enseignants représentent la proportion la plus forte des départs, mais cette proportion diminue avec l'âge. Cette remarque vaut pour les deux sexes, quoique la baisse soit moins importante chez les hommes (45 %

(45% for the less than 30 age group to 10% for those 55 years and over) than females (60% to 11%, respectively). The reverse is true for terminated principals (females particularly), where their representation increases with age. The trend for the remaining staff is less uniform, although in general their representation as with regular classroom teachers, decreases with age.

The number of terminated classroom teachers (females particularly) is inversely related to age. As with the total 1975-76 staff, the majority of terminated principals were 35 years and over. Differences between male and female occur in the 30-34 and the 55 and over age groups (see table below). The greatest proportion of the remaining staff is in the less than 30 group (although for males it is the 35-54 group), with the remaining proportions being similar.

des moins de 30 ans contre 10 % des 55 ans et plus) que chez les femmes (respectivement 60 % contre 11 %). Dans le cas des directeurs (surtout de sexe féminin), le phénomène inverse se produit: la proportion des personnes qui laissent leur emploi augmente avec l'âge. Chez les autres membres du personnel, la situation est moins uniforme, bien que la proportion des départs ait tendance à diminuer à mesure que l'âge augmente, comme c'est le cas pour les enseignants.

La proportion des enseignants qui laissent leur emploi est inversement proportionnelle à l'âge, mais cette tendance se manifeste davantage chez les femmes que chez les hommes. La plupart des directeurs qui ont quitté leur emploi en 1975-76 avaient 35 ans et plus. Les écarts observés entre les deux sexes visent les 30-34 ans et les 55 ans et plus (voir le tableau ci-dessous). Les autres membres du personnel qui ont quitté leur emploi se trouvent surtout chez les moins de 30 ans (en fait chez les 35-54 ans pour les hommes), les autres groupes d'âge intervenant dans des proportions équivalentes.

| Position - Statut               | Age - Âge  |    |                         |    |                         |    |                                       |    |

### 3. Years of Post-secondary Education

The statistical table below provides details on the number of years of post-secondary education for terminated staff in four different age groups. The majority of staff had 4-5 years of post-secondary education,

### 3. Nombre d'années d'études postsecondaires

Le tableau ci-dessous renferme des données détaillées, ventilées selon quatre groupes d'âge, sur le nombre d'années d'études postsecondaires qu'ont fait les membres du personnel d'enseignement qui laissent leur emploi. La plupart d'entre eux

with the exception of the 55 and over category where the greatest proportion (44%) had less than four years. Several differences appeared when comparing male educators with female; for example, in the 35-54 age group, the majority of terminated females had less than four years of post-secondary education, while for males it was 4-5 years. Similarly, male terminations in the 55 and over group had primarily six years or more of post-secondary education, while for females it was less than four years.

Of the staff who terminated with less than four years of post-secondary education, the majority (50%) were less than 30 years old. The remaining age groups showed relatively even proportions, although differences appeared between male and female staff (see age group 35-54).

ont de quatre à cinq années d'études postsecondaires; chez les 55 ans et plus, toutefois, la proportion de ceux qui ont moins de quatre ans d'études postsecondaires est plus élevée (44 %). On observe plusieurs différences selon le sexe. Par exemple, dans le groupe des 35-54 ans, la majorité des femmes qui ont quitté leur emploi avaient moins de quatre années d'études postsecondaires, tandis que la plupart des hommes en avaient quatre ou cinq. De même, dans le groupe des 55 ans et plus, les hommes qui ont quitté leur emploi avaient pour la plupart six années d'études postsecondaires ou plus, contre moins de quatre chez les femmes.

Une bonne partie (50 %) des enseignants qui avaient moins de quatre années d'études postsecondaires étaient âgés de moins de 30 ans. Dans les autres groupes d'âge, les proportions sont relativement uniformes, bien qu'il y ait des écarts selon le sexe (voir le groupe des 35-54 ans).

#### 4. Teaching Experience in Current Province

The majority (51%) of teachers who terminated their employment in 1975-76 had fewer than six years of teaching experience in their current province (49% male, 53% female). Fifteen per cent (19% male, 14% female) had 15 or more years of experience. The remaining categories (6-14 years) each accounted for between 2% and 6% of all terminated teachers. No significant differences appeared by sex or teaching level.

A greater proportion of the terminated females, particularly at the secondary level, had less teaching experience in their current province than their male colleagues. Conversely, a greater proportion of males than females terminated with 15 or more years of experience.

#### 5. Teaching Experience in Current Board(5)

The majority (52%) of elementary-secondary teachers who terminated their employment in 1975-76 had fewer than four years of teaching experience (51% male, 53% female) in their current school board, while 10% had 15 or more years of teaching experience (12% male, 9% female). The remaining categories (4-14 years experience) each accounted for between 1% and 7% of all terminated teachers. No significant differences by sex appeared at the elementary level whereas at the secondary level, 12% of males who terminated had 15 or more years of teaching experience, while the comparable figure for females was 7%.

In general, a greater proportion of elementary male teachers who terminated had fewer years of teaching experience in their current board than their female counterparts, while the converse was true at the secondary level.

#### 6. Salary

The average salary of the 1975-76 terminated staff was \$13,400, compared with \$14,600 for the total 1975-76 staff (see table below). In comparison with the total 1975-76 staff average salaries of the terminated educators were 6% lower at the elementary level and 9% lower at the secondary level.

(5) This item may be considered to be a proxy for tenure of staff.

#### 4. Expérience dans la province d'enseignement

La majeure partie (51 %) des enseignants qui ont quitté leur emploi en 1975-76 avaient moins de six ans d'expérience dans leur province d'enseignement (49 % chez les hommes et 53 % chez les femmes). Les enseignants qui possédaient 15 années d'expérience ou plus figuraient pour une proportion de 15 % (19 % chez les hommes et 14 % chez les femmes). Quant à ceux qui avaient de 6 à 14 ans d'expérience, ils intervenaient dans des proportions entre de 2 % et 6 %. On n'a pas observé de différences appréciables selon le sexe ou le niveau d'enseignement.

Les femmes qui ont quitté leur emploi, surtout au niveau secondaire, avaient moins d'années d'expérience dans leur province d'enseignement, que leurs collègues masculins. Réciproquement, un plus grand nombre d'hommes que de femmes ayant 15 années d'expérience ou davantage ont quitté leur emploi.

#### 5. Expérience dans le conseil scolaire(5)

La majeure partie (52 %) des enseignants de l'élémentaire et du secondaire qui ont quitté leur emploi en 1975-76 avaient moins de quatre années d'expérience dans leur conseil scolaire (15 % des hommes contre 53 % des femmes); 10 % avaient 15 années d'expérience ou plus (respectivement 12 % et 9 %) et, enfin, 1 % à 7 % des enseignants des deux sexes avaient de 4 à 14 années d'expérience. On n'a pas observé de différences notables selon le sexe à l'élémentaire; au niveau secondaire, en revanche, 12 % des hommes avaient 15 années d'expérience ou plus, contre 7 % des femmes.

En général, chez les enseignants de l'élémentaire qui ont quitté leur emploi, les hommes avaient moins d'expérience dans leur conseil scolaire que leurs collègues de sexe féminin. Par contre, au secondaire, ils en avaient davantage.

#### 6. Traitements

Le traitement moyen des enseignants qui ont quitté leur emploi en 1975-76 s'établissait à \$13,400, alors que le traitement moyen de l'ensemble du corps d'enseignement se chiffrait à \$14,600 (voir le tableau ci-dessous). Les traitements des enseignants de l'élémentaire et du secondaire qui ont quitté leur emploi étaient en moyenne inférieurs, respectivement de 6 % et de 9 %, au traitement moyen.

(1) Vertical percentages may not add to 100 due to the percentage of educators who do not possess a valid teaching certificate. - La somme des pourcentages, calculée verticalement, peut ne pas égaier 100, car une certaine proportion des membres du personnel d'enseignement ne possèdent pas de brevet d'enseignement valide.
